If you were to imagine a lala, would you see an unruly looking man looking over his accounts or a well-groomed man in a

three-piece suit? If you saw the former, it is likely because in a country where the majority of small and medium businesses are family-owned, lala is seen as a derogatory term for an unprofessional leader or owner of a business. In *My Journey Through Lala Land*, a memoir of a humble salesman and a marketing genius, BD Nathani dispels the myths associated with traditional family-owned businesses. Whether he worked for a Gujju lala or a Baniya lala, the author describes how most traditional family business owners he worked with built successful businesses strategically. Besides, they also enabled him to launch one of the most well-known international footwear and lifestyle brands in India, including Lotto, New Balance and Hi-Tec. The book also tells the true tale of how the author built and grew Woodland from a small footwear company based in Karol Bagh to an international brand with the help of a visionary family business owner. However, in the beginning, the going was not hunky-dory. The author who always dreamt of travelling the world began by selling a cough syrup. The book, thus, is an excellent read for not only middle rung managers but also

management students who wish to know what makes a brand successful.

From Western Europe to Asia, from the Middle East to the Horn of Africa, societies are finding themselves under growing assault from radical Islamist forces. In some countries, such as Spain and France, the challenge posed by radical Islam is still limited in scope and embryonic in nature. But in others, including Somalia and Pakistan, it poses a mortal danger to the future of the existing state. The World Almanac of Islamism is the first comprehensive reference work to detail the global reach of Islamism across six continents. Each country study, written by leading subject-matter experts, examines the full scope of the Islamist phenomenon, from the activities of radical Islamist groups to the role of Islamist actors and

ideas in society to the response—or complicity—of the local government. An additional series of “movement” studies explores the global reach, ideology, and capabilities of the world’s most powerful transnational Islamist movements. Finally, Almanac includes regional summaries and a global overview designed to provide context and strategic insights into current and emerging trends relating to Islamism the world over. Features of the new edition include: - Three new country studies (Nigeria, Brazil, Tanzania) - Two new movement studies (the Gulen movement and Boko Haram) - Updates to all original chapters - Consolidation of trends/analyses into one “Global Overview”

'Crackles and sparks with life like an exploding box of Diwali fireworks' -William Dalrymple 'One can only envy Monisha Rajesh as she embarks on this epic journey' -Tim Parks When she was a child, Monisha Rajesh's family uprooted to Madras in the hope of making India their home, but soon returned to England with a bitter taste in their mouths. Two decades on, Monisha turns to a map of the Indian Railways and takes a page out of Jules Verne's classic tale, embarking on an adventure around India in 80 trains, covering 40,000km - the circumference of the Earth. Her journey takes her on toy trains, luxury trains, Mumbai's infamous

commuter trains and even a hospital on wheels. Along the way she meets a kaleidoscope of characters and discovers why the railways are considered the lifeline that keeps the country's heart beating. Most of all, she hopes that these 80 train journeys will lift the veil on a country that has become a stranger to her.

Now in its sixth edition, International Management Behavior continues to help students develop the knowledge, perspective, and skills they need in order to conduct global business successfully. The combination of well-chosen, new and classic cases, as well as a completely revised text, provides excellent exposure to real-life management issues and a field-tested framework for understanding cross-cultural dynamics. Elimination of the readings has provided for greater flexibility and customization. For the sixth edition, the structure of the book has been totally revised and the text thoroughly updated to Reflect the authors' recent experiences. Material in the original chapters has been expanded and there are new chapters on managing change in global organizations and one on managing global teams and networks. The concept of the global mindset is used as the integrating theme that establishes a

framework for the book making it applicable at both individual/team and organization levels. This book continues its tradition and orientation about managing people from different cultures and managing global organizations to get effective results. "This is much more than a new edition. It is a huge step forward. The strategy and culture chapters get in much closer to the small, focused details that make such a difference in implementation and that are so difficult to teach. Separating out personal integrity and corporate citizenship allows for a close examination of critical issues that are all too often glossed over. The expanded explanation of the MBI model works well."

This book discusses policy instruments for sustainable infrastructure developments. Railways are one of the most important developmental instruments of a region, province, or country. They play a crucial role in economic development, urban growth, urban mobility, regional susceptibility, market integration, and world trade. Railways are an integral part of regional and urban development, both

in terms of freight and passenger transport. By offering case studies from various regions and cities in South Asia, this book examines the evolution of railway transportation and the impact of these infrastructure projects on regional and urban development. It examines the interactions between evolving infrastructures and competing demands and considers the negative and positive externalities of railway transportation for people, places, and locations. The contributions analyze issues such as network infrastructure planning and technological development, passenger mobility and satisfaction, vulnerability to environmental impacts, and cross-border trade.
