Part of the European Society of Cardiology series, the ESC Textbook of Cardiovascular Nursing provides in depth learning for nurses specialising in caring for patients with coronary heart disease, heart failure, valvular disease, arrhythmias, congenital heart disease and inherited cardiovascular conditions. The textbook builds on the ESC Core Curriculum for the Continuing Professional Development of Nurses Working in Cardiovascular Care. There are fifteen chapters written by experts in the field. The pathology of coronary heart disease, heart failure, valvular disease, arrhythmias, congenital heart disease and inherited cardiovascular conditions are all discussed in great detail. Whilst tailoring nursing assessment and interventions to the care of patients with heart disease, the textbook emphasises high quality holistic care taking account of the needs of patients with complex comorbidities, as well as their families. The imperative of prevention and rehabilitation in terms of both primary and secondary prevention is described as well as educational, behavioural and therapeutic interventions. The epidemiology of cardiovascular disease is covered including disease burden and inequalities across European regions. Chapters devoted to education and communication and pharmacology are

also included and the book concludes with a chapter which discusses the future challenges and opportunities for nurses in addition to the evolution of nursing in cardiovascular care. The target readership of the textbook are nurses entering cardiovascular specialisation and university students undertaking specialist courses in cardiovascular care. The hope of the editors is that the textbook inspires readers to ask questions, search for answers and become the best cardiovascular nurses they can be. There is a strong body of evidence showing that educational provision for nurses increases patient safety and saves lives, the ESC Textbook of Cardiovascular Nursing aims to be an essential part of this provision.

Saunders Comprehensive Review for the NCLEX-PN® Examination - E-Book John Wiley & Sons

This textbook draws on international contributors with a range of backgrounds to explore, engage with and challenge readers in understanding the many aspects and elements that inform and influence contemporary nursing practice. With a focus to the future, this book explores the challenges facing health services and presents the arguments for a nursing contribution and influence in ensuring safe and quality care. Readers are supported to explore how, as individuals, they can shape their personal nursing identity and practice. The structure of the text is based on the

belief that an individual nurse's professional identity is developed through an interaction between their personal attributes and the influences of the profession itself. Reflecting this approach, the authors engage in a conversation with the reader rather than simply presenting a series of facts and information. Organised around a series of topical and pertinent questions and drawing on perspectives from policy, education and practice, the book explores a diverse range of topics such as: how historical and popular media representations of nursing hold back nursing practice today; the opportunities presented through education and nursing role development to increase the nursing contribution to health services; the economic and political influences on nursing and health care; how the professional regulation of nurses and core values informs your practice; ways to define and develop your own strong nursing identity. Central chapter questions provide ideal triggers for group discussions in class or online and equally as discussion topics between colleagues to support ongoing professional development. There is an emphasis throughout Nurses and Nursing on challenging thinking to recast nursing practice for the future by encouraging the reader to explore and create their emerging nursing identity or re-examine previously long held views. This text supports the reader to better understand health care, nursing and most importantly themselves as nurses. *Brunner and Suddarth's Textbook of Medical-Surgical Nursing* John Wiley & Sons
Produced in cooperation with the National Association of School Nurses, this text includes comprehensive coverage of the multiple facets of school

nursing—from the foundations of practice and the roles and functions of a school nurse through episodic and chronic illness and behavioral issues, to legal issues and leading and managing within school settings. Written and edited by school nurses and pediatric experts, it features real-world-tested, best practices based on evidence and experience. There's content here that you won't find in other books, such as health assessments, individualized health plan development, mental health conditions including adolescent depression, contemporary legal issues, and current policy statements essential to school nursing.
