Experts report on the latest research on extending access to financial services to the 2.5 billion adults around the world who lack it. About 2.5 billion adults, just over half the world's adult population, lack bank accounts. If we are to realize the goal of extending banking and other financial services to this vast "unbanked" population, we need to consider not only such product innovations as microfinance and mobile banking but also issues of data accuracy, impact assessment, risk mitigation, technology adaptation, financial literacy, and local context. In *Banking the World*, experts take up these topics, reporting on new research that will guide both policy makers and scholars in a broader push to extend financial markets. The contributors consider such topics as the complexity of surveying people about their use of financial services; evidence of the impact of financial services on income; the occasional negative effects of financial services on poor

households, including disincentives to work and overindebtedness; and tools for improving access such as nontraditional credit scores, financial incentives for banking, and identification technologies that can dramatically reduce loan default rates.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to

expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex. *The IMF, the World Bank Group and the Question of Human Rights* APH Publishing Highlights the gap between the official rhetoric and the political reality of democratic decentralisation and bottom-up planning using an in-depth study of the metropolitan planning process in Kolkata, India. This book focuses on the dynamic interactions between planners and the operation of the political process that shapes this reality. *WAPDA Annual Report* World Scientific

Aid instruments need to adjust to new challenges and priorities. Global pandemics, climate change, increased inequality, low economic growth, and conflict have made it increasingly difficult for developing countries to achieve the Sustainable Development Goals. *Retooling Development Aid in the 21st Century: The Importance of Budget Support* examines the critical role of budget support by both multilateral and bilateral aid agencies to address the 21st century's development goals of eliminating poverty and protecting our global commons. Timely and smartly designed budget support remains a powerful tool to help address the new reality developing countries face, providing fast disbursing finance in support of critical reforms. Set against the background of a dramatically changing international financial architecture, the volume examines how budget support has evolved from its controversial past, addresses the evidence on performance and debates over conditionality, and it reflects on unmet expectations from the 2005 Paris Declaration. With the global financial crisis, the Covid pandemic, and the spillovers from conflict and climate change, budget support re-emerged as a key financing instrument to support policy reforms and catalyze private capital. Drawing on the lessons of the last two decades, the volume proposes a retooling of budget support as a versatile instrument to address both essential global public goods and tackle country-specific development challenges.

This *Liber Amicorum* is dedicated to an exceptional lawyer who laid many foundations of international finance and development law - Ibrahim F.I. Shihata - in commemoration of his retirement from the World Bank after 15 years of service as Vice-President (later Senior Vice-President) and General Counsel, and Secretary-General of the International Centre for Settlement of Investment Disputes. Ibrahim F.I. Shihata's groundbreaking contributions to the theory and practice of international law arose out of his service in major international finance and development institutions. Among the positions he held prior to his service at the World Bank and ICSID were: Legal Adviser, Kuwait Fund for Arab Economic Development; Executive Director, International Fund for Agricultural Development; Director-General, OPEC Fund for International Development; and Chairman, International Development Law Institute. He shaped these institutions' legal architecture, and advanced these institutions' contribution to development. This *Liber Amicorum* brings together essays of incumbent or former general counsels or heads of the World Bank, the International Finance Corporation, the Multilateral Investment Guarantee Agency, the Inter-American Development Bank, the Inter-American Investment Corporation, the Asian Development Bank, the African Development Bank, the European Bank for Reconstruction and Development, the Islamic Development Bank, the Nordic Investment Bank, the International Fund for Agricultural Development, the OPEC Fund, the Arab Fund for Economic and Social Development, and other international finance and development institutions. Collectively with distinguished academics, jurists, and arbitrators in international tribunals, such as the International Court of Justice, World Trade Organization's Appellate Body, and the International Centre for Settlement of Investment Disputes, well-known practitioners and colleagues of Dr. Shihata at the World Bank's Legal Department, they write about current and emerging issues in international finance and development law. These include issues such as the various institutions' special development assistance profile, the settlement of international investment disputes, foreign investment law, legal and judicial reform, the environment, the rule of law, corruption, accountability of international financial institutions, etc., reflecting the broad spectrum of the part of law to the development of which Ibrahim Shihata contributed tremendously.

Microfinance is known to be one of the best tools to combat poverty, and believed to have a positive effect on environmental awareness. This book analyses the impacts of Islamic microfinance on both poverty alleviation and environmental awareness and the variation in its effects between different geographical conditions, as well as how it compares in these respects with conventional microfinance. Islamic microfinance institutions (MFIs) had a more significant impact on poverty alleviation than conventional MFIs, but a low effect on awareness of specific environmental issues. Islamic MFIs were also successful in combating poverty regardless of regional differences, but similarly ineffective in contributing to environmental awareness.

