Topics discussed in this collection include financial inclusion in under-served markets, financial inclusion products and services, financial inclusion for sustainable and responsible business, micro, small, and medium-sized business practices.

Cultures of Financialization Routledge

Since the financial crisis of 2007/2008, a renewed discussion on the ethics and finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam. What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

This volume examines racism within the process of criminal justice. In every society criminal justice plays a key role establishing social control and maintaining the hegemony of the dominant economic classes. The contributors to this anthology argue that the differential treatment of people of colour and First Nations peoples is due to systemic racism within all levels of the criminal justice system, which serves these dominant classes. Ideological and cultural changes are preconditions for the success of anti-racist policies and practices within the criminal justice system and within other state institutions. Recommendations for transformations in justice policy and practice are provided.

This book presents contemporary issues in financial reporting of Islamic financial institutions. Two key areas are covered namely, accounting for Islamic financial transactions and shariah governance. The main motivation to publish this book is to share our understanding on the unique nature of Islamic finance industry and the approach to be taken in accounting and reporting of Islamic financial transactions. Also, the book illustrate the importance of shariah governance in ensuring end-to-end shariah compliance. This book is to provide a practical guidance to researchers, industry practitioners and the others stakeholders.

Financial inclusion has been noted as a key driver of poverty alleviation and growth. Yet, most of the scholarly work that exists lacks a comprehensive discussion of how the poor interact with financial services and the channels through which such services can affect their livelihoods. This book offers researchers who focus on financial inclusion and African economies a one-stop resource for understanding the channels of transmission for financial inclusion as well as an application of these channels through original country-specific empirical papers. The book provides a back-to-basics presentation of the transmission of financial services to growth and poverty. This theoretical discussion is complemented by an empirical presentation of the various services used by the poor, with a focus on Africa. Case studies of financial inclusion in six African countries cover a broad range of topics most important to African countries and highlight the unique African setting. These empirical papers provide important learning points. Firstly, hybrid financial institutions such as cooperative financial institutions and financial social entrepreneurs are the best way to increase financial inclusion in Africa. They provide important vehicles to circumvent the restrictive and exclusive bank-based financial markets typical of African economies. Secondly, digital finance is a potent tool for improving financial access and usage in Africa, and its impact on poverty operates through both traditional and nontraditional financial instruments. Thirdly, investment in infrastructure which supports complementary markets is critical and is likely to have a greater effect on credit rationing than direct provision of credit to small businesses.

This report contains the Committee's views on the Ombudsman's report on the prudential regulation of Equitable Life throughout the 1990's until it was forced to close to new business in December 2000. Noting aswell that, now eight years later, the situation remains unresolved. The Committee feels that the Government should, without further delay, accept the Ombudsman's findings of maladministration on the part of the former Department of Trade and Industry, the Government Actuary's Department, and the Financial Services Authority. They support the Ombudsman's recommendation for a full and unreserved apology from those public bodies concerned. There are valid arguments to be had about the means of providing redress, but there is concern that the Government may choose to act as judge on its own behalf by refusing to accept that maladministration took place. This would seriously undermine the Ombudsman's office and the ability to learn lessons from the Equitable Life affair. The Committee also strongly supports the recommendation for a compensation scheme. Where regulators have been shown to fail so thoroughly, compensation should be a duty, not a matter of choice. While the aim should be restore individuals to the position they would have been had the maladministration not occurred, it is essential that the public purse benefits from an appropriate measure of protection. In particular, the emphasis must be on compensating individuals only for that loss that is fairly attributable to regulatory failure. Further, despite the basic presumption that loss must be accurately assessed, the main priority must be prompt resress. Policyholders have already been waiting almost a decade and substantial numbers have either died or are advancing in years. Justice delayed will mean justice

denied to even more people.

"The most important book on government policy that I've read in a long time." —David Leonhardt, New York Times Even as they have become fabulously wealthy, the ultra-rich have seen their taxes collapse to levels last seen in the 1920s. Meanwhile, working-class Americans have been asked to pay more. The Triumph of Injustice presents a forensic investigation into this dramatic transformation, written by two economists who have revolutionized the study of inequality. Blending history and cutting-edge economic analysis, Emmanuel Saez and Gabriel Zucman offer a comprehensive view of America's tax system alongside a visionary, democratic, and practical reinvention of taxes.

