This book demonstrates how agriculture can play a determining role in integrated, climate-optimised urban development. Agriculture within urban growth centres today is more than an economic or social left-over or a niche practice. It is instead a complex system that offers multiple potentials for interaction with the urban system. Urban open space and agriculture can be linked to a productive green infrastructure – this forms new urban-rural linkages in the urbanizing region and helps shape the city. But in order to do this, agriculture has to be seen as an integral part of the urban fabric and it has to be put on the local agenda. Urban Agriculture for Growing City Regions

takes the example of Casablanca, one of the fastest growing cities in North Africa, to investigate this approach. The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects, design solutions, and multifunctional modules. These synergies assure greater resource efficiency; particularly regarding the use and reuse of water, and they strengthen regional food security and the social integration of multiple spheres. A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production. The book will have a long lasting legacy and is essential reading for researchers, planners, practitioners and policy

makers who are working on urban development and urban agricultural strategies.

Sumerian was the first language to be put into writing (ca. 3200–3100 BCE), and it is the language for which the cuneiform script was originally developed. Even after it was supplanted by Akkadian as the primary spoken language in ancient Mesopotamia, Sumerian continued to be used as a scholarly written language until the end of the first millennium BCE. This volume presents the first comprehensive English-language scholarly lexicon of Sumerian. This dictionary covers all the nuances of meaning for Sumerian terms found in historical inscriptions and literary, administrative, and lexical texts

dating from about 2500 BCE to the first century BCE. The entries are organized by transcription and are accompanied by the transliteration and translation of passages in which the term occurs and, where relevant, a discussion of the word's treatment in other publications. Main entries bring together all the parts of speech and compound forms for the Sumerian term and present each part of speech individually. All possible Akkadian equivalents and variant syllabic renderings are listed for lexical attestations of a word, and a meaningful sample of occurrences is given for literary and economic passages. Entries of homonyms with different orthographies and unrelated words with the same orthography are grouped together, each being assigned a unique

identifier, and the dictionary treats the phoneme /dr/ as a separate consonant. Written by one of the foremost scholars in the field, An Annotated Sumerian Dictionary is an essential reference for Sumerologists and Assyriologists and a practical help to students of ancient cultures.
