The development of EU enlargement has raised

many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union’s expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and

perception of enlargement from various points of view, focusing on the concerns of stakeholders and the ‘identity’ conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between ‘widening’ and ‘deepening’ and the effect on EU institutional reform; institutional requirements

on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors

involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging Union to continue to 'deliver the goods.' A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote 'an ever closer union of the peoples of Europe,' this

book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States. *Way of Buddhism* m.w. VERLAG GmbH

examines child protection in Stalinist Hungary as a part of twentieth-century East Central, Eastern, and Southeastern European history. Across the communist bloc, the prewar foster care system was increasingly replaced after 1945 by institutionalization in residential homes. This shift was often interpreted as a further attempt to establish totalitarian control. However, this study—based on hundreds of children's case files and interviews with institution leaders,

teachers, and people formerly in state care—provides a new perspective. Rather than being merely a tool of political repression, state care in postwar Hungary was often shaped by the efforts of policy actors and educators to address the myriad of problems engendered by the social and economic transformations that emerged after World War II. This response built on, rather than broke with, earlier models of reform and reformatory education. Yet child

protection went beyond safeguarding and educating children; it also focused on parents, particularly lone mothers, regulating not only their entrance to paid work but also their sexuality. In so doing, children's homes both reinforced and changed existing cultural and social patterns, whether about gendered division of work or the assimilation of minorities. Indeed, a major finding of the book is that state socialist child protection continued a centuries-long national project of

seeking a “solution to the Gypsy question,” rooted in efforts to eliminate the perceived “workshyness” of Roma.

An increasing number of people in the West are seeking an authentic spirituality and becoming fascinated by Buddhism. The Way of Buddhism provides a concise overview of the different forms of Buddhism, its practice and history, and explains: what Buddhism is; how Buddhism evolved; what the different schools of Buddhism are; and what Buddhism can offer us today.

Latin America and the Caribbean constitute the second-most urbanised region in the world, with many cities still growing exponentially. Long-term strategies need to be developed to meet the resulting challenges. How can growing cities be planned without neglecting their urbanity? How can urban spatial growth be managed in tandem with social, environmental, cultural, and economic challenges?

Between 2013 and 2018, the Urban Design Lab worked in over twenty emerging cities in Latin America and the Caribbean. They developed dynamic planning tools that trigger transformative urban processes by engaging and empowering local communities. This handbook not only explains the context and emerging problems faced by the cities of Latin America and the Caribbean, but also proposes solutions for typical difficulties

encountered within those urban conglomerations. 250 colour, 50 b/w images

The value of Plutarch's perception of physical reality and his attitude towards the natural spectacle Plutarch was very interested in the natural world around him, not only in terms of its elementary composition and physical processes, but also with respect to its providential ordering and marvels. His writings teach us a lot about his perception of physical

reality and about his attitude to the natural spectacle. He found his greatest inspiration in the ontological and epistemological framework of Plato's Timaeus, but a wide range of other authors were also of seminal interest to his project. Moreover, the highly literary value of Plutarch's natural philosophical writings should not be underrated. It is therefore not surprising that recently scholars have started to reassess the ancient scientific value of

Plutarch's natural philosophical writings. Natural Spectaculars aims to give further impetus to this dynamic by treating several aspects of Plutarch's natural philosophy which have remained unexplored up to now.

The demise of state Socialisms caused radical social, cultural and economic changes in Eastern Europe. Since then, young people have

been confronted with fundamental disruptions and transformations to their daily environment, while an unsettling, globalized world substantially reshapes local belongings and conventional values. In times of multiple instabilities and uncertainties, this volume argues, young people prefer to try to adjust to given circumstances than to adopt the behaviour of potential rebellious, adolescent role models, dissident counter-cultures or artistic breakings of

taboo. Eastern European Youth Cultures in a Global Context takes this situation as a starting point for an examination of generational change, cultural belongings, political activism and everyday practices of young people in different Eastern European countries from an interdisciplinary perspective. It argues that the conditions of global change not only call for a differentiated evaluation of youth cultures, but also for a revision of our understanding of 'youth'

itself – in Eastern Europe and beyond.

 "This work, firmly rooted in classical Islam, is written by a Muslim schooled in law and philosophy, with an intimate knowledge of the Arab world. That he is also a German diplomat in Morocco and a convert to Islam gives his work unique importance amongst those Europeans who seek to understand Islam on a personal level. In an attempt to build bridges, he tackles all

those difficult issues which have helped to form both the old and the new images of Islam amongst Europeans." "An important and provocative book, it will further our understanding of the true dimensions of a religion so near to us, yet of which we have so little genuine knowledge; a religion which shapes the lives of a billion people, including increasing numbers of Europeans. It is a book which will also further our understanding of the conflicts between our different religious cultures

and perhaps, through greater awareness, find the means to resolve them."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved Do the Media Govern?
