MALAKI MCGEE

The Little Buddha Taylor & Francis

This book gives a comprehensive introduction to Comparative Indo-European Linguistics. It starts with a presentation of the languages of the family (from English and the other Germanic languages, the Celtic and Slavic languages, Latin, Greek and Sanskrit through Armenian and Albanian) and a discussion of the culture and origin of the Indo-Europeans, the speakers of the Indo-European proto-language. The reader is introduced into the nature of language change and the methods of reconstruction of older language stages, with many examples (from the Indo-

European languages). A full description is given of the sound changes, which makes it possible to follow the origin of the different Indo-European languages step by step. This is followed by a discussion of the development of all the morphological categories of Proto-Indo-European. The book presents the latest in scholarly insights, like the laryngeal and glottalic theory, the accentuation, the ablaut patterns, and these are systematically integrated into the treatment. The text of this second edition has been corrected and updated by Michiel de Vaan. Sixty-six new exercises enable the student to practice the reconstruction of PIE phonology and morphology.

She Came from Mariupol Prestel Publishing

Troy is familiar to us from the timeless and epic tales of Homer's Iliad and Virgil's Aeneid. These have been retold over the

centuries by writers from Chaucer to Shakespeare to Madeline Miller and Rick Riordan, and enacted by stars such as Elizabeth Taylor and Brad Pitt. But how much do we really know about the city of Troy; its storytellers, myth, actual location or legacy? In this richly illustrated book, the story of Troy is told through a new lens. Published to accompany an exhibition at the British Museum, it introduces the storytellers and Classical artists inspired by the myths of Troy, then examines the tales themselves - from the Judgment of Paris to the return of Odysseus - through the Classical objects for which the museum is internationally known. The third section focuses on Heinrich Schliemann's excavations at Hissarlik, introducing the nineteenth-century search for the location of Troy that convinced the world that this city did once exist. Also explored is the possible Bronze Age background for the myth of the Trojan War, the historicity of which remains unresolved today. The final section delves into the legacy of Troy, and the different ways in which its story has been retold, both in literature and art, from Homer to the present day. Focusing on the major characters - Helen of Troy, Achilles and Hector, Aeneas and Odysseus - it illustrates how artists from Cranach and Rubens to Romare Bearden and Cy Twombly have been inspired by this archetypal tale to reflect on contemporary themes of war and heroism, love and beauty.

Analytical Archaeology Routledge

An up-close-and-personal collection of photographs following Barack and Michelle Obama on their presidential journey. Award-winning photographer Callie Shell presents a firsthand collection of portraits of Barack and Michelle Obama depicting the guiding

principles that defined their time in the White House. While documenting the journey from the Obama's family home in Chicago to the most powerful house in the United States, Shell and the Obamas became fast friends, swapping stories about their families and sharing tips about coping with life on the road. *Hope, Never Fear* features over 100 compelling photographs from behind the scenes, including many previously unpublished, that give viewers a glimpse into the happiness, the stress, the triumphs, the pressures, and everything in between. Each photograph is paired with insightful quotes from Michelle and Barack that reveal their warmth, compassion, and unending commitment to service. In addition, Shell offers an in-depth introduction plus notes drawn from the diaries she kept during her time with the Obamas. Ultimately, it makes for an affecting, profoundly personal insight into an extraordinary couple who energized and empowered millions of people around the world. Praise for *Hope, Never Fear* "[Shell's] photos display the raw emotions and intimate moments the entire family endured during his hard-fought campaign. Shell weaves in insightful quotes from Barack and Michelle that reveal their commitment to fighting for the country and uniting the American people." —Business Insider "[Shell] was able to document the incredible relationship between all members of the Obama family. We see Michelle Obama and their children as they fully support Barack's dreams, while also maintaining their own sense of normalcy. Living in a time when politics has clearly divided the nation, *Hope, Never Fear* is a reminder of a different time filled with the promise of change." —My Modern Met

The Winter Solstice Routledge

Despite being the female patron saint of Ireland and one of the most remarkable women in Irish history, St. Brigid has always been an elusive figure. Some scholars have argued that she never existed as a real person but was merely the Christian personification of the cult of a pagan goddess of the same name. This book reviews all the evidence-history, legend and folklore-and concludes that while she has many of the attributes of the goddess Brigit, she was certainly a real person. The book also reviews her cult and veneration in Ireland and overseas, from her lifetime down to the present day, as attested by place-names, holy wells, and folklore, and also by the large numbers of churches (Roman Catholic and Church of Ireland), schools, and GAA clubs dedicated to her. [Subject: Irish Studies, Irish Saints, Folklore, Myth & Legend, Christianity, History]

The Origin of Our Species Prestel Publishing

An overview of twentieth-century architecture featuring short essays on innovations in design and profiles of architects.

Includes photos, drawings, and building plans.

