This book is comprised of the proceedings of the First and Only Conference on Negritude ever held in the Americas. The Conference which gathered intellectuals of African descent from various countries of the new continent was held in Miami in 1987 around the theme "Negritude, Ethnicity and Afro Cultures in the Americas." The towering presence of Aimé Césaire and Léopold Sédar Senghor, side by side on a public forum for the first and, most likely, the last time since The First World Festival of Negro Arts, hosted by Senegal in 1966, bestowed a solemn summit quality on this impressive gathering. The untimely death of Cheikh Anta Diop, the scientist, Alioune Diop, the strategist, Léon Damas, the uncompromisingly anti-colonialist writer deprived the Conference participants of their physical presence, but their spirit hovered over the entire city during these memorable three days. Since the conference, death also robbed the Black World of the brilliant minds of Lelia Gonzalez, St. Clair Drake and Alex Haley who participated. Men of letters and political pioneers, Césaire and Senghor have ineradicably marked world history. At the close of this millenium, their incomparable intellectual contribution has come to symbolize the divergent continuity of the two powerful currents of thought launched, at the beginning of this century, by Booker T. Washington, Ida B. Wells, W.E.B. DuBois, Marcus Garvey, Jean Price Mars, Anténor Firmin (and many less known African men and women thinkers) in what some have termed the Great Debate.

Twenty-three centuries after its compilation, 'The Politics' still has much to contribute to this central question of political science. Aristotle's thorough and carefully argued analysis is based on a study of over 150 city constitutions, covering a huge range of political issues in order to establish which types of constitution are best - both ideally and in particular circumstances - and how they may be maintained. Aristotle's opinions form an essential

background to the thinking of philosophers such as Thomas Aquinas, Machiavelli and Jean Bodin and both his premises and arguments raise questions that are as relevant to modern society as they were to the ancient world.

An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from *Gore Capitalism* Written by the Tijuana activist intellectual Sayak Valencia, *Gore Capitalism* is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narcopower, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.

Jacques Derrida's revolutionary theories about deconstruction, phenomenology, psychoanalysis, and structuralism, first voiced in the 1960s, forever changed the face of European and American criticism. The ideas in *De la grammatologie* sparked lively debates in intellectual circles that included students of literature,

philosophy, and the humanities, inspiring these students to ask questions of their disciplines that had previously been considered improper. Thirty years later, the immense influence of Derrida's work is still igniting controversy, thanks in part to Gayatri Spivak's translation, which captures the richness and complexity of the original. This corrected edition adds a new index of the critics and philosophers cited in the text and makes one of contemporary criticism's most indispensable works even more accessible and usable.

Throughout my childhood, my grandmother Yasmina, who was illiterate and grew up in a harem, repeated that to travel is the best way to learn and to empower yourself. "When a woman decides to use her wings, she takes big risks," she would tell me, but she was convinced that if you didn't use them, it hurt.... So recalls Fatema Mernissi at the outset of her mesmerizing new book. Of all the lessons she learned from her grandmother -- whose home was, after all, a type of prison -- the most central was that the opportunity to cross boundaries was a sacred privilege. Indeed, in journeys both physical and mental, Mernissi has spent virtually all of her life traveling -- determined to "use her wings" and to renounce her gender's alleged legacy of powerlessness. Bursting with the vitality of Mernissi's personality and of her rich heritage, *Scheherazade Goes West* reveals the author's unique experiences as a liberated, independent Moroccan woman faced with the peculiarities and unexpected encroachments of Western culture. Her often surprising discoveries about the conditions of and attitudes toward women around the world -- and the exquisitely embroidered amalgam of clear-eyed autobiography and dazzling meta-fiction by which she relates those assorted discoveries -- add up to a deliciously wry, engagingly cosmopolitan, and deeply penetrating narrative. In her previous bestselling works, Mernissi -- widely recognized as the world's greatest living Koranic scholar and Islamic sociologist -- has shed unprecedented light on the lives of women in the Middle East. Now, as a writer and scholarly veteran of the high-wire act of straddling disparate societies, she trains her eyes on the female culture of the West. For her book's inspired central

metaphor, Mernissi turns to the ancient Islamic tradition of oral storytelling, illuminating her grandmother's feminized, subversive, and highly erotic take on Scheherazade's wife-preserving tales from The Arabian Nights -- and then ingeniously applying them to her own lyrically embellished personal narrative. Interwoven with vivid ruminations on her childhood, her education, and her various international travels are the author's piquant musings on a range of deeply embedded societal conditions that add up, Mernissi argues, to a veritable "Western harem." A provocative and lively challenge to the common assumption that women have it so much better in the West than anywhere else in the world, Mernissi's book is an entrancing and timely look at the way we live here and now. By inspiring us to reconsider even the most commonplace aspects of our culture with fresh eyes and a healthy dose of suspicion, Scheherazade Goes West offers an invigorating, candid, and entertaining new perspective on the themes and ideas to which Betty Friedan first turned us on nearly forty years ago.

