introduction from
bestselling author,
Carmel Harrington,

talking about what
Jackie and her books
mean to her! 'Lessons
galore on every page...
about feminism,

love' CARMEL
HARRINGTON 'Jackie
Collins's daring,
unapologetic stroke of
the pen, combined with

her glorious wit, has single-handedly given creative license to new generations of authors and storytellers.'

COLLEEN HOOVER
Dangerous Kiss is a story of raw anger, love, lust, murder and revenge, and at its white-hot center is Lucky Santangelo, a strong, exciting woman who dares to take chances - and always wins. There have been many imitators, but only ever one Jackie Collins. With millions of her books sold around the world, and thirty-one New York Times bestsellers, she is one of the world's top-selling novelists. From glamorous Beverly Hills bedrooms to Hollywood movie studios; from glittering rock concerts to the yachts of billionaires, Jackie chronicled the

scandalous lives of the rich, famous, and infamous from the inside looking out. 'A true inspiration, a trail blazer for women's fiction' JILLY COOPER
'Jackie shows us all what being a strong, successful woman means at any age'
MILLY JOHNSON 'Jackie will never be forgotten, she'll always inspire me to #BeMoreJackie'
JILL MANSELL 'Jackie's heroines don't take off their clothes to please a man, but to please themselves'
CLARE MACKINTOSH 'Legend is a word used too lightly for so many undeserving people, but Jackie is the very definition of the word'
ALEX KHAN 'What Jackie knew how to do so well, is to tell a thumping good story'
ROWAN COLEMAN 'I read hundreds of books

every year. But Jackie Collins' novels are the only ones I can read over and over' AMY ROWLAND 'Jackie wrote with shameless ambition, ruthless passion and pure diamond-dusted sparkle' CATHERINE STEADMAN 'Here is a woman who not only wanted to entertain her readers, but also to teach them something; about the world and about themselves' ISABELLE BROOM 'There's a lot a drag queen can learn from Jackie' TOM RASMUSSEN 'Jackie is the queen of cliff-hangers' SAMANTHA TONGE 'For all her trademark sass, there is a moralist at work here' LOUISE CANDLISH 'Nobody does it quite like Jackie and nobody ever will' SARRA MANNING

'Jackie bought a bit of glitter, sparkle and sunshine into our humdrum existence' VERONICA HENRY 'What radiates from her novels, is a sense that women are capable of great things' ALEXANDRA HEMINSLEY *Handbook of Sports Medicine and Science* Macmillan Sarah Bartlett was an Academy Award-nominated film star, an Emmy-nominated television actress and a Tony-nominated stage performer. She was also awarded her very own Varsity Jacket by the former director of the US Department of Music's Federal Hip Hop Administration. Appearing in over 20 films (including *Hearts of Sorrow*, *Hearts of Celery*; *Perkwit's Secret Bramboráky*)

(the fourth installment of the Blurg movies); and Shadow of the Fish), she also starred on stage in such shows as Howling at the Moon: The Dog Musical; Billiard Balls of Death; and Dreadful About Those Shock Treatments, Eh? The woman was also an accomplished musician who performed guitar and baglama not only with her own group (Zooney's Lampshade) but also with the Hattiesburg Symphony Orchestra and Industrial Pole Bean Outlet; with the Palm Frond and Banana Spider Symphony Orchestra; and with the '56 Elvis Quintet at the Memphis in November: From Too Cool to Too Cold Music, Art and Law Practice Festival). There were other sides to Sarah, sides that she

preferred people not know much about, sides involving Queen Victoria costumes, drinking way too many sodas at one sitting, and that whole ceramic curry serving bowl (from 2400 BCE) incident, which she knew would greatly upset anthropologists all over the world. Here, for the first time, is the entire story of Sarah Bartlett's life, including her children, her husband, her boyfriend, her shoes, her Toyota Cadberry, and her dreams (some of them involving picture frames made of cheese; some of them involving the Poky Little Puppy; some of them involving Gloria Swanson wearing a miniskirt, a pair of orange flip-flops and a T-shirt with a picture of Andy Warhol and the

