Technical Translation Forgotten Books
Evil Paradises, edited by Mike Davis and Daniel Bertrand Monk, is a global guidebook to phantasmagoric but real places—alternate realities being constructed as “utopias” in a capitalist era unfettered by unions and state regulation. These developments—in cities, deserts, and in the middle of the sea—are worlds where consumption and inequality surpass our worst nightmares. Although they read like science fiction, the case studies are shockingly real. In Dubai, where child slavery existed until very recently, a gilded archipelago of private islands known as “The World” is literally being added to the ocean. In Medellín and Kabul, drug lords—in many ways textbook capitalists—are redefining conspicuous

consumption in fortified palaces. In Hong Kong, Cairo, and even the Iranian desert, burgeoning communities of nouveaux riches have taken shelter in fantasy Californias, complete with Mickey Mouse statues, while their maids sleep in rooftop chicken coops. Meanwhile, Ted Turner rides herd over his bison in 2 million acres of private parkland. Davis and Monk have assembled an extraordinary group of urbanists, architects, historians, and visionary thinkers to reflect upon the trajectory of a civilization whose deepest ethos seems to be to consume all the resources of the earth within a single lifetime.

We revisit Lipset’s law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship

between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

'It is terrific. I can't remember the last time I read a book that was more fascinating and useful and enjoyable all at the same time.' Bill Bryson *How Bad Are Bananas?* was a groundbreaking book when first published in 2009, when most of us were hearing the phrase 'carbon footprint' for the first time. Mike Berners-Lee set out to inform us what was important (aviation, heating, swimming pools) and what made very little difference (bananas, naturally packaged, are good!). This new edition

updates all the figures (from data centres to hosting a World Cup) and introduces many areas that have become a regular part of modern life - Twitter, the Cloud, Bitcoin, electric bikes and cars, even space tourism. Berners-Lee runs a considered eye over each area and gives us the figures to manage and reduce our own carbon footprint, as well as to lobby our companies, businesses and government. His findings, presented in clear and even entertaining prose, are often surprising. And they are essential if we are to address climate change.

How Bad Are Bananas? Profile Books Translation Studies has recently been searching for connections with Cultural Studies and Sociology. This volume brings together a range of ways in which the disciplines can be related, particularly with respect to research methodologies. The key aspects covered are the agents behind translation, the social histories revealed by translations, the perceived roles and values of translators in social contexts, the hidden power relations structuring publication contexts, and the need to review basic concepts of the way social and cultural systems work. Special

importance is placed on Community Interpreting as a field of social complexity, the lessons of which can be applied in many other areas. The volume studies translators and interpreters working in a wide range of contexts, ranging from censorship in East Germany to English translations in Gujarat. Major contributions are made by Agnès Whitfield, Daniel Gagnon, Franz Pöchhacker, Michaela Wolf, Pekka Kujamäki and Rita Kothari, with an extensive introduction on methodology by Anthony Pym.

The author of many books on typography, Dan X. Solo was also the proprietor of his own typography shop in Oakland, California — an establishment dedicated to unusual typography and special effects. This comprehensive catalog offers graphic designers a dazzling selection of over 4,000 typefaces and optical effects available from Solotype Typographers. Here, in Solo's words, is "a great cast of characters" — the alphabet — abetted by a cornucopia of typographical ideas and an endless resource of letters, words, phrases, slogans, logos, humorous comments, headlines, and graphic symbols. Individual sections of the book

display a rich variety of typefaces in categories such as Condensed, Victorian, Art Nouveau, Art Deco, Rustic, Thick-and-tin, Calligraphic, Uncials, Latins, and Blackletter. Samples are imaginatively presented. "Stagecoach," for example, is printed in Fargo typeface, evoking dusty trails, rawhide, and ten-gallon hats, while "Sizzling summer savings" appears appropriately in the flamboyant Firebug typeface. All typefaces are indexed for quick and easy reference. As entertaining as it is practical and useful, this impressive treasury of versatile typefaces and optical effects will be indispensable to busy commercial artists as an inexhaustible source of typographic ideas and a "swipe file" of words, phrases, and letters for use in graphic art projects.

Unlike conventional grammars, this guide to Spanish usage, for students with basic knowledge, focuses on areas of vocabulary and grammar causing the most difficulty to English speakers. The new edition has been extensively revised and updated to emphasize Latin-American (particularly Mexican) usage. Significantly expanded

You have a great idea, now what? That first mile—where an innovation moves from an idea on paper to the market—is often plagued by failure. In fact, less than one percent of ideas launched by big companies end up having real impact. The ideas aren't the problem. It's the process. The First Mile focuses on the critical moment when an innovator moves from planning to reality. It is a perilous place where hidden traps snare entrepreneurs and roadblocks slow innovators inside large companies. In this practical and enlightening manual, strategic adviser Scott Anthony equips innovators with new tools, questions, and examples to speed through this crucial early stage of innovation. You'll learn: • How to evaluate your idea's strengths and weaknesses using the "DEFT" process—Document,

Evaluate, Focus, and Test • Fourteen recipes from an "experiment cookbook" to gain confidence in your idea or business • Why "spinouts," "wrong turns," and other challenges commonly trip up innovation—and the practical strategies you can use to avoid them • Why innovators need to seek chaos in an age of constant change—and other essential leadership skills Drawing on his decade of experience as an innovation adviser and investor, Anthony describes hard-won lessons from disruptive start-ups and global giants alike. The First Mile will give you the knowledge and confidence to travel this perilous—but ultimately promising—terrain. The first mile can be a scary place, but you don't have to traverse it alone. This book can help.

Excerpt from Making Floors HE Objection is Often made that floors constructed of any Of these materials are cold to the feet and are, therefore, undesirable. TO this it may be answered that in rooms where people sit, and nec essarily have their feet in contact with the floor for any length Of time, these materials would, under most

circumstances, be thoroughly undesirable, but there are many places in every house where people do not sit and where these materials may be used for floors with perfect propriety and comfort and oftentimes they suit the purpose better than wood. Latin American cities have always been characterized by a strong tension between what is vaguely described as their formal and informal dimensions. However, the terms formal and informal refer not only to the physical aspect of cities but also to their entire socio-political fabric. Informal cities and settlements exceed the structures of order, control and homogeneity that one expects to find in a formal city; therefore the contributors to this volume - from such disciplines as architecture, urban planning, anthropology, urban design, cultural and urban studies and sociology - focus on alternative methods of analysis in order to study the phenomenon of urban informality. This book provides a thorough review of the work that is currently being

carried out by scholars, practitioners and governmental institutions, in and outside Latin America, on the question of informal cities.

Latin American Modern Architectures: Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich and varied architecture. It will also introduce you to major projects that have not been written about in English. A foreword by historian Kenneth Frampton sets the stage for essays on well-known architects, such as Lucio Costa and Félix Candela, which will show you unfamiliar aspects of their work, and for essays on the work of little-known figures, such as Uruguayan architect Carlos Gómez Gavazzo and Peruvian

architect and politician Fernando Belaúnde Terry. Covering urban and territorial histories from the nineteenth and twentieth centuries, along with detailed building analyses, this book is your best source for historical and critical essays on

a sampling of Latin America's diverse architecture, providing much-needed information on key case studies. Contributors include Noemí Adagio, Pedro Ignacio Alonso, Luis Castañeda, Viviana

d'Auria, George F. Flaherty, María González Pendás, Cristina López Uribe, Hugo Mondragón López, Jorge Nudelman Blejwas, Hugo Palmarola Sagredo, Gaia Piccarolo, Claudia Shmidt, Daniel Talesnik, and Paulo Tavares.