In this book, James B. Greenberg and Thomas K. Park take an anthropological approach to the economic history of the past one thousand years and define credit as a potentially transformative force involving inequalities. Traveling through the Mediterranean and Europe, from the medieval period to the modern day, Greenberg and Park reorient financial history and position social capital and ethical thought at its center. They examine the multicultural origins of credit and finance, from banking to credit cards and predatory lending to the collapse of global credit markets in 2007–2008. This book is recommended for scholars of anthropology, history, economics, religion, and sociology. *The Business of American Injustice* Elsevier

American criminal justice is a dysfunctional mess. Cops are too violent, the punishments are too punitive, and the so-called Land of the Free imprisons more people than any other country in the world. Understanding why means focusing on color—not only on black or white (which already has been studied extensively), but also on green. The problem is that nearly everyone involved in criminal justice—including district attorneys, elected judges, the police, voters, and politicians—faces bad incentives. Local towns often would rather send people to prison on someone else's dime than pay for more effective policing themselves. Local police forces can enrich themselves by turning into warrior cops who steal from innocent civilians. Voters have very little incentive to understand the basic facts about crime or how to fix it—and vote accordingly. And politicians have every incentive to cater to voters' worst biases. Injustice for All systematically diagnoses why and where American criminal justice goes wrong, and offers functional proposals for reform. By changing who pays for what, how people are appointed, how people are punished, and which things are criminalized, we can make the US a country which guarantees justice for all. Key Features: Shows how bad incentives, not "bad apples," cause the dysfunction in American criminal justice Focuses not only on overincarceration, but on overcriminalization and other failures of the criminal justice system Provides a philosophical and practical defense of reducing the scope of

what's considered criminal activity Crosses ideological lines, highlighting both the weaknesses and strengths of liberal, conservative, and libertarian agendas Fully integrates tools from philosophy and social science, making this stand out from the many philosophy books on punishment, on the one hand, and the solely empirical studies from sociology and criminal science, on the other Avoids disciplinary jargon, broadening the book's suitability for students and researchers in many different fields and for an interested general readership Offers plausible reforms that realign specific incentives with the public good.

CONTEMPORARY ISSUES IN FINANCIAL REPORTING OF ISLAMIC FINANCIAL INSTITUTIONS (Penerbit UMK) Rowman & Littlefield

This is a book that none of us can afford to ignore – an agenda-setting, campaigning investigation that shows how global finance works for the few and not the many. ** A Financial Times Book of the Year ** 'Essential reading' YANIS VAROUFAKIS We need finance – but when finance grows too big it becomes a curse. The City of London is the single biggest drain on our resources, sucking talent out of every sphere, siphoning wealth and hoovering up government time. Yet to be 'competitive', we're told we must turn a blind eye to money laundering and appease big business with tax cuts. Tracing the curse back through economic history, Nicholas Shaxson uncovers how we got to this point.

Moving from offshore tax havens to the bizarre industry of wealth management, he tells the explosive story of how finance established a stranglehold on society – and reveals how we can begin to break free. 'A radical, urgent and important manifesto for improving our country' Oliver Bullough, Observer 'Superbly written... A must-read' Misha Glenny, author of *McMafia* 'Hard-hitting, well written and informative' Financial Times

"Blood-boiling...with quippy analysis...Taub proposes straightforward fixes and ways everyday people can get involved in taking white-collar criminals to task."—San Francisco Chronicle How ordinary Americans suffer when the rich and powerful use tax dodges or break the law to get richer and more powerful—and how we can stop it. There is an elite crime spree happening in America, and the privileged perps are getting away with it. Selling loose cigarettes on a city sidewalk can lead to a choke-hold arrest, and death, if you are not among the top 1%. But if you're rich and commit mail, wire, or bank fraud, embezzle pension funds, lie in court, obstruct justice, bribe a public official, launder money, or cheat on your taxes, you're likely to get off scot-free (or even win an election). When caught and convicted, such as for bribing their kids' way into college, high-class criminals make brief stops in minimum security "Club Fed" camps. Operate the scam from the executive suite of a giant corporation, and you can prosper with impunity. Consider Wells Fargo & Co. Pressured by management, employees at the bank opened more than three million bank and credit card accounts without customer consent, and charged late fees and penalties to account holders. When CEO John Stumpf resigned in "shame," the board of directors granted him a \$134 million golden parachute. This is not victimless crime. *Big Dirty Money* details the scandalously common and concrete ways that ordinary Americans suffer when the well-heeled use white collar crime to gain and sustain wealth, social status, and political influence. Profiteers caused the mortgage meltdown and the prescription opioid crisis, they've evaded taxes and deprived communities of public funds for education, public health, and infrastructure. Taub goes beyond the headlines (of which there is no shortage) to track how we got here (essentially a post-Enron failure of prosecutorial muscle, the growth of "too big to jail" syndrome, and a developing implicit immunity of the upper class) and pose solutions that can help catch and convict offenders.

