ALEXIS HOGAN

Soil-Structure Interaction, Underground Structures and Retaining Walls

Springer Science & Business Media

Facilitating the development of important processes that yield increased deterrent performance from smaller dosages, this work examines up-to-date and emerging process and chemical technologies used in the formulation of compact powdered detergents. It provides a survey of technological developments

fundamental to powder compaction, such as the replacement of traditional phosphate builders and the introduction of insoluble zeolites as particle process aids.

Broadening the Genetic Base of Crop Production

Franklin Classics

What happens when an innocent prank goes horribly wrong? Natasha, Riya, Anjali and Katherine were best friends in college - each different from the other yet inseparable - until that night. It was the night that began with a bottle of whisky and a game of Ouija but ended with the death of Sania, their unlikeable hostel mate. The friends vowed never

to discuss that fateful night, a pact that had kept their friendship and guilt dormant for the last twenty years. But now, someone has begun to mess with them, threatening to reveal the truth that only Sania knew. Is it a hacker playing on their guilt or has Sania's ghost really returned to avenge her death? As the faceless enemy closes in on them, the friends come together once again to recount what really happened that night. But when the story is retold by each of them, the pieces don't fit.

Because none of them is telling the whole truth . . .

That Night is a dark, twisted tale of friendship and betrayal that draws you in and confounds you at every turn.

Introduction to Organic Laboratory Techniques

Gale Ecco, Print Editions

This reference is an ABC on food irradiation on the one hand and an encyclopedia of food irradiation on the other.

The authors have painstakingly compiled all terminologies related to this technology and have listed items ranging from Aeromonas to Yersinia for microbiological aspects; from Apple to Poultry to Wheat which can benefit from irradiation; vitamins

in food which may be affected by irradiation; regulatory aspects including various methods of detection of irradiated food; consumer acceptance and commercial applications to date, etc. -Paisan Loaharanu, Head, Food Preservation Section, Joint FAO/IAEA Division of Nuclear Techniques in Food and Agriculture, Vienna

Twelve-year-old Siya has been missing for nine months. It's a cold case, but Keshav wants to help his mother, Alia, who refuses to give up. 'My daughter Siya was kidnapped. Nine months ago,' Alia said. The police had given up. They called it a cold case. Even the rest of her family had stopped searching. Alia wouldn't stop looking, though. She wanted to know if I could help her. Hi, I am Keshav Rajpurohit and I am a disappointment to everyone around me. I live with my parents, who keep telling me how I should: a) get married, b) focus on my IPS exams, c) meet more people and d) close my detective agency. But Alia Arora, neighbour and ex-model, wanted my help. And I couldn't take my eyes off her face ... I mean ... her case. Welcome to 400

Days. A mystery and romance story like no other. An unputdownable tale of suspense, human relationships, love, friendship, the crazy world we live in and, above all, a mother's determination to never give up. From India's highest-selling author comes a page-turner that will not only keep you glued to the story but also touch you deeply.

Process and Chemical Engineering Oxford University Press

"Analytical Fracture Mechanics should prove to be a valuable resource to both the new student and the experienced researcher in fracture mechanics. It is recommended." — Applied Mechanics Review
One of the central concerns of engineering is the failure of materials. Addressing this concern, fracture mechanics — an interdisciplinary subject spanning mechanical, civil, and materials engineering, applied mathematics, and physics — predicts the conditions under which such failure will occur due to crack growth. This valuable self-contained text by an expert in the field supplements standard fracture mechanics texts by focusing on analytical

methods for determining crack-tip stress and strain fields. Following a comprehensive 120-page introduction — which provides all the background necessary for understanding the remaining chapters — the book is organized around a series of elastoplastic and hydrogen-assisted crack-tip problems and their solutions. The first chapter presents the only proven solution technique for the second order nonlinear partial differential equation governing a mode I elastoplastic crack problem. Other chapters deal with plastic zone transitions, environmental cracking, and small-scale yielding versus exact linear elastic solutions. One of the excellent features of this book is the clarity with which groups of problems are presented and related to each other. Another is the careful attention it gives to the various modes of fracture (I, II, and III) and to showing the circumstances under which information from a solution for one mode may be used to infer information in another mode. For this edition, the author has added a new appendix, "Stress Across an Elastoplastic Boundary

of a Mode I Crack: Parabolic to Hyperbolic Plasticity Transition." *Food Authentication and Traceability* First Avenue Editions
 Explores the cultural, social, and political aspects of theatrical architecture, from the theatres of ancient Greece of the present. *Morphogenesis in Plant Tissue Cultures* Springer Science & Business Media
 Featuring 66 experiments, detailing 29 techniques, and including several explicating essays, this lab manual covers basic lab techniques, molecular modeling, properties and reactions of organic compounds, the identification of organic substances, project-based experiments, and each step of the various techniques. The authors teach at Western Washington University and North Seattle Community College. Annotation ©2004 Book News, Inc., Portland, OR (booknews.com). *Treatment of cooling water* Springer Science & Business Media
 Introduction and techniques; Introductory history; Laboratory organisation; Media; Aseptic manipulation; Basic aspects; Cell culture; Cellular

