The complicated and dramatic course of the Civil War in Greece had, for lack of parties interested in reconstructing the truth of its events, never been narrated prior to the appearance of this volume. It closed a gap in the history of our times, and did so with thoroughness and vivid journalistic immediacy. In addition to the known sources and unpublished documents, the author relied on testimony painstakingly collected from survivors of the tragedy who were scattered throughout the world. It remains the authoritative account of the kapetanios, the guerrilla chiefs who organized the partisans in the Greek mountains.

Few pieces of furniture, save perhaps chairs, work as hard as doors. Building them to last, especially exterior doors, takes knowledge and experience that don't come from making other types of furniture, such as tables and bookcases. *Doormaking: Materials, Techniques and Projects for Building Your First Door* by woodworker Strother Purdy gathers all the information and guidance that both beginning and intermediate woodworkers need to be successful making their first door. While covering the construction of the eight most popular doors, *Doormaking: Materials, Techniques and Projects for Building Your First Door* starts first by addressing the fundamentals: the basics of good design and proper construction technique, the pros-and-cons of common materials including wood and sheet goods, interior and exterior finishes, hardware and the fine points of hanging doors. Once those key elements are covered, *Doormaking: Materials, Techniques and Projects for Building Your First Door* offers project chapters that walk the reader step-by-step through the construction of eight essential doors, explaining design and material choices in specific contexts, tool options and other considerations. The first four projects are easily accessible to a beginner while the remaining projects offer up some more challenging details for the intermediate woodworker. This book is a biography of a man named Sydney Smith. He was an English wit, writer, and Anglican cleric. No English writer's opinions on early American literature had more impact than Smith's. He referred to himself as a "sincere friend of America," but this sentiment is both supported and denied by his many publications.

From one of basketball's foremost experts in the field of analytics, a fascinating new perspective on how to watch and think about the game. At its core, the goal of any basketball team is relatively simple: take and make good shots while preventing the opponent from doing the same. But what is a "good" shot? Are all good shots created equally? And how might one identify players who are more or less likely to make and prevent those shots in the first place? The concept of basketball "analytics," for lack of a better term, has been lauded, derided, and misunderstood. The incorporation of more data into NBA decision-making has been credited—or blamed—for everything from the death of the traditional center to the proliferation of three-point shooting to the alleged abandonment of the area of the court known as the midrange. What is beyond doubt is that understanding its methods has never been more important to watching and appreciating the NBA. In *The Midrange Theory*, Seth Partnow, NBA analyst for *The Athletic* and former Director of Basketball Research for the Milwaukee Bucks, explains how numbers have affected the modern NBA game, and how those numbers seek not to "solve" the game of basketball but instead urge us toward thinking about it in new ways. The relative value of Russell Westbrook's triple-doubles Why some players succeed in the playoffs while others don't How NBA teams think about constructing their rosters through the draft and free agency The difficulty in measuring defensive achievement The fallacy of the "quick two" From shot selection to evaluating prospects to considering aesthetics and ethics while analyzing the box scores, Partnow deftly explores where the NBA is now, how it got here, and where it might be going next.

\*\*Named One of the New York Post's Best New Books to Read \*\* *FIRE IN THE STRAW* is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. *Fire in the Straw* is a love story, a confessional, and a beautiful big-hearted memoir.