How is water scarcity becoming a serious problem worldwide—including in the United States? This book provides a broad overview of water, sanitation, and hygiene problems faced by both developing and developed nations around the globe and suggests how these problems can be solved by imaginative and innovative thinking. Human society depends on sufficient clean water. In many parts of the world, however, this most basic commodity is in very short supply. Even in developed, first-world nations, climate change and other factors have begun to create alarming water supply issues. The *Global Water Crisis: A Reference Handbook* provides a detailed overview of this important topic, enabling readers to understand the nature of the world's water, sanitation, and hygiene (WASH) problems and to know what resources are best for conducting their own

research on the topic. The first chapter of the book provides the historical background information pertaining to the world's water and sanitation problems; the second chapter documents the problems, explores the issues, and presents potential solutions for understanding the nature of WASH issues. The other sections provide the needed resources for readers to study the issue of the global water crisis further: perspective essays, primary documents, biographical profiles, data and documents, an extended annotated bibliography, a chronology, and a glossary.

To many, Thomas Carlyle's put-down of economics as "the dismal science" is as fitting now as it was 150 years ago. But Diane Coyle argues that economics today is more soulful than dismal, a more practical and human science than ever before. Building on the popularity of books such as *Freakonomics* that have applied economic thinking to the paradoxes of everyday life, *The Soulful Science* describes the remarkable creative renaissance in how economics is addressing the most fundamental questions--and how it is starting to help solve problems such as poverty and global warming. A lively and entertaining tour of the most exciting new economic thinking about big-picture problems, *The Soulful Science* uncovers the hidden humanization of economics over the past two decades. Coyle shows how better data, increased computing power, and techniques such as game theory have transformed economic theory and practice in recent years, enabling economists to make huge strides in understanding real human behavior. Using insights from psychology, evolution, and complexity, economists are revolutionizing efforts to solve the world's most serious problems by giving policymakers a new and vastly more accurate picture of human society than ever before. They are also building our capacity to understand how what we do today shapes what the world will look like tomorrow. And the consequences of these developments for human life, for governments, and for businesses are only now starting to be realized--in areas such as resource auctions, pollution-credit trading, and monetary policy. *The Soulful Science* tells us how economics got its soul back--and how it just might help save the planet's.

In a modern world with rapidly growing international trade, countries compete less based on the availability of natural resources, geographical advantages, and lower labor costs and more on factors related to firms' ability to enter and compete in new markets. One such factor is the ability to demonstrate the quality and safety of goods and services expected by consumers and confirm compliance with international standards. To assure such compliance, a sound quality infrastructure (QI) ecosystem is essential. Jointly developed by the World Bank Group and the National Metrology Institute of Germany, this guide is designed to help development partners and governments analyze a country's quality infrastructure ecosystems and provide recommendations to design and implement reforms and enhance the capacity of their QI institutions.

As Brazil is massively investing in a scale-up of in vocational education and training (VET) through the national flagship program, PRONATEC, this report assesses institutions and policies in VET taking an in depth critical view of upcoming opportunities. It shares international best practices on selected operational issues identified as strategic bottlenecks for the delivery of technical education. The report explores multiple sources of information including a desk review of existing reports and papers, inputs/data provided by the Ministry of Education and interviews with multiple stakeholders and practitioners at the federal and state level. The report highlights the need of promoting a better alignment between the supply and demand of skills at the sub national level and of promoting better a solid monitoring and evaluation system, including the monitoring of student learning and of the trajectories into the labor market or into higher educational degrees. Issues of student career guidance and teacher quality also emerge as areas of strategic importance to the Brazilian VET system in the years ahead. We conclude with specific policy recommendations for PRONATEC.

The African Union (AU) is a continental organization that comprises every African state except for Morocco, is indeed a pioneering undertaking. Its ambitious aim is to integrate all member states, with the ultimate goal of forming the United States of Africa. Despite several attempts to build a union, the AU has remained an intergovernmental organization, one reason being a perceived unwillingness of the AU states to pool their national sovereignties. This study seeks to comprehend why Africa's integration process has not moved towards a supranational organization, using a novel approach. It shifts the usual perspective away from the organization level and provides the first comprehensive and systematic analysis of the AU from the perspective of the states themselves. It includes 8 comprehensive case studies: Algeria, Burkina Faso, Ethiopia, Mauritius,

South African, Swaziland, Uganda and Zimbabwe to help understand their foreign policy and provide key insights into why they are (un)willing to yield sovereignty. This work will be of great interest to students and scholars of African politics, international relations and international organizations.
