This book examines the role of experts and expertise in the dynamics of globalisation since the mid-nineteenth century. It shows how engineers, scientists and other experts have acted as globalising agents, providing many of the

materials and institutional means for world economic and technical integration. Focusing on the study of international connections, Technology and Globalisation illustrates how expert practices have shaped the political economies of interacting countries, entire regions and the world economy. This title brings together a range of approaches and topics across different

regions, transcending nationally-bounded historical narratives. Each chapter deals with a particular topic that places expert networks at the centre of the history of globalisation. The contributors concentrate on central themes including intellectual property rights, technology transfer, tropical science, energy production, large technological

projects, technical standards and colonial infrastructures. Many also consider methodological, theoretical and conceptual issues. It's Easy To Play Ballads Lever Press Suitable for all admirers of the piano, this work brings together more than 3,000 works for piano and orchestra. It comes with a supplement containing over 200 new entries. **Billboard** Scarecrow Press

<p>Crack the Code and Get Fluent Faster! "I had to learn [a new language] in a handful of days for a TV interview. I asked Benny for help and his advice was invaluable." - Tim Ferriss</p> <p>What if you could skip the years of study and jump right to speaking Spanish? Sound crazy? No, it's language hacking. It's about learning what's indispensable, skipping what's not - and using what you've learned to</p>	<p>have real conversations in Spanish - from day one! Unlike most traditional language courses that try to teach you the rules of a language, Language Hacking Spanish, shows you how to learn and speak Spanish immediately through proven memory techniques, unconventional shortcuts and conversation strategies perfect by one of the world's greatest language</p>	<p>learners, Benny Lewis, aka the Irish Polyglot. The Method Language Hacking takes a modern approach to language learning, blending the power of online social collaboration and the 80/20 principle of learning (Benny's ten #languagehacks show you how to achieve more with less!). It focuses on the conversations and language that learners need to master right away, rather than</p>

most controversial art critics, examines the works of over 1,000 artists from the first 80 years of the 20th century. This book is an indispensable reference for anyone interested in studying the evolution of Latin American art. *14 Jazz & Funk Etudes* Random House Following the mass arrival of European immigrants to Argentina in the early years of the twentieth century new

forms of entertainment emerged including tango, films, radio and theater. While these forms of culture promoted ethnic integration they also produced a new kind of polarization that helped Juan Peron to build the mass movement that propelled him to power. The Orange Economy Inter-American Development Bank Since the Mexican government initiated a

military offensive against its country's powerful drug cartels in December 2006, some 50,000 people have perished and the drugs continue to flow. In *The Fire Next Door*, Ted Galen Carpenter boldly conveys the growing horror overtaking Mexico and makes the case that the only effective strategy for the United States is to abandon its failed drug prohibition policy, thus

depriving drug cartels of financial resources. Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...  Marcos first  
 captured  
 world

attention on January 1, 1994, when he and an indigenous guerrilla group calling themselves "Zapatistas" revolted against the Mexican government and seized key towns in Mexico's southernmost state of Chiapas. In the six years that have passed since their uprising, Marcos has altered the course of Mexican politics and emerged an international symbol of grassroots

movement-building, rebellion, and democracy. The prolific stream of poetic political writings, tales, and traditional myths that Marcos has penned since January 1, 1994 fill more than four volumes. Our *Word Is Our Weapon* presents the best of these writings, many of which have never been published before in English. Throughout this remarkable book we hear the uncompromisi

ng voice of indigenous communities living in resistance, expressing through manifestos and myths the universal human urge for dignity, democracy, and liberation. It is the voice of a people refusing to be forgotten the voice of Mexico in transition, the voice of a people struggling for democracy by using their word as their only weapon. [Spotlight on Music](#) Springer The Five Continents of Theatre

undertakes the exploration of the material culture of the actor, which involves the actors' pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part. The material culture of the actor is organised around body-mind

techniques (see A Dictionary of Theatre Anthropology by the same authors) and auxiliary techniques whose variety concern: ■ the diverse circumstances that generate theatre performances: festive or civil occasions, celebrations of power, popular feasts such as carnival, calendar recurrences such as New Year, spring and summer festivals; ■ the financial and organisational

aspects: costs, contracts, salaries, impresarios, tickets, subscriptions, tours; ■ the information to be provided to the public: announcements, posters, advertising, parades; ■ the spaces for the performance and those for the spectators: performing spaces in every possible sense of the term; ■ sets, lighting, sound, makeup, costumes, props; ■ the relations established

between actor and spectator; ■ the means of transport adopted by actors and even by spectators. Auxiliary techniques repeat themselves not only throughout different historical periods, but also across all theatrical traditions. Interacting dialectically in the stratification of practices, they respond to basic needs that are common to all traditions when a performance

has to be created and staged. A comparative overview of auxiliary techniques shows that the material culture of the actor, with its diverse processes, forms and styles, stems from the way in which actors respond to those same practical needs. The authors' research for this aspect of theatre anthropology was based on examination of practices, texts and of 1400 images,

chosen as exemplars.

Autonomea  
As jazz enters its second century it is reasserting itself as dynamic and relevant. Boston Globe jazz writer and Emerson College professor Bill Beuttler reveals new ways in which jazz is engaging with society through the vivid biographies and music of Jason Moran, Vijay Iyer, Rudresh Mahanthappa,

The Bad Plus, Miguel Zenón, Anat Cohen, Robert Glasper, and Esperanza Spalding. These musicians are freely incorporating other genres of music into jazz—from classical (both western and Indian) to popular (hip-hop, R&B, rock, bluegrass, klezmer, Brazilian choro)—and other art forms as well (literature, film, photography, and other visual arts). This new

generation of jazz is increasingly more international and is becoming more open to women as instrumentalists and bandleaders. Contemporary jazz is reasserting itself as a force for social change, prompted by developments such as the Black Lives Matter, #MeToo movements, and the election of Donald Trump. *Lightweight Landscape* Seven Stories Press

 The Object of the Atlantic is a wide-ranging study of the transition from a concern with sovereignty to

a concern with things in Iberian Atlantic literature and art produced between 1868 and 1968. Rachel Price uncovers the surprising ways that concrete aesthetics from Cuba, Brazil, and Spain drew not only on global forms of constructivism but also on a history of empire, slavery, and media technologies from the Atlantic world. Analyzing Jose Marti's notebooks,

<p>Joaquim de Sousandrade's poetry, Ramiro de Maeztu's essays on things and on slavery, 1920s Cuban literature on economic restructuring, Ferreira Gullar's theory of the "non-object," and neoconcrete art, Price shows that the turn to objects—and from these to new media networks—was rooted in the very philosophies of history that helped form the Atlantic world itself. <u>Culture of</u></p>	<p><u>Class</u> Alfred Music "This collection, because of its exceptional theoretical coherence and sophistication, is qualitatively superior to the most frequently consulted anthologies on Latin American women's history and literature . . . With a fresh perspective and tactics that have never been seen in relation to an armed insurrection, the EZLN (Zapatista National Liberation Army) has changed the definition of

what revolution means. From the marginalized confines of the poorest region in Mexico, a new concept of revolutionary change with a new solution to societies woes is currently being proposed. The Object of the Atlantic Music Sales This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the "creative economy", a

valuable development opportunity that Latin America, the Caribbean and the world at large cannot afford to miss. The creative economy, which we call the "Orange Economy" in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and

indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand

and explain what the Orange Economy is and why it is so important. You will also acquire the analytical

tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.
