How do you combine colours without them clashing? How do you know which colours will complement each other for a subdued effect, and which will give a more energised feel? This inspirational handbook contains over 200 colour scheme ideas for interior designers and home decorators. Discover how colour can be used to create ambience, or to give the illusion of space, depth, warmth and light. Divided into the major colour groups, each section explores a range of hues, from primary brights to the palest of pastels, presenting failsafe palettes for refreshingly original interior schemes.

Charles Fenno Hoffman Thieme

World-renowned experts share the latest updates in translational research as well as surgical and nonsurgical strategies for treating spinal cord injury Spinal cord injury (SCI) is a devastating,

clinically challenging injury, leading to varying degrees of neurological function impairment and paralysis. Underlying biological mechanisms either inhibit or promote new growth in the spinal cord. Researchers have been making important discoveries about how neurons and their axons grow in the central nervous system and why they fail to regenerate after SCI. Although progress has been steady, there remains an urgent need to address issues in acute management such as early decompression and the use of biologics, as well as potential solutions for regeneration. Written by renowned experts in the ever-evolving field of SCI research and clinical practice, the 7th volume in the AOSpine Masters series is a state-of-the-art compendium on the latest in SCI diagnosis, spine surgery interventions, and long-term management. Each chapter contains pearls from leading spine specialists gleaned from the research laboratory and years of hands-on experience treating SCI patients in the emergency setting and long term. Key Features: Pathobiology, assessment, and diagnostic considerations The use of biomarkers as predictors of functional recovery Surgical and nonsurgical interventions for traumatic SCI The role of neural stem cells and biologics in spinal cord repair Functional and epidural stimulation and brain-

computer interfaces The AOSpine Masters series, a copublication of Thieme and the AOSpine Foundation, addresses current clinical issues featuring international masters sharing their expertise in the core areas in the field. The goal of the series is to contribute to an evolving, dynamic model of evidence-based approach to spine care. This essential textbook delivers invaluable insights to spine surgeons, spinal cord injury clinicians and researchers and trainees, from translational researchers to experienced researchers and clinicians experienced in the operative and non-operative management of spinal cord injury.

Modern Essentials Vintage

Between August 1918 and March 1919 the Spanish influenza spread worldwide, claiming over 25 million lives - more people than perished in the fighting of the First World War. It proved fatal to at least a half-million Americans. Yet, the Spanish flu pandemic is largely forgotten today. In this vivid narrative, Alfred W. Crosby recounts the course of the pandemic during the panic-stricken months of 1918 and 1919, measures its impact on American society, and probes the curious loss of national memory of this cataclysmic event. This 2003 edition includes a preface discussing the

then recent outbreaks of diseases, including the Asian flu and the SARS epidemic.

The Spanish Flu Sounds True

Winner of the German Crime Fiction Award Louise Boni drinks too much. The maverick inspector in Germany's Black Forest police squad is haunted by the mistakes she's made and the people she's lost. While she's dreading the approach of another lonely winter weekend, a call from her supervisor draws her into the most bizarre case of her career. A badly beaten Japanese monk is roaming the snowy Freiburg region with little more than sandals and a begging bowl, and the frightened holy man appears to be fleeing an unseen danger. Now Boni must battle both skeptical police authorities and her personal demons as her investigation reveals a hidden crime ring as well as a spiritual opportunity to transform her life. The first book in the Black Forest Investigation series, Zen and the Art of Murder is "a surprising and genuinely shocking case." — The Sunday Times (U.K.)

For small animal disease information at your fingertips, turn to MANUAL OF SMALL ANIMAL INTERNAL MEDICINE. This stand-alone quick reference covers major assessment, diagnostic, and treatment protocols for common diseases of dogs and cats. Like the parent text, SMALL ANIMAL INTERNAL MEDICINE, the manual logically presents common disorders by body system and has a distinctive approach that enables students and practitioners to make diagnoses based on clinical signs. Page cross-references to the parent text are provided for more detailed discussions, particularly of relevant anatomy, physiology and pathophysiology. It's a valuable tool no student or practitioner should be without. * Focuses on key information related to assessment, diagnosis, and treatment of common medical conditions in dogs and cats. * Includes over 200 tables with key information such as etiology, clinical signs, differential diagnosis, and treatment regimens. * Provides end-of-section drug appendices to highlight common drugs used to treat diseases. * Identifies helpful reading material in the bibliography at the end of book. * Gives page cross-references to parent text to direct the reader to more detailed information on conditions and disorders. Spanish version also available, ISBN: 84-8174-461-1

