La tercera edición de Microbiología y Parasitología Humana contiene información actualizada en las disciplinas correspondientes, mantiene los aspectos didácticos de las ediciones anteriores e incluye nuevos auxiliares pedagógicos. Se encuentra dirigida al lector interesado en conocer las causas de las enfermedades infecciosas y parasitarias producidas por virus, bacterias, hongos, parásitos y artrópodos. Fue escrita para entender la relación huésped-parásito como base de las enfermedades infecciosas y parasitarias. Esta obra está diseñada para facilitar el aprendizaje, por lo que recomendamos al lector que siga la ruta

didáctica acorde con el diseño de texto para lograr esta meta. En la página web www.medicapanamericana.com/romerocabello encontrará elementos complementarios para el estudio y aprendizaje, como son las miles de preguntas con las respuestas a las preguntas de opción múltiple del autor. Y para complementar su aprendizaje también cuenta con una serie de casos clínicos que le servirán como modelos de relación huésped-parásito en las enfermedades infecciosas y parasitarias.

Translation of Murray: Medical Microbiology, 4e (0323012132)

Manual of Clinical Microbiology Springer

Nueva edición de la obra de referencia en la asignatura de Microbiología que en su 9a ed, continúa siendo la "biblia" y el texto más reputado en esta temática. Aborda los principios básicos de la inmunología, la bacteriología, la virología, la parasitología, así como las pruebas diagnósticas de Laboratorio. En esta nueva edición. se ha seguido con la filosofía de intentar reducir al máximo la información, obviando toda aquella que puede ser redundante, de forma que el libro recoge el "core" de la asignatura a la vez que se ha reforzado el alto grado de correlación entre las ciencias básicas y la práctica clínica (incremento del número de casos clínicos). A nivel de contenido, se mantiene el índice, si bien se ha producido una fusión de capítulos y ahora la edición impresa cuenta con 77 capítulos. Todos ellos se han actualizado de acuerdo con los últimos avances, destacando fundamentalmente los temas dedicados a las nuevas técnicas que permiten una rápida identificación de los microorganismos o la nueva información acerca de como funciona la

inmunidad específica frente a los antígenos. El texto incluye acceso a SC.com (todos los contenidos en inglés) en el que se encuentran importantes novedades. En primer lugar, se incorpora un capítulo solo disponible online "Microbial Connections by Body System and Disease" en el que a través de 30 slides se hace una presentación de los diferentes tipos de patógeno en función del órgano o sistema de órganos al que infecten. Así mismo se incluye un banco de 200 preguntas de autoevaluación ("modo estudio" o "modo examen"), 11 videos de procesos inmunológicos step by step y un microscopio virtual.

Studiare la struttura e la funzione dei microrganismi nell'ambito del Corso di laurea in Medicina vuole dire confrontarsi per la prima volta con la causa e le modalità di contagio delle malattie; il Murray è il testo che inserisce batteri, microbi, funghi, parassiti e virus in un contesto clinico agevolando la comprensione dei meccanismi fisiopatologici, grazie anche a un'iconografia assolutamente "smart". La generazione di medici che si sta formando in questa inaspettata situazione emergenziale ha sicuramente molto chiara l'importanza della conoscenza dei meccanismi di base della patogenicità e comprende, come forse mai in precedenza, la necessità di acquisire la capacità di valutare gli aspetti diagnostico-clinici delle analisi batteriologiche, virologiche, micologiche e parassitologiche applicate alle patologie umane.

Upon an invitation from Arab Bureau of Education for the Gulf States "ABEGS"; an International Conference on

Biotechnology and Applied Microbiology was held in Riyadh, Saudi Arabia, 12-15 November 1984. The Conference was sponsored by ABEGS and organized through cooperation with Saudi Biological Society "SBS". ABEGS was established in 1976 with the aim of coordinating, unifying and developing all aspects of Education, Culture and Science in the Gulf States. In the field of publications, ABEGS is publishing various books, pamphlets and two scientific journals, one in Arabic and the other in English entitled: the Arab Gulf Journal of Scientific Research. This volume contains topics presented by the invited speakers and selected papers from among those submitted by participants. Selection was done on basis of some of the invited talks. Main topics of the conference were grouped into sections representing seven themes of Biotechnology and Applied Microbiology: - production of microbial proteins - utilization of microorganisms for the production of chemicals - microbial treatment and utilization of waste - continuous culture - application of biotechnology in plant science - applied microbiology and environment and - applied microbiology and biotechnology: international cooperation - tween developed and developing countries. Some of the topics in this volume present surveys of recent developments in several important areas of biotechnology and applied microbiology, while the remaining papers carry detailed research contributions.

Clinical Microbiology for Diagnostic Laboratory Scientists John Wiley & Sons
Nueva ed. del texto derivado de la obra de referencia, Murray Microbiología médica que responde a la necesidad de disponer de un "core" de conocimientos con la misma calidad y rigor científico que el best seller. El mercado principal lo constituyen los estudiantes de grado de Medicina, aunque es también un texto válido para los estudiantes de farmacia, nutrición, ciencias biomédicas, biomedicina, biotecnología. Se abordan los 4 grandes grupos de patógenos (Bacterias, Virus, Micosis y Parásitos). Cada uno de los bloques se inicia con un breve capítulo introductorio en el que se incluyen pinceladas de: Cuadros para diagnóstico diferencial, clasificación

general de cada uno de los agentes patógenos y un listado de los principales agentes antimicrobianos para combatir las infecciones. La organización del resto de capítulos de cada sección es muy homogénea y se estructura en torno a un patógeno específico. Se incluye un resumen en forma de cuadro de: características principales: propiedades, epidemiología, patología, diagnóstico y tratamiento; ilustraciones para facilitar la comprensión y casos clínicos (aprox 150) para reforzar la correlación clínica. A nivel de contenido, se han actualizado por entero todos los capítulos haciendo especial hincapié en toda la nueva información acerca del Covid-19. Se ha incluido un capítulo nuevo abordando el virus del Papiloma humano y por otro se ha añadido una Sección entera: Sección VI en el que se incluyen 50 casos clínicos desarrollados. Dicha sección se organiza por sistemas y puede considerarse una introducción a las enfermedades infecciosas.
