Let the inimitable aesthete Viktor Wynd guide you through a subversive celebration of curiosities, art, mess, decay, and self indulgence, passionately arguing that the world is full of wonder that is in danger of being sanitized and that collectors are the ultimate artists. The book visits rarified locations lovingly curated by bohemians and artists: from a rambling Devon farmhouse and its historic taxidermy to an Italianate villa in East London to the House of Dreams Museum. It also includes advice on how to start a collection of your own, covering details on auction houses, private dealers, flea markets and fairs, and shows that having distinctive taste does not necessarily require a massive budget.

A humorous look at what happens when taxidermy goes terribly wrong, by the founder of the hit website crappytaxidermy.com. A relaxed toad enjoying a smoke and a brew. A cat with eerily flexible front legs. A smiling lion with receding gums. Whether you choose to laugh or cringe at these spectacularly bad attempts at taxidermy, you won't be able to tear your eyes away from the curiosities inside. This volume brings together the very best of the worst (along with a DIY "Stuff Your Own Mouse" lesson by an Insect Preparator from the American Museum of Natural History), showcasing the most perverse yet imaginative anatomical reconstructions of the animal kingdom you'll ever see.

The Art of Taxidermy: Enlarged Illustrated Special Edition Hachette UK

After her curiosity is piqued by a safari gone awry, a journalist delves into the curious world of taxidermy and shares her findings. It's easy to dismiss taxidermy as a kitschy or morbid sideline, the realm of trophy fish and jackalopes or an anachronistic throwback to the dusty diorama. Yet theirs is a world of intrepid hunter-explorers, eccentric naturalists, and gifted museum artisans, all devoted to the paradoxical pursuit of creating the illusion of life. Into this subculture of passionate animal-lovers ventures journalist Melissa Milgrom, whose journey stretches from the anachronistic family workshop of the last chief taxidermist for the American Museum of Natural History to the studio where an English sculptor, granddaughter of a surrealist artist, preserves the animals for Damien Hirst's most disturbing artworks. She wanders through Mr. Potter's Museum of Curiosities in the final days of its existence to watch dealers vie for preserved Victorian oddities, and visits the Smithsonian's offsite lab, where taxidermists transform zoo skins into vivacious beasts. She tags along with a Canadian bear trapper and former Roy Orbison impersonator—the three-time World Taxidermy Champion—as he resurrects an extinct Irish elk using DNA studies and Paleolithic cave art for reference; she even ultimately picks up a scalpel and stuffs her own squirrel. Transformed from a curious onlooker to an empathetic participant, Milgrom takes us deep into the world of taxidermy and reveals its uncanny appeal. "Hilarious but respectful." —Washington Post "Engrossing." —New Yorker "[A] delightful debut . . . Milgrom has in *Still Life* opened up a whole

world to readers." —Chicago Tribune "Milgrom's lively account will appeal to readers who enjoyed Mary Roach's quirky science books." —Library Journal

This is the road from climate change to primate change. IF YOU THINK YOU ARE YOU, THINK AGAIN. PRIMATE CHANGE is a wide-ranging, polemical look at how and why the human body has changed since humankind first got up on two feet. Spanning the entirety of human history - from primate to transhuman - Vybar Cregan-Reid's book investigates where we came from, who we are today and how modern technology will change us beyond recognition. In the last two hundred years, humans have made such a tremendous impact on the world that our geological epoch is about to be declared the 'Anthropocene', or the Age of Man. But while we have been busy changing the shape of the world we inhabit, the ways of living that we have been building have, as if under the cover of darkness, been transforming our bodies and altering the expression of our DNA, too. PRIMATE CHANGE beautifully unscrambles the complex architecture of our modern human bodies, built over millions of years and only starting to give up on us now. 'Our bodies are in a shock. Modern living is as bracing to the human body as jumping through a hole in the ice. Our bodies do not know what century they were born into and they are defending and deforming themselves in response'