phrase “Hey, look, I’m a can of soup” on it; some of them involving cats with lobster claws for legs; and some of them involving copious amounts of Ranch Dressing). The book also includes over 150 illustrations, and some of them actually make sense. If you’re looking for a book that offers the best ratio of cost per laugh, look no further. Farther? Farther? Wait, let’s think this through. Uhh, farther has an a in it, and measure has an a in it, so farther relates to distance. So, yeah, further is the right adjective to use. The Seattle Drainpipe Gazette says, “Rigatoni is to books as cat hair is to dogs.” The Farmington Inquirer calls Rigatoni “unobtrusive,” “mildly trapezoidal,” and

“looks great under some flowerpots.” And the Tucson Rock Trader says, “If we crowdfund, we can raise enough money to get this author the serious help he so obviously needs. This isn’t a cry for help, this is a sustained scream through a set of Peavey Dark Matter DM 118 Powered PA Subwoofer Speakers.”

An intimate exploration into the musical genius of fifteen living jazz legends, from the longtime New York Times jazz critic Jazz is conducted almost wordlessly: John Coltrane rarely told his quartet what to do, and Miles Davis famously gave his group only the barest instructions before recording his masterpiece "Kind of Blue." Musicians are often loath to discuss their craft for fear of destroying its

improvisational essence, rendering jazz among the most ephemeral and least transparent of the performing arts. In *The Jazz Ear*, the acclaimed music critic Ben Ratliff sits down with jazz greats to discuss recordings by the musicians who most influenced them. In the process, he skillfully coaxes out a profound understanding of the men and women themselves, the context of their work, and how jazz—from horn blare to drum riff—is created conceptually.

Expanding on his popular interviews for *The New York Times*, Ratliff speaks with Sonny Rollins, Ornette Coleman, Branford Marsalis, Dianne Reeves, Wayne Shorter, Joshua

Redman, and others about the subtle variations in generation, training, and attitude that define their music. Playful and keenly insightful, *The Jazz Ear* is a revelatory exploration of a unique way of making and hearing music.

With a selection of fine historic images from his bestselling book *Historic Photos of Chattanooga*, William F. Hull provides a valuable and revealing historical retrospective on the growth and development of Chattanooga. By the mid nineteenth

century, the city of Chattanooga was a vibrant cultural center of the South. Through the Civil War, Reconstruction, two world wars, and into the modern era, Chattanooga has continued to grow and prosper by overcoming adversity and maintaining the strong, independent culture of its citizens. This volume, *Remembering Chattanooga*, captures this journey through still photography from the finest archives of city, state, and private collections. From the Civil War, to the building of a modern metropolis, *Remembering Chattanooga* follows life, government, education, and events throughout Chattanooga's history. The book captures

unique and rare scenes through the original lens of more than a hundred historic photographs. Published in striking black-and-white, these images communicate historic events and everyday life of several generations of people building a unique and prosperous city.

One of our greatest philosophers and scientists of the mind asks, where does the self come from -- and how our selves can exist in the minds of others. Can thought arise out of matter? Can self, soul, consciousness, "I" arise out of mere matter? If it cannot, then how can you or I be here? I Am a Strange Loop argues that the key to understanding selves and consciousness is the "strange loop"-a special kind of abstract feedback loop inhabiting our brains. The most central and complex symbol in

your brain is the one called "I." The "I" is the nexus in our brain, one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around, rather than the reverse. How can a mysterious abstraction be real-or is our "I" merely a convenient fiction? Does an "I" exert genuine power over the particles in our brain, or is it helplessly pushed around by the laws of physics? These are the mysteries tackled in *I Am a Strange Loop*, Douglas Hofstadter's first book-length journey into philosophy since Gödel, Escher, Bach. Compulsively readable and endlessly thought-provoking, this is a moving and profound inquiry into the nature of mind.

