The New Black Sociologists follows in the footsteps of 1974's pioneering text Black Sociologists: Historical and Contemporary Perspectives, by tracing the organization of its forbearer in key thematic ways. This new collection of essays revisit the legacies of significant Black scholars including James E. Blackwell, William Julius Wilson, Joyce Ladner, and Mary Pattillo, but also extends coverage to include overlooked figures like Audre Lorde, Ida B. Wells, James Baldwin and August Wilson - whose lives and work have inspired new generations of Black sociologists on contemporary issues of racial segregation, feminism, religiosity, class, inequality and urban studies.

Building Up a New World Rowman & Littlefield

This book is about the Anatomy of Neoliberalism and Education from a Marxist perspective. It is the

dialectical materialism of neoliberal ideas, examining the material conditions of how these ideas and practices emerged, and under what conditions. Each of these elements is related to the other and can only be properly understood as part and parcel of the whole system of capitalism, which links them together. This book investigates neoliberalism's political, cultural, and financial tools. It goes deep in the forces who have supported neoliberalism and how it became "common sense". It explores the imperialist outcomes and the social devastation it created. It then goes to see how these ideas and policies have been implemented in education. In short, it is the materialist conception of the history of the American empire. It then uses the analytic tools developed through this investigation to re-read the neoliberal educational reforms.

A comprehensive, engaging and timely Bakhtinian examination of the ways in which the music and lyrics of Pacific reggae, aspects of performance, a record album cover and the social and political context construct social commentary, resistance and protest. Framed predominantly by the theory and philosophy of Russian literary theorist Mikhail Bakhtin, this innovative investigation of the

discourse of Pacific reggae in New Zealand produces a multi-faceted analysis of the dialogic relationships that create meaning in this genre of popular music. It focuses on the award-winning EP What's Be Happen? by the band Herbs, which has been recognised for its ground-breaking music and social commentary in the early 1980s. Herbs' songs address the racism and ideology of the apartheid regime in South Africa and the relationship between sport and politics, as well as universally relevant conflicts over race relations, the experiences of migrants, and the historic and ongoing loss of indigenous people's lands. The book demonstrates the striking compatibility between Bakhtin's theorisation of utterances as ethical acts and reggae music, along with the Rastafari philosophy that underpins it, which speaks of resistance to social injustice, of ethical values and the kind of society people seek to achieve. It will appeal to a cross-disciplinary audience of scholars in Bakhtin studies; discourse analysis; popular cultural studies; the literary analysis of popular music and lyrics, and those with an interest in the culture and politics of Aotearoa New Zealand and the Pacific region. A comprehensive, three-volume set that provides detailed background essays, short topical entries, and primary document excerpts to explain the organization, history, and functioning of the U.S. justice system. The U.S. Justice System: An Encyclopedia is a one-stop resource, uniquely structured to include both introductory information as well as more in-depth and detailed resources. "A highly relevant, inclusive collection of voices from the roots of resistance. . . . Empowering words to challenge, confront, and defy."--Kirkus Reviews "This book fights fascism. This books offers hope. We The Resistance is essential reading for those who wish to understand how popular movements built around nonviolence have changed the world and why they retain the power to do so again."--Jonathan Eig, author of *Ali: A Life* "This comprehensive documentary history of non-violent resisters and resistance movements is an inspiring antidote to any movement fatigue or pessimism about the value of protest. It tells us we can learn from the past as we confront the present and hope to shape the future. Read, enjoy and take courage knowing you are never alone in trying to create a more just world. Persevere and persist and win, but know that even losing is worth the fight and teaches lessons for later struggles."--Mary Frances Berry, author of *History Teaches Us to Resist: How Progressive Movements Have Succeeded in Challenging Times* "We the Resistance illustrates the deeply rooted, dynamic, and multicultural history of nonviolent resistance and progressive activism in North America and the United States. With a truly comprehensive collection of primary sources, it becomes clear that dissent has always been a central feature of American political culture and that periods of quiescence and consensus are aberrant rather than the norm. Indeed, the depth and breadth of resistant and discordant voices in this collection is simply outstanding."--Leilah Danielson, author of *American Gandhi: A.J. Muste and the History of American Radicalism in the Twentieth Century* While historical accounts of the United States typically focus on the nation's military past, a rich and vibrant counterpoint remains basically unknown to most Americans. This alternate story of the formation of our nation—and its character—is one in which courageous individuals and movements have wielded the weapons of nonviolence to resist policies and practices they considered to be unjust, unfair, and immoral. We the Resistance gives curious citizens and current resisters unfiltered access to the hearts and

minds—the rational and passionate voices—of their activist predecessors. Beginning with the pre-Revolutionary era and continuing through the present day, readers will directly encounter the voices of protesters sharing instructive stories about their methods (from sit-ins to tree-sitting) and opponents (from Puritans to Wall Street bankers), as well as inspirational stories about their failures (from slave petitions to the fight for the ERA) and successes (from enfranchisement for women to today's reform of police practices). Instruction and inspiration run throughout this captivating reader, generously illustrated with historic graphics and photographs of nonviolent protests throughout U.S. history.

