Gutenberg: Was He the Inventor of Printing BoD – Books on Demand

This book recasts questions about the overlapping boundaries of language, history, and politics that have been at the center of critical and theoretical debates in the study of Romantic literature and thought. While poststructuralism and deconstruction have been accused of privileging language over history, the New Historicism and other historicist and cultural approaches to literature have attempted to restore history's place in the study of literature. Taking its title from a reading of the word Lippe in Kleist's Die Hermannsschlacht, Borders of a Lip is drawn to neither of these poles, but instead to their meeting place or coincidence: the site of a border, a political or national boundary, even the boundary that is the political, the lip that is also the place of language. Through readings of Kant, Wordsworth, Kleist, Mary Shelley, Yeats, and Lyotard, the book examines the convergence of language and history that takes place in their work. Instead of

placing language and history in absolute opposition, making the border an unbreachable limit, the book explores how crossing these borders (re)defines the political.

 Over the past few decades, the book series Linguistische Arbeiten [Linguistic Studies], comprising over 500 volumes, has made a significant contribution to the development of linguistic theory both in Germany and internationally. The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses. To this end, we invite submission of high-quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions, discuss new data and advance the development of linguistic theory.

Grammar of the German Language Walter de Gruyter GmbH & Co KG

This volume explores how grammatical categories, as defined by theoretical linguistics, are effectively implemented in language education. Aiming to bridge the gap between linguistic research and language pedagogy, it offers a detailed inquiry that spans theoretical frameworks and empirical data. By presenting a series of insightful studies, this work illustrates how findings from theoretical linguistics can be applied to enhance practical language instruction, demonstrating the reciprocal enrichment of both fields. Essential for linguists, language educators, and researchers interested in the intersections of grammar, cognition, and pedagogy, the volume is organized into four engaging sections. Each section illuminates the nuances of grammar teaching and language acquisition. It begins with a theoretical analysis of linguistic categories across diverse languages, progresses through the links between linguistic research and teaching methodologies, and delves into the role of empirical data in classroom applications. The final section focuses on the practical implementation of linguistic categories in language teaching,

promoting a deeper understanding of grammar as a dynamic component of language learning.

Antiquæ Libri - The Archaeology of the Book - ATB-1302 --In this volume Jan Hendrik Hessels takes a critical look at the question "who invented printing with movable type"? While he affirms that Gutenberg was an important printer he does not feel that there was enough evidence to state that he was the inventor. Hessels was also the translator of Van der Linde's volume "The Haarlem legend of the invention of printing by Lourens Janszoon Coster"

In a business world predominantly oriented toward the future, it has paradoxically become ever more common that companies turn towards their pasts. This book empirically explores the phenomenon of organizational remembrance from a holistic cultural perspective. Based on a twelve-month ethnographic case study conducted at the headquarters of the German automobile company, AUDI AG, this study dissects the relationships between memory, identity, and image in a corporate setting. The greater aim in doing so is twofold: First, this study examines exactly why and how a company officially manages its past in terms of 'history' and 'tradition.' And second, this study scrutinizes what effect organizational remembrance has on the workforce - how it impacts their collective identification with a corporate community and influences their understanding of their daily working life. By investigating the interplay between different stakeholder groups, as well as their practices, media, mental models, and other vehicles of remembrance, an integrated account is offered which makes sense of the complex cultural forces at work in the corporate handling of the past, the present, and the future.

This study deals with what is basic in language: meaning, form and their relationship. So far fundamental questions have remained unanswered or obscured by theoretical misconceptions. In the light of a more comprehensive theory some basic questions should be restated and questioned again: Is it possible to use, N, V, NP etc. as universal units of linguistic description (Chomsky)? Is there anything in language corresponding to an independent syntactic component (Chomsky)? It has been asserted that «le signe linguistique est arbitraire» (De Saussure). To what extent may linguistic form be arbitrary? Is it true that the comparison of languages (and their translation) must

be based on extralinguistic reality and not on meaning (Coseriu)? Is meaning unique for every language so that it would be meaningless to speak of general linguistics or a general (universal) grammar (Weisgerber)? Is it true that linguistics, when defining its units, must strike a just balance between notional and formal criteria (Lyons)?

The Emprise of Poetry analyzes the insidious entwining of anti-Americanism and antisemitism in modern and contemporary German culture through the writings of one of its most acclaimed literary figures: Dresden native Durs Grünbein (1962-). Michael Eskin offers an unprecedented view of the American-cum-Jewish discontents at the heart of modern and present-day German culture through the exemplary lens of the work of Durs Grünbein, the most widely translated and globally honored living German poet, and the only one to have been hailed as the Berlin Republic's "most qualified contemporary candidate for the office of German national poet." Yet as Eskin outlines, Grünbein's work contains a paradoxical and tension-filled twofold self-construction: as an idiosyncratically 'American' poet and Ezra Pound's vociferously philosemitic heir, who merely happens to be writing in German, as it were, conjoined with an avidly anti-American German poet who writes emphatically, and not always savorily, as a German and a self-proclaimed heir to the legacies of Celan and Kafka - most notably, on matters American and Jewish. Against the foil of these tensions, Eskin traces and documents postwar German high culture's persisting inability to purge itself of ideological toxins that leach into the mainstream from centuries-old prejudices and antagonisms revolving around Germany's love-hate bond with America as well as its ostensibly enduring suspicion and antipathy toward Jews. Eskin's deep dive into the 'American' Grünbein's apparent philosemitism coupled with the German Grünbein's antisemitically-inflected anti-Americanism reveals the fault lines underlying the complex and contradictory legacies and contexts of postwar German culture.