50 Sculptures You Should Know Penguin UK

One after the other, half a dozen monks are found murdered in the most bizarre of ways. A learned Franciscan who is sent to solve the mysteries finds himself involved in the frightening events.

The Church Year for Children Cambridge University Press

This volume presents an array of the world's greatest sculptures, giving you all the ammunition you need to sound like an expert.

Comparative Indo-European Linguistics Walter de Gruyter GmbH & Co KG

The Neanderthal is among the most mysterious relatives of Homo

sapiens: Was he a dull, club-swinging muscleman, or a being with developed social behaviour and the ability to speak, to plan precisely, and even to develop views on the afterlife? For many, the Neanderthals are an example of primitive humans, but new discoveries suggest that this image needs to be revised. Half a million years ago in Ice Age Europe, there emerged people who managed to cope well with the difficult climate – Neanderthal Man. They formed an organized society, hunted Mammoths, and could make fire. They were able to pass on knowledge; they cared for the old and the handicapped, burying their dead, and placing gifts on their graves. Yet, they became extinct, despite their cultural abilities. This richly illustrated book, written for general audiences, provides a competent look at the history, living conditions, and culture of the Neanderthal.

Neanderthals on the Edge Oxbow Books

This is an authoritative history of the twelve years of the Third Reich from its political takeover of January 30, 1939 to the German capitulation in May 1945.

Geschichte des Klimas powerHouse Books

Lady Thatcher, a unique figure in global politics, shares her views about the dangers and opportunities of the new millennium.

Geopolitics of the Central European Region Random House

In 1998 a conference was held to mark the 150th anniversary of the famous Gibraltar skull. The papers reflect the state of our knowledge about the role played by Gibraltar and the southern Iberian Peninsula in the Middle and Upper Palaeolithic. Contents: Neanderthal landscapes (W Davies, J Stewart & T H van Andel) ; Mediterranean perspective on the Middle/Upper Palaeolithic (O Bar-Yosef) ; Mousterian in Mediterranean France (C C Szmidt) ;

Late Neandertals in the South West of France (J-P Rigaud) ; Châtelperronian chronology and the case for Neanderthal/Modern Human 'acculturation' (P Mellars) ; Final Acheulian to the Middle Palaeolithic in the Iberian Peninsula (F G Pacheco, A Santiago Perez, J Ma Gutierrez Lopez, E Mata Almonte & L Aguilera Rodriguez) ; Middle Palaeolithic technocomplexes and lithic industries in the Northwest Iberian Peninsula (J A Cano Pan, F Giles Pacheco, E Aguirre, A Santiago Perez, F J Garcia Prieto, E Mata Almonte, J Ma Gutierrez & O Prieto Reina) ; Mousterian hearths at Abric Romaní, Catalonia (I Pastó, E Allué & Josep Vallverdú) ; Late Middle Palaeolithic in the Northwest of the Iberian Peninsula (M Vaquero & E Carbonell) ; Middle-Upper Palaeolithic transition in Cantabrian Spain (V Cabrera, A Pike-Tay, M Lloret & F Bernaldo de Quiros) ; Middle-Upper Palaeolithic transition in Portugal (L Raposo) ; Late extinction of Iberian Neanderthals

Ceramics Before Farming John Benjamins Publishing

Bodies intrigue us. They promise windows into the past that other archaeological finds cannot by bringing us literally face to face with history. Yet 'the body' is also highly contested.

Archaeological bodies are studied through two contrasting perspectives that sit on different sides of a disciplinary divide. On one hand lie science-based osteoarchaeological approaches. On the other lie understandings derived from recent developments in social theory that increasingly view the body as a social construction. Through a close examination of disciplinary practice, Joanna Sofaer highlights the tensions and possibilities offered by one particular kind of archaeological body, the human skeleton, with particular regard to the study of gender and age.

Using a range of examples, she argues for reassessment of the role of the skeletal body in archaeological practice, and develops a theoretical framework for bioarchaeology based on the materiality and historicity of human remains.

The Neanderthals Springer Science & Business Media

A general introduction to archeogaming describing the intersection of archaeology and video games and applying archaeological method and theory into understanding game-spaces. "[T]he author's clarity of style makes it accessible to all readers, with or without an archaeological background. Moreover, his personal anecdotes and gameplay experiences with different game titles, from which his ideas often develop, make it very enjoyable reading."—Antiquity Video games exemplify contemporary material objects, resources, and spaces that people use to define their culture. Video games also serve as archaeological sites in the traditional sense as a place, in which evidence of past activity is preserved and has been, or may be, investigated using the discipline of archaeology, and which represents a part of the archaeological record. From the introduction: Archaeogaming, broadly defined, is the archaeology both in and of digital games... As will be described in the following chapters, digital games are archaeological sites, landscapes, and artifacts, and the game-spaces held within those media can also be understood archaeologically as digital built environments containing their own material culture...