After the end of America's longest (20-year) war in Afghanistan and Iraq that cost more than \$6 trillion and nearly half a million lives, what does the future hold for America and the American people in the 21st century? In this timely and important book, Berch Berberoglu provides an eye-opening account of the history of the American Empire from its inception to the present, with prospects for its future. Examining the worldwide expansion of the American Empire over the course of its turbulent history in great detail, Berberoglu assesses America's imperial legacy in a sober way, highlighting its failure to come to terms with the enormous cost of this adventure in imperial overreach. But Berberoglu sees light at the end of the long, dark tunnel, when the American people will awaken and lead the way to a new America after empire in the coming decades of the 21st century.

A vivid description of the people, events, and issues that forever changed the lives of Native Americans during the 1960s and 1970s—such as the occupation of Alcatraz, fishing-rights conflicts, and individuals such as Clyde Warrior. Rising out of more than a century of poverty and pervasive repression, stoked by the example of the movement against the Vietnam War and the upheaval among black and Chicano civil-rights activists, the American Indian Movement shifted the debate over "the Indian problem" to a new level. Many Native peoples also took a stand for fishing rights, land rights, and formed resistance to coal and uranium mining on tribal land. This work tells the story of that movement, and provides the first encyclopedic treatment of this subject. Providing a vital documentation of a controversial and often surprising period in American Indian history, Bruce E. Johansen, an accomplished scholar and authority on Native American history, provides more than descriptions of historic events and careful analysis; he also frames what occurred in the American Indian Movement personally and anecdotally, drawing from individual stories to illustrate larger trends—and to ensure that the material is appealing to high school students, university-level readers, and general readers alike.

Beyond Power and Resistance Edinburgh University Press

While there is no easy way to define terrorism, it may generally be viewed as a method of violence in which civilians are targeted with the objective of forcing a perceived enemy into submission by creating fear, demoralization, and political friction in the population under attack. At one time a marginal field of study in the social sciences, terrorism is now very much in center stage. The 1970s terrorist attacks by the PLO, the Provisional Irish Republican Army, the Popular Front for the Liberation of Palestine, the Japanese Red Army, the Unabomber, Aum Shinrikyo, Timothy McVeigh, the World Trade Center attacks, the assault on a school in Russia, and suicide bombers have all made the term terrorism an all-too-common part of our vocabulary. This edition of *Political Terrorism* was originally published in the 1980s, well before some of the horrific events noted above. This monumental collection of definitions, conceptual frameworks, paradigmatic formulations, and bibliographic sources is being reissued in paperback now as a resource for the expanding community of researchers on the subject of terrorism. This is a carefully constructed guide to one of the most urgent issues of the world today. When the first edition was originally published, Choice noted, This extremely useful reference tool should be part of any serious social science collection. *Chronicles of Culture* called it a tremendously comprehensive book about a subject that any who have anything to lose—from property to liberty, life to limbs—should be forewarned against.

This collection of essays generates important enquiries into the teaching and practice of anti-racism education, by way of working through conversations, contestations, and emotions as presented by a diverse group of strong women committed to social justice work in their own right. Throughout the collection, contemporary educational issues are situated within personal-political, historical and philosophical conversations, which work to broach the challenges and possibilities for

students, educators, staff, administrators, policy makers, and community members who engage in critical anti-racism education. This work diverges from the existing scholarship by way of bringing new insights to the theoretical possibilities of resistance and futurity as voiced through pedagogues, practitioners and scholars in anti-racism. In this book the authors speak to the importance of anti-racism discursivity in a time when even those who desire to engage this framework struggle to be heard; in a time when there are anti-racism policies in institutions, yet to speak anti-racism philosophy remains dangerous; and in a time when, to speak race and anti-racism, is considered to be stirring up trouble in the face of post-racial discourses.

A riveting investigation into how a restive region of China became the site of a nightmare Orwellian social experiment—the definitive police state—and the global technology giants that made it possible Blocked from facts and truth, under constant surveillance, surrounded by a hostile alien police force: Xinjiang's Uyghur population has become cursed, oppressed, outcast. Everyone is dependent on a government that nonetheless treats them with suspicion and contempt. Welcome to the Perfect Police State. Using the haunting story of one young woman's attempt to escape the vicious technological dystopia, his own reporting from Xinjiang, and extensive firsthand testimony from exiles, Geoffrey Cain reveals the extraordinary intrusiveness and power of the tech surveillance giants and the chilling implications for all our futures.