The Eudemian Ethics and the De Virtutibus et Vitiis have not received much attention from scholars. Mr. Ross's suggestions have been of the greatest use to me; Fritzsche's commentary I have sometimes referred to with advantage, and also to some notes printed by Prof. Henry Jackson and kindly sent me by him some years ago. Prof. Jackson is also the author of an article in the Journal of Philology, xxxii, which has shed a flood of light on the corrupt passage, Bk. VII, chs. 13, 14. Of course the principal help to the understanding of the two treatises is the Nicomachean Ethics, their resemblances to and differences from which work are of great interest. Aeterna Press

The Laws is Plato's last, longest, and perhaps, most famous work. It presents a conversation on political philosophy between three elderly men: an unnamed Athenian, a Spartan named Megillus, and a Cretan named Clinias. They worked to create a constitution for Magnesia, a new Cretan colony that would make all of its citizens happy and virtuous. In this work, Plato combines political philosophy with applied legislation, going into great detail concerning what laws and procedures should be in the state. For example, they consider whether drunkenness should be allowed in the city, how citizens should hunt, and how to punish suicide.

The principles of this book have entered the legislation of many modern countries and provoke a great interest of philosophers even in the 21st century.

"Allende can spin a yarn with the grace of a poet."—Entertainment Weekly AN INSTANT NEW YORK TIMES BESTSELLER, NOW WITH A NEW DEAR READER LETTER From the New York Times bestselling author of A Long Petal of the Sea and The House of the Spirits, an enthralling and suspenseful coming-of-age story about a teenage girl who must unravel the mysteries of her past in order to save herself. Nineteen-year-old Maya Vidal grew up in a rambling old house in Berkeley with her grandmother Nini—a force of nature whose formidable strength helped her build a new life after she emigrated from Chile in 1973—and Popo, an African-American astronomer and professor whose solid, comforting presence helps calm the turbulence of Maya's adolescence. When Popo dies of cancer, Maya comes undone and turns to drugs, alcohol, and petty crime. When she becomes lost in the dangerous underworld of Las Vegas, Maya becomes caught in the crosshairs of deadly warring forces. Her one chance for survival is Nini, who helps her escape to a remote island off the coast of Chile. Here, Maya tries to make sense of the past to discover the truth about her life and her family, and embarks on her greatest adventure: a journey of self-discovery and forgiveness.

Anthony Giddens has been in the forefront of developments in social theory for the past decade. In The Constitution of Society he outlines the distinctive position he has evolved during that period and offers a full statement of a major new perspective in social thought, a synthesis and elaboration of ideas touched on in previous works but described here for the first time in an integrated and comprehensive form. A particular feature is Giddens's concern to connect abstract problems of theory to an interpretation of the nature of empirical method in the social sciences. In presenting his own ideas, Giddens mounts a critical

attack on some of the more orthodox sociological views. The Constitution of Society is an invaluable reference book for all those concerned with the basic issues in contemporary social theory.

Encompassing nature, science, art, architecture, and spirituality, and illustrated with over 700 photographs and line drawings, *The Hidden Geometry of Life* illuminates the secret underpinnings of existence. In her trademark easy-to-understand style, mathematician Karen French shows how sacred geometry permeates every level of being, manifesting itself in simple shapes and numbers, music and sounds, light and color, even in the mysteries of creation itself. But these geometrical archetypes are more than the building blocks of reality: they are gateways to profound new levels of awareness.

*The Craftsman* Council of Europe

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. *The Craftsman* shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Roland Auguet examines the Roman taste for blood and considers what the games, that strange combination of Cruelty and Civilization, reveal about the Roman mentality. He shows how the great spectacles became a part of city life - they were awaited with impatience, everyone discussed them, some applauded the action in the arena, while others booed frantically. This book provides an exciting history of gladiators, chariot racing and other games as well as an investigation of their function and significance within society. It is essential reading for anyone who is interested in the Romans' violent form of entertainment.
