 Proceedings of a NATO ASI held in Crete, Greece, September 5-17, 1992.
Encyclopedia of Tribology
 Andrews McMeel Publishing
 Tales from the Time Loop is the most comprehensive book yet written about the global conspiracy that emerges more clearly every day. David Icke has been warning for well over a decade of the plan for a world fascist state, a global version of Nazi Germany, in which the people will be prisoners of a Big Brother dictatorship founded on the suppression of the most fundamental freedoms and total control and surveillance. Today there is a gathering awareness

that he was right. People are realizing that Big Brother is no longer "coming." He's here.

Tales from the Time Loop

David Icke Books
 Computer science textbook, computer programming, knowledge processing (data processing) - evaluation and design of expert systems. Bibliography, glossary, illustrations.
I Think There's a Terrorist in My Soup Addison Wesley Publishing Company
 The multidisciplinary nature of tribology, the conflicting theories and approaches to it found in the literature, plus the fact that definitions of the same phenomenon often differ widely, prompted the authors to compile this work. The aim of this encyclopedia is to provide information on specific tribological terms. The entire field of tribology encompassing lubrication, friction and wear, i.e. the science and technology of

interacting surfaces in relative motion, is covered. An extensive description of the chemical and biological aspects of tribology is given, including a wide range of current references and authors. The reader is also referred to relevant literature for most of the terms listed. The information presented has been made as up-to-date as possible, taking into account both the theoretical and practical nature of the subject. The encyclopedia will be an indispensable reference source in the work of engineers, chemists, physicists, metallurgists, materials and surface scientists, biotechnologists, as well as research workers in these fields.

Morphogenesis in Plants

Random House Disney
 On September 11, 2001, veteran comedian David Brenner was in the midst of a 48-week stand-up gig in Las Vegas. Immediately

after that day, he cancelled the engagement and instructed his manager to book him on a nationwide tour. He called it the "Laughter to the People" tour, and on it he shared his humor with a grieving nation. Audience response was overwhelming. In this

book, Brenner draws on highlights from his stand-up material to show how humor can give us the power to transcend personal and world problems from the unavoidable, like aging, to the uncontrollable, like war. The essays in the

book cover a wide range of issues, including fear of flying, aging, marriage and divorce, pets, politics, terrorism, and religion.