In this indispensable book, distinguished activist lawyer Francis A. Boyle sounds an impassioned clarion call to citizen action against Bush administration policies, both domestic and international. Especially since the Reagan Administration, hundreds of thousands of Americans have used non-violent civil resistance to protest against elements of U.S. policy that violate basic principles of international law, the United States Constitution, and human rights. Such citizen protests have led to an unprecedented number of arrests and prosecutions by federal, state, and local governments around the country. Boyle, who has spent his career advising and defending civil resisters, explores how international law can be used to question the legality of specific U.S. government foreign and domestic policies. He focuses especially on the aftermath of 9/11 and the implications of the war on Afghanistan, the war on terrorism, the war on Iraq, the doctrine of preventive warfare, and the domestic abridgement of civil rights. Written for concerned citizens, activists, NGOs, civil resisters, their supporters, and their lawyers, *Protesting Power* provides the best legal and constitutional arguments to support and defend civil resistance activities. Including a number of compelling excerpts from his own trial appearances as an expert witness and as counsel, the author offers inspirational and practical advice for protesters who find themselves in court. This invaluable book stands alone as the only guide available on how to use international law, constitutional law, and the laws of war to defend peaceful non-violent protesters against governmental policies that are illegal and criminal.

This book offers several perspectives on the contemporary position of North Korea. It examines, in the context of the post-Cold War order, US, European Union and British foreign policy to North Korea, and North Korean responses. It investigates the tensions that could develop in North Korean state and society as the country faces an increasingly market-oriented capitalist world and identifies the historical, political and ideological foundations of North Korean society and culture. The book is the work of a multidisciplinary team of scholars from Britain and the United States who work in the fields of anthropology, economics, history, international relations, social geography and sociology, most of whom have conducted first-hand research in North Korea. The book also contains contributions from policy-makers who have helped to form western policy towards North Korea.

This collection of writings and images documents the political history of NYC's Lower East Side, describing the lives and struggles of the radicals, artists, and immigrants that populated and politicized one of America's strangest and most beloved neighborhoods. Current and former residents of the neighborhood explore the social, political, and human landscape of one of

America's most storied bohemia. In over fifty chapters, Emma Goldman, Dorothy Day, Christopher Mele, John Macmillan, Jim Feast, Al Orensanz, Allan Antliff, Lynn Stewart, Thomas McEvilly, Frank Morales, and many others cover topics ranging from the early settlement houses and sweatshops to squatters, rioters, artists, activists and organizers. Resistance is jam-packed with fascinating first-person accounts of the battles, triumphs, failures, and lives of a neighborhood that is rapidly being lost to gentrification.

When the Women's March gathered millions just one day after Trump's inauguration, a new era of progressive action was born. Organizing on the far Right led to Trump's election, bringing authoritarianism and the specter of neo-fascism, and intensifying corporate capitalism's growing crises of inequality and injustices. Yet now we see a new universalizing resistance among progressive and left movements for truth, dignity, and a world based on democracy, equality, and sustainability. Derber offers the first comprehensive guide to this new era and an original vision

and strategy for movement success. He convincingly shows how only a new universalizing wave, a progressive and revolutionary "movement of movements," can counter the world-universalizing economic and cultural forces of intensifying corporate and far-right power. Derber explores the crises and eroding legitimacy of the globalized capitalist system and the right wing movements that helped create the Trump era. He shows how left universalizing movements can--and must--converge to propel a mass base that can prevent societal, economic, or ecological collapse, stop a resurgent Right, and build a democratic social alternative. He describes tactics and strategies for this new progressive movement. Brief guest "interludes" by Medea Benjamin, Noam Chomsky, Ralph Nader, Bill Fletcher, Juliet Schor, Gar Alperovitz, Chuck Collins, Matt Nelson, Janet Wallace, and other prominent figures tell how to coalesce and universalize activism into a more powerful movement wave—at local, community, national, and international levels. Vivid and highly accessible, this book is for activists, students, and all citizens concerned about the erosion of justice and democracy. It thoroughly illuminates the rationale, theory, practice, humanism, love, and joy of the social transformation that we urgently need.

This book examines the most popular American television shows of the nineties—a decade at the last gasp of network television's cultural dominance. At a time when American culture seemed increasingly fragmented, television still offered something close to a site of national consensus. The Lonely Nineties focuses on a different set of popular nineties television shows in each chapter and provides an in-depth reading of scenes, characters or episodes that articulate the overarching "ideology" of each series. It ultimately argues that television shows such as Seinfeld, Friends, Law & Order and The Simpsons helped to shape the ways Americans thought about themselves in relation to their friends, families, localities, and nation. It demonstrates how these shows engaged with a variety of problems in American civic life, responded to the social isolation of the age, and occasionally imagined improvements for community in America.
