KYLER HOWE

Research in Chemistry Education Routledge

This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University (representing the public sector) and the United States International University (representing the private sector). The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle, Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good

governance, particularly shared governance. Specifically, students, who are major stakeholders in university education, are largely excluded from significant structures of governance thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs (unions, associations and/or councils), their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to lower levels such as the school/faculty and departmental/programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya.

The Status of Student Involvement in University Governance in Kenya Springer Nature

This reissue, first published in 1986, offers a comprehensive treatment of educational development in four countries in West and East Africa: Nigeria, Uganda, Kenya and Tanzania. The author focuses on the role of education in promoting or hindering national development; the way the educational system varies in response to societal and dialectical forces; the place of education in major

theories of change and development; and the contribution made by education to economic, social and political development. Clearly and concisely written, the book will be of interest to teachers, administrators, educational planners and scholars in comparative education and the history of education.

This encyclopedia is the result of a highly selective enterprise that provides a careful selection of key topics in essays written by top scholars in their fields. Comprehensive and in-depth coverage of a limited number of countries, regions and themes is provided. The essays not only feature statistical and factual information but significant interpretation of those facts and figures. The chapters on themes and topics are both analytic and interpretative and deal with the most important topics relevant to higher education everywhere. More than a compendium of facts and figures the encyclopedia.

This collection offers comprehensive insights into pivotal areas of concern regarding developments in Zimbabwe since its independence. By disclosing the intra-elite competition, assessing the performance of Zimbabwe's economy and explaining how the country's natural resources have been managed, we can better understand the ruling ZANU-PF's increasing reliance on the so-called war veterans and the land reform issue for its political survival.

Since independence from Great Britain in 1963, Kenya has survived five decades as a functioning nation-state, holding regular elections; its borders and political system intact and avoiding open war with its neighbours and military rule internally. It has been a favoured site for Western aid, trade, investment and tourism and has remained a close security partner for Western governments. However, Kenya's successive governments have failed to achieve adequate living conditions for most of its citizens; violence, corruption and tribalism have been ever-present, and its politics have failed to transcend its history. The decisions of the early years of independence and the acts of its leaders in the decades since have changed the country's path in unpredictable ways, but key themes of conflicts remain: over land, money, power, economic policy, national autonomy and the distribution of resources between classes and communities. While the country's political institutions have remained stable, the nation has changed, its population increasing nearly five-fold in five decades. But the economic and political elite's struggle for state resources and the exploitation of ethnicity for political purposes still threaten the country's existence. Today, Kenyans are arguing over many of the issues that divided them 50 years ago. The new constitution promulgated in 2010 provides an opportunity for national renewal, but it must confront a heavy legacy of history. This book reveals that history.
