The Rough Guide to Belgium and Luxembourg Rough Guides
This new, thoroughly updated fifth edition of Bradt's Luxembourg remains the only comprehensive, English-language guidebook to

focus exclusively on this small but fascinating European country, where public transport is now entirely free. Reviews of the best places to stay and eat in all price categories, from luxury to budget, sit alongside information about every museum and significant place of interest, plus in-depth guides to local food, drink, language and culture, and advice on the best cycling and hiking trails, many of the latter having been personally explored by the author. This diminutive European state punches above its weight and is celebrated for everything from its early pioneering of commercial broadcasting with Radio Luxembourg to the fact that it has won the Eurovision Song Contest five times, while Luxembourg riders have won the Tour de France five times too. A foodie paradise, the country offers its own unique cuisine (a fusion of French and German influences) and perhaps the densest collection of Michelin-starred restaurants in the world. Short distances and easy travelling (whether by public transport or driving) mean a lot can be covered in a relatively brief visit, from sixty medieval castles to plentiful opportunities for outdoors enthusiasts, including long-distance international walking trails linking with the Belgian Ardennes and German Eifel. Military history is also covered, notably the sites of the Battle of the Ardennes and Hamm American Military Cemetery (the burial place of General Patton), as are details of the most popular sites such as Vianden and Luxembourg City's Museum of Modern Art. New for this edition are: the Royal Hamilius complex in Luxembourg City (designed by architect Sir Norman Foster); the post-renovation, UNESCO-listed Pétrusse casemates; infrastructure upgrades such as extensions to the City's tram line and ever-easier train and aeroplane access; details on the new

cultural and art spaces in Esch-sur-Alzette (a European City of Culture in 2022); new wine-related events in the Moselle; a new Slate Museum in Haut-Martelange; and the Mëllerdall Nature and Geopark's inclusion in UNESCO's network of global geoparks. With so much in Luxembourg to surprise you, Bradt's Luxembourg is the perfect travel companion.

Brussels (Rough Guides Snapshot Belgium) Alan Rogers

The increasing importance attached to the economic and social cohesion of the European Union since the 1980s, and the role of competition policy in achieving this objective, has special significance for the control of regional aids, given the general ban on State aid. Regional aids are considered to have the potential to contribute to economic and social cohesion and to undermine its attainment. The notion of competition policy as an instrument of economic and social cohesion has become a standard part of Commission rhetoric in defence of its actions. This book is concerned with the influence of EU competition policy on the regional policies of the Member States. It focuses on how the European Commission has interpreted the derogations from the State aid ban to enable the conduct of regional aid policies. The book takes both a historical perspective, tracing the evolution of policy, and a thematic one, examining in particular the relationship between EU competition and cohesion policies and the treatment of aid to very large projects. The author clearly demonstrates that, in reality, the competition policy control of

regional aids is of much longer standing than the community's explicit regional aid policy and, in many respects, of arguably greater influence. She shows how competition policy has for almost thirty years shaped the design, scope and implementation of national regional aid policies; in no EU country has regional policy been unaffected by Commission intervention in the name of competition policy. Moreover, the policy principles developed for the EU now apply extraterritorially to members of the European Economic Area and to the current applicant countries. The study's overall perspective is policy-oriented. It considers both the impact of Commission intervention in the past and the implications of policy for the future, especially in the context of enlargement and a wider Europe. It will be an invaluable resource for all policymakers and practitioners active in the fields of economic development, regional policy and State aid law at European, national and subnational levels.