totipotency; Somatic embryogenesis; Applications to plant breeding; Haploid production; Triploid production; In vitro pollination and fertilization; Zygotic embryo culture; Somatic hybridisation and cybridisation; Genetic transformation; Somaclonal and gametoclonal variant selection; Application to horticulture and forestry; Production of disease-free plants; clonal propagation; General applications; Industrial applications: secondary metabolite production; Germplasm conservation. **In Vitro Cultivation of Plant Cells** Elsevier
 This book presents more than 435 up-to-date advanced cleaning product formulations for household, industrial and automotive applications. All formulations are completely different from those in other volumes. Shannon Science Publishers
 Food Authenticity and Traceability covers the most recent trends and important topics in food authentication, with an emphasis on the components of a food traceability systems. The book discusses techniques such as omics-

based technologies, chromatographic methods, mass spectrometry, hyperspectral and chemical imaging, molecular and DNA-based techniques, chemometrics and data mining algorithms, high-throughput sequencing, and non-targeted fingerprinting approaches and proteomics. - Includes information on blockchain for food traceability analysis - Discusses consumer preferences and perceptions regarding food traceability drivers and food fraud - Presents approaches of authentication for food of animal origin and omics-based technologies Hotel Housekeeping Elsevier
 The soybean is a crop of global importance and is one of most frequently cultivated crops worldwide. It is rich in oil and protein, used for human and animal consumption as well as for industrial purposes. Soybean plants also play an important role in crop diversification and benefit the growth of other crops, adding nitrogen to the soil during crop rotation. With contributions from eminent researchers from around the world, *The Soybean* provides a

concise coverage of all aspects of this important crop, including genetics and physiology, varietal improvement, production and protection technology, utilization and nutritional value.

Introduction to Plant Tissue Culture Cornell University Press

This text aims to provide the essential knowledge of the core processes involved in the cultivation of plant cells and tissues in vitro thereby enabling readers to understand and contribute to the practical application of these techniques. The text begins by introducing the key terms used in plant tissue culture and provides an overview of the range and objectives of plant tissue culture studies. Subsequent chapters provide knowledge of the processes of the major techniques developed within the framework of the perspectives described in the introductory chapter. The important issues of media formulation and preparation are described together with discussion of the influence of plant growth regulators on the growth and development of plant cell systems in vitro.

Plant Tissue Culture: An Introductory Text CRC Press

Resin craft is a great way to make beautiful items for your home and jewelry for yourself or others. Hazel Oliver is the name behind Badger & Birch, whose eco-friendly practices include using solvent free and non-toxic resin, and incorporating natural waste such as mussel and oyster shells from her local restaurant, as well as natural minerals, gemstones, and crystals. In this her first book, Hazel shows you the basics of resin craft, including mixing and pouring, making molds, and finishing your pieces. The 30 projects include cups, trays, boxes, and other items for the home, as well as molded jewelry pieces in shell shapes and other natural forms. The soft colors, natural elements and beautiful finish of Hazel's work will inspire you to take up this flourishing new craft, or give you new ideas if you are already a keen resin crafter.

Places of Performance Harper Collins

Since the publication of the first edition in 1983, several new and exciting developments have taken place in the field of plant tissue culture, which forms a major component of what is now called plant biotechnology. The revised edition presents updated information on theoretical, practical and applied aspects of plant tissue culture. Each chapter has been thoroughly revised and, as before, is written in lucid language, includes relevant media protocols, and is profusely illustrated with self-explanatory diagrams and original photographs. This book includes three new chapters: "Variant selection", "Genetic Engineering" and "Production of Industrial Compounds" and contains a complete bibliography and a glossary of terms commonly used in tissue culture literature. This updated version proves to be an excellent text for undergraduate, postgraduate students and teachers in various fields of plant sciences and a useful reference book for those interested in the application of any aspect of this aseptic technology.

| <p>Company With construction techniques becoming ever more complex, and population pressure leading to the development of increasingly problematic sites, expertise in the area of soil structure interaction is crucial to architectural and construction industries worldwide. This book contains the proceedings of the ISSMGE Technical Committee 207 International Conference on Geotechnical Engineering - Soil Structure Interaction and Retaining Walls - held in St Petersburg, Russia, in June 2014. The conference was dedicated to the memory of the outstanding geotechnical expert Gregory Porphyryevich Tschebotarioff. Topics covered at the conference included: soil structure</p> | <p>interaction, underground structures and retaining walls, site investigation as a source of input parameters for soil structure interaction, and interaction between structures and frozen soils. The papers included here are the English language papers. Papers presented by the authors in Russian are published by the Georeconstruction Institute of St. Petersburg. <i>Advanced Cleaning Product Formulations, Vol. 4</i> CRC Press Many cooling systems use water as cooling medium. They are found in public buildings, industrial production systems or power plants. Almost every cooling system using water is degraded by deposition, corrosion and microbiological fouling. This book identifies the whole bunch of problems due to water cooling systems and proposes specific</p> | <p>solutions to all of them. The authors have an expertise of over 20 years solving cooling water problems. In this book, they advise all practitioners which need to plan, buy or operate cooling systems. <i>Soil Ecotoxicology</i> CRC Press This book presents a detailed analysis of up-to-date literature on in vitro morphogenesis at cell, tissue, organ, and whole plant levels. Its driving force is the substantial advances made in the field of morphogenesis in tissue cultures during the last 25 years. <u>Environmental Toxicology</u> CICO Books A twelve-year-old Ojibwa Indian living in Minneapolis, Minnesota, learns about her tribe's traditional costumes from her grandmother and gets ready to dance at a powwow.</p> |