Conventional explanations of the nature of money are weighed down by bad ideas and irrelevant historical evidence. The standard theory of finance is hampered by the lack of both sociological and

ethical contextualization, and by sloppy thinking about numbers and time. *Money, Finance, Reality, Morality* addresses those weaknesses with truly novel models of how the economy, money, and finance actually work. The book analyses the perception of money as an economic tool (as compared to a symbolic and sociological object) as a highly functional quantitative token that assigns numerical values to the inherently unmeasurable economic activities of labour and consumption. It looks at finance as an often inferior solution to economic problems and a tool for helping the poor support the rich. And it explains how the tolerance of greed makes the money-finance system the weakest link in modern economies. *Money, Finance, Reality, Morality*, written without jargon or maths, will be of interest to students, teachers and practitioners in economics and finance, government and politics, religion, philosophy, and sociology. Author: Edward Hadas is a Research Fellow at Blackfriars Hall, Oxford University (UK). He was formerly an economics editor and columnist for Reuters Breakingviews. He also worked on the Financial Times' influential Lex column, following 25 years as a financial analyst with firms such as Morgan Stanley and Putnam Investments. WINNER: The HEC Outstanding Research Award 2019 *Understanding Islamic Financial Services* offers fresh insights on the Islamic financial system. The importance of this system cannot be underestimated. Experts expect that it is likely to sustain double digit growth globally over the next few years, and demand for professionals in the area has never been higher, both in the UK and around the world. While other texts on the subject look at the basic concepts, principles, contracts and financial products used in Islamic banking and finance, *Understanding Islamic Financial Services* goes one step further and provides a new context, identifying four levels on which the Islamic Financial system operates: product level, institution level, market level and inter-market level. It considers Islamic banking and finance as a multi-level service system, an approach which will enable students and professionals of Islamic finance to gain a more in-depth, holistic understanding of how the system functions. *Understanding Islamic Financial Services* covers contemporary developments in service science (e.g. service theories, service visualization tools and service co-creation concepts) and implications for the development and sustainability of Islamic financial services. Examples from practice enliven the text and allow the reader to relate the theories and principles discussed to current practice.

The Stability of Islamic Finance main focus is on the question of the sources of financial instability which seems inherent in the conventional system. As a core component of this focus, the book will consider episodes of turbulence and instability in a historical context recalling the occurrence of such events from mid-19th century to the present. It will present various theoretical explanations along with solutions and alternative financial systems that avoid instability provided by various scholars dating back to mid-19th century to present. The book then will present and discuss the architecture of an Islamic financial system and show that at its core, this system shares many characteristics of an stable financial system proposed by Western scholars throughout history to avoid the inherent instability of the present dominant system. Particular emphasis will be placed on the present financial crisis and its causes as well the financial crisis of the 1997 in Southeast Asia, Russia, and Latin America relating these episodes to the fundamental features of the dominant

system. The debt crisis of the low income countries will also be part of this discussion. It will then argue that these crises could be mitigated under an Islamic system or any other system with similar architecture.

Islam encourages business and financial transactions as a way of securing the basic needs for all human beings, but these need to be conducted in accordance with the principles contained in the Qur'ān and Sunnah. However, these legal concepts are not classified subject-wise, and the verses on commercial law, like all other topics, are scattered throughout the Qur'ān, making it difficult for readers to gain a full understanding of the topic. This, therefore, is the first comprehensive book to demystify Islamic contract law and specifically Islamic financial contracts, and to examine its roots and history. The book is written in a clear style to allow for a greater understanding of the more challenging and misunderstood areas pertaining to Islamic business and financial contracts. It also contributes a series of chapters which address the market niche and need, concerning Shariah compliance for Islamic financial products and services. The book is divided into 16 chapters in order to provide a holistic and thorough overview of Islamic law of contract. It covers the objections and misconceptions surrounding Islamic business and financial contracts. It also includes the key features and guiding principles of Islamic law of contract and offers technical know-how, illustrating

the concept of formation of a contract, as well as the essential elements of a valid contract. The authors also offer a discussion on the system of options under Islamic business and financial contracts and potential solutions to breach of contracts. The book will serve as a handy reference for scholars and students of Islamic business and finance and Islamic commercial law and will also be beneficial for practitioners as well as legal and judicial officers. It will open new doors for further research in the field of Islamic financial contracts.

A beautiful commemorative edition of Dr. Martin Luther King's essay "Letter from Birmingham Jail," part of Dr. King's archives published exclusively by HarperCollins. With an afterword by Reginald Dwayne Betts On April 16, 1963, Dr. Martin Luther King Jr., responded to an open letter written and published by eight white clergymen admonishing the civil rights demonstrations happening in Birmingham, Alabama. Dr. King drafted his seminal response on scraps of paper smuggled into jail. King criticizes his detractors for caring more about order than justice, defends nonviolent protests, and argues for the moral responsibility to obey just laws while disobeying unjust ones. "Letter from Birmingham Jail" proclaims a message - confronting any injustice is an acceptable and righteous reason for civil disobedience. This beautifully designed edition presents Dr. King's speech in its entirety, paying tribute to this extraordinary leader and his immeasurable contribution, and inspiring a new generation of activists dedicated to carrying on the fight for justice and equality.