Archaeogaming does not limit its study to those video games that are set in the past or that are treated as "historical games," nor does it focus solely on the exploration and analysis of ruins or of other built environments that appear in the world of the game.

Any video game—from Pac-Man to Super Meat Boy—can be studied archaeologically.

Economy and Society in Prehistoric Europe Dorling Kindersley Ltd

A long-overdue advancement in ceramic studies, this volume sheds new light on the adoption and dispersal of pottery by non-agricultural societies of prehistoric Eurasia. Major contributions from Western Europe, Eastern Europe and Asia make this a truly international work that brings together different theories and material for the first time. Researchers and scholars studying the origins and dispersal of pottery, the prehistoric peoples of Eurasia, and flow of ancient technologies will all benefit from this book.

The Business of Words Chronicle Books

This comprehensive A to Z encyclopedia provides extensive coverage of important scientific terms related to improving our understanding of how we evolved. Specifically, the 5,000 entries in this two-volume set cover evidence and methods used to investigate the relationships among the living great apes, evidence about what makes the behavior of modern humans distinctive, and evidence about the evolutionary history of that distinctiveness, as well as information about modern methods used to trace the recent evolutionary history of modern human populations. This text provides a resource for everyone studying the emergence of Homo sapiens. Visit the companion site www.woodhumanevolution.com to browse additional references and updates from this comprehensive encyclopedia.

Handbook of Paleoanthropology Lulu.com

This study was well-established as a pioneer work on archaeological methodology, the theoretical basis of all

archaeological analysis whatever the period or era. The first edition of the book presented and evaluated the radical changes in methodology which derived from developments in other disciplines, such as cybernetics, computer science and geography, during the 1950s and '60s. It argued that archaeology was a coherent discipline with its own methods and procedures and attempted to define the entities (attributes, artefacts, types, assemblages, cultures and culture groups) rigorously and consistently so that they could be applied to archaeological data. The later edition continued the same general theory, which is unparalleled in its scope and depth, adding notes to help understanding of the advances in method and theory to support the student and professional archaeologist. Review of the original publication: "One might venture that this is the most important archaeological work for twenty or thirty years, and it will undoubtedly influence several future generations of archaeologists." The Times Literary Supplement

Icons of Architecture Univ of California Press

In 1971, French jazz critics Philippe Carles and Jean-Louis Comolli cowrote *Free Jazz/Black Power*, a treatise on the racial and political implications of jazz and jazz criticism. It remains a testimony to the long-ignored encounter of radical African American music and French left-wing criticism. Carles and Comolli set out to defend a genre vilified by jazz critics on both sides of the Atlantic by exposing the new sound's ties to African American culture, history, and the political struggle that was raging in the early 1970s. The two offered a political and cultural history of Black presence in the United States to shed more light on the dubious role played by jazz criticism in racial oppression. This

analysis of jazz criticism and its production is astutely self-aware. It critiques the critics, building a work of cultural studies in a time and place where the practice was virtually unknown. The authors reached radical conclusions—free jazz was a revolutionary reaction against white domination, was the musical counterpart to the Black Power movement, and was a musical style that demanded a similar political commitment. The impact of this book is difficult to overstate, as it made readers reconsider their response to African American music. In some cases, it changed the way musicians thought about and played jazz. Free Jazz/Black Power remains indispensable to the study of the relation of American free jazz to European audiences, critics, and artists. This monumental critique caught the spirit of its time and realigned that zeitgeist.

Archaeogaming Univ. Press of Mississippi

Presents facts and folklore about the shortest day of the year, a day that has been filled with magic since ancient times.

Encyclopedia of Indo-European Culture Edinburgh University Press

Defining "culture" is an important step in undertaking archaeological research. Any thorough study of a particular culture first has to determine what that culture contains-- what particular time period, geographic region, and group of people make up that culture. The study of archaeology has many accepted definitions of particular cultures, but recently these accepted definitions have come into question. As archaeologists struggle to define cultures, they also seek to define the components of culture. This volume brings together 21 international case studies to explore the meaning of "culture" for

regions around the globe and periods from the Paleolithic to the Bronze Age and beyond. Taking lessons and overarching themes from these studies, the contributors draw important conclusions about cultural transmission, technology development, and cultural development. The result is a comprehensive model for approaching the study of culture, broken down into regions (Russia, Continental Europe, North America, Britain, and Africa), materials (Lithics, Ceramics, Metals) and time periods. This work will be valuable to all archaeologists and cultural anthropologists, particularly those studying material culture.

Alternative Representations of the Past Springer Science & Business Media

From about 5500 cal BC to soon after 5000 cal BC, the lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime

mobility, health and physical condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and

strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to reflect on cultural change in general.