 From a National Book
 Award winner,
 “methodical and clear . . . provides physics-phobics a wide bridge to understanding some often arcane material” (Booklist). Why do we believe in the soul? Does it actually exist? If so, what is it? Does it differ from the self? Does it survive the body after death? In *The Spiritual Universe*, Fred Alan Wolf brings the most modern perspective of quantum physics to the most ancient questions of religion and philosophy. Taking the reader on a fascinating tour of both Western and Eastern thought, Wolf explains the differing view of the soul in the works of Plato, Aristotle, and St.

Thomas, the ancient Egyptian’s belief in the nine forms of the soul, the Qabalistic idea of the soul acting in secret to bring spiritual order to a chaotic universe of matter and energy, and the Buddhist vision of a “nonsoul.” Wolf then mounts a defense of the soul against its modern critics who see it as nothing more than the physical body. “One of the few pathfinders who have discovered the versatility and potency of the new quantum paradigm based on consciousness.” —Amit Goswami, Professor of Physics and author of *The Self-Aware Universe* “The questions are exhilarating and the conclusions are properly mysterious and profoundly

inconclusive . . . you'll love the spirited journey." —Thomas Moore, author of *Care of the Soul* and *The Re-Enchantment of Everyday Life* "Wolf is a new Thales for a new physics of the soul; his book will blow your mind and quicken your spirit." —Michael Grosso, Ph.D., author of *The Millennium Myth* and *Frontiers of the Soul*

This book reveals that scientific logic is an extension of common, everyday logic and that it can and should be understood by everyone. Written by a practicing and successful scientist, it explores why questions arise in science and looks at how questions are tackled, what constitutes a valid answer, and why. The author does not bog the reader down in technical details or lists of facts to memorize. He uses accessible

examples, illustrations, and descriptions to address complex issues. The book should prove enlightening to anyone who has been perplexed by the meaning, relevance, and moral or political implications of science. The Story of Pop Simon and Schuster Winner of the 2015 James Beard Award for Best Beverage Book and the 2015 IACP Jane Grigson Award. A revolutionary approach to making better-looking, better-tasting drinks. In Dave Arnold's world, the shape of an ice cube, the sugars and acids in an apple, and the bubbles in a bottle of champagne are all ingredients to be measured, tested, and tweaked. With Liquid Intelligence, the

creative force at work in Booker & Dax, New York City's high-tech bar, brings readers behind the counter and into the lab. There, Arnold and his collaborators investigate temperature, carbonation, sugar concentration, and acidity in search of ways to enhance classic cocktails and invent new ones that revolutionize your expectations about what a drink can look and taste like. Years of rigorous experimentation and study—botched attempts and inspired solutions—have yielded the recipes and techniques found in these pages. Featuring more than 120 recipes and nearly 450 color photographs, *Liquid Intelligence* begins

with the simple—how ice forms and how to make crystal-clear cubes in your own freezer—and then progresses into advanced techniques like clarifying cloudy lime juice with enzymes, nitro-muddling fresh basil to prevent browning, and infusing vodka with coffee, orange, or peppercorns. Practical tips for preparing drinks by the pitcher, making homemade sodas, and building a specialized bar in your own home are exactly what drink enthusiasts need to know. For devotees seeking the cutting edge, chapters on liquid nitrogen, chitosan/gellan washing, and the applications of a centrifuge expand the boundaries of traditional cocktail

craft. Arnold's book is the beginning of a new method of making drinks, a problem-solving approach grounded in attentive observation and creative techniques. Readers will learn how to extract the sweet flavor of peppers without the spice, why bottling certain drinks beforehand beats shaking them at the bar, and why quinine powder and succinic acid lead to the perfect

gin and tonic. Liquid Intelligence is about satisfying your curiosity and refining your technique, from red-hot pokers to the elegance of an old-fashioned. Whether you're in search of astounding drinks or a one-of-a-kind journey into the next generation of cocktail making, Liquid Intelligence is the ultimate standard—one that no bartender or drink enthusiast should be without.
