Latin for the New Millennium Level 2 Student Workbook Second Edition iUniverse

The Second Edition workbook includes the addition of a new English derivative exercise for each chapter as well as an unadapted Latin reading from the eleventh-century writer Hildegard von Bingen and an adapted Latin reading from the seventeenth-century polymath Anna Maria van Schurman. A contextual essay and black-and-white image with caption accompanies each reading. Student Workbooks supplement the Latin for the New Millennium textbooks with additional exercises and passages designed to reinforce the material presented in each chapter. Special Features • Content questions test students' comprehension of each chapter's Latin reading, background material, and grammar/syntax presentations. • Exercises reinforce the grammar and syntax lessons presented in the Language Facts of the student text. • Translation exercises from Latin to English and from English to Latin improve students'

abilities to read and write Latin. • Student Workbooks expose students to adapted Latin passages not only from authors introduced in the primary text but also from other authors, for example, Sulpicia and Kepler, not presented in the textbook. • Black-and-white illustrations provide visual context for the Latin readings.

American English File Second Edition retains the popular methodology developed by world-renowned authors Christina Latham-Koenig and Clive Oxenden: language + motivation = opportunity. With grammar, vocabulary, and pronunciation practice in every lesson, students are equipped with a solid foundation for successful speaking. Plus - an array of digital resources provides even more choice and flexibility. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

Educational Technology Beyond Content Capstone

A three-level series of grammar reference and practice books for teenage and young adult learners. Active Grammar Level 2 covers all the grammatical points usually taught at B1-B2 (CEF) level. The book presents grammar points in meaningful context through engaging and informative texts, followed by clear explanations. Useful tips highlight common mistakes that intermediate students usually make. Carefully graded exercises provide plenty of challenging practice and encourage students to apply their own ideas creatively to grammar learning. A large number of contrastive revision exercises in the book and on the CD-ROM allow students to assess and monitor their progress. This version without answers and CD-ROM is suitable for classroom use and self-study.

Challenges and Opportunities YOUTH COMPETITION TIMES

This book is the outcome of a research symposium sponsored by the Association for Educational Communications and Technology [AECT]. Consisting of twenty-four chapters, including an introduction and conclusion, it argues that informational content should not be the main element of education, and that to provide more for learners, it is necessary to go beyond content and address other skills and capabilities. It also discusses the false premise that learning is complete when the information is known, not when learners seek more: their own directions, answers, and ideas. The authors assert that the ability to synthesize, solve problems and generate ideas is not based on specific content, although education often focuses solely on teaching content. Further, they state that content can be separated from the learning process and that instructional design and educational technology must be about the skills, habits, and beliefs to be learned.
