J.K. Lasser Pro(TM) Before You Plan, Consult J.K.Lasser Innovative Planning That Benefits Professionals and Clients What does it take to be a successful fee-only financial planner? According to John Sestina, acclaimed "father of fee-only financial planning,"

the only special qualifications are a genuine desire to help people, an ability to listen, and a commitment to lifelong learning. Fee-Only Financial Planning introduces financial planners to the newest, fastest-growing niche in the financial planning field-fee for service rather than commission-based planning. Fee-only planning is attractive to the growing number of clients who want to avoid the long-term payments, lack of objectivity, limited choices, or conflict of interest that can occur with a commission-based payment structure. In his comprehensive how-to guide and easy-to-use reference, John Sestina provides in-depth coverage of the financial planning field. He covers such topics as: * The advantages and disadvantages of fee-only planning for both client and planner * Making the transition from commission-based

to fee-based planning * Building a profitable practice with varied client bases * Tailoring to your own work style the system Sestina developed over 35 years of successful private practice *

Developing and maintaining productive client relationships For professionals wondering whether fee-only financial planning is in their future, or for anyone in financial services who wants to stay current, *Fee-Only Financial Planning* is an eye-opening introduction to one of the financial world's freshest, richest entrepreneurial careers.

This volume seeks to re-energise the paradigm of the New International Labour Studies by detailing how struggles over the construction, reproduction, utilisation and restructuring of labour forces are the contested social foundations upon which the global economy stands. Through a combination of theoretical works and a series of case studies, the volume highlights the cutting edge of international labour studies. Its expands on three pivotal areas of study within the discipline: 1) the social construction of new labour forces across an expanding international division of labour; 2) the self-organising potential of workers, particularly within non-traditional sectors; and 3) the possibilities for transborder labour movements to help address the asymmetrical power relationships between globalised capital and localised labour. In addressing these themes, the volume helps explain not only how the contemporary international division of labour is produced and reproduced, but also the strengths and limits to current attempts to overcome its unequal and divisive nature. This book was published as a special issue of *Third World Quarterly*.

Business Communication covers concept of communication, its elements and the various devices and modes of communication such as business correspondence, non-verbal communication, essay writing, speech and Management Information Systems. An important feature of the book is the fact that it deals not only with written communication but also with spoken communication including telephone etiquette and speeches within an organisation. This book is a must for all those who are involved in business or who are aspiring to move up the corporate ladder, It

is a comprehensive guide to communication skills for corporate executives and business professionals. The book will be enormously useful to students of commerce, management, international business and sciences as the authors have taken into consideration the fact that +2 students entering a degree course as well as graduates from science disciplines would not have been introduced to the concepts of communications and the book does that in an effective manner. This book explains the principles of communication and correspondence in simple language and provides models of written communication with explanations, where necessary.

Clear and accessible, this textbook provides a step-by-step guide to textual analysis for beginning translators and translation students. Covering a variety of text types, including business letters, recipes, and museum guides in six languages (Chinese, English, French, German, Russian, and Spanish), this book presents authentic, research-based materials to support translation among any of these languages. *Translating Texts* will provide beginning translators with greater text awareness, a critical skill for professional translators. Including discussions of the key theoretical texts underlying this text-centred approach to translation and sample rubrics for (self) assessment, this coursebook also provides easy instructions for creating additional

corpora for other text types and in other languages. Ideal for both language-neutral and language-specific classroom settings, this is an essential text for undergraduate and graduate-level programs in modern languages and translation.