Steinlen Cats Bailliere Tindall Limited

A compact, wide-ranging, illustrated guide, this handbook deals with all aspects of urolithiasis in dogs, cats, rabbits, and guinea pigs—from aetiology and pathogenesis to diagnosis, treatment, and the prevention of disease recurrence. The authors introduce readers to treatment protocols developed from their own research and experience, and incorporate international state-of-the-art knowledge of the disease. Topics include: epidemiology, risks in companion animal husbandry, species-specific differences, breed dispositions, genetic causes, relevant anatomical points, clinical diagnosis, stone composition, clinical pathology, and treatment protocols.

America's Forgotten Pandemic Elsevier, Urban&Fischer Verlag

273 great 19th-century woodcuts: crimes, miracles, skeletons, ads, portraits, news cuts. Table of contents includes Calaveras; Disasters; National Events; Religion and Miracles; Don Chepito Marihuano; Chapbook Covers; Chapbook Illustrations; and Everyday Life.

The Cat in the Hat Beginner Book Dictionary Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

A focused reference from the world's experts on degenerative cervical conditions This third volume in the AOSpine Masters Series covers the most common operative techniques for treating degenerative cervical conditions. The book provides expert guidance to help clinicians make the right treatment decisions and provide the best care for their patients. Chapter topics range from "Laminectomy and Fusion for Cervical Spondylotic Myelopathy" to "Complications on Anterior

Surgery: VA Injury, Esophageal Perforation, and Dysphagia." Key Features: Synthesizes the best available evidence and consensus expert advice on each operative technique for degenerative cervical conditions, leading to optimal clinical recommendations Editors are internationally recognized authorities on the treatment of degenerative cervical conditions Each chapter includes tips and pearls from leaders in the field The AOSpine Masters Series, a co-publication of Thieme and the AOSpine Foundation, addresses current clinical issues whereby international masters of spine share their expertise and recommendations on a particular topic. The goal of the series is to contribute to an evolving, dynamic model of an evidence-based medicine approach to spine care. All neurosurgeons and orthopedic surgeons, along with residents and fellows in these areas, will find this book to be an excellent guide that they will consult often in their treatment of patients with degenerative cervical conditions.

The premier introduction to essential oils, and how to safely and effectively use them.

Easy Baking Courier Corporation

Linda Collister, the doyenne of baking, brings you a collection of simple but mouthwatering recipes—from flavored breads to chocolate cookies. Beginning with Chocolate Baking, she offers her best ideas for cakes, tarts, cookies, and desserts. Sweet Tarts and Pies—from classics such as Apple and Berry Deep Dish Pie to French suggestions like Creme Brulée Tart—are simply irresistible. Cookies, and Biscotti are easy to bake and taste heavenly; try old-fashioned Ginger Snaps or Maple Syrup Pecan Bars. Flavored Breads has simple recipes to help you bake your own delicious loaves, such as Focaccia with Rosemary and Sea Salt and Easy Cheese Brioche. *With more than 120 easy to follow recipes that give perfect results, "Easy Baking" is ideal for the beginner baker and full of inspiration for the experienced cook. *More than 30,000 copies sold in hardcover. *Linda Collister's name on a baking book guarantees high quality.

Allergic Skin Diseases of Dogs and Cats Thieme

Americans now face a caring deficit: there are simply too many demands on people's time for us to care adequately for our children, elderly people, and ourselves. At the same time, political involvement in the United States is at an all-time low, and although political life should help us to care better, people see caring as unsupported by public life and deem the concerns of politics as remote from their lives. Caring Democracy argues that we need to rethink American democracy, as well as our fundamental values and commitments, from a caring perspective. The idea that production and economic life are the most important political and human concerns ignores the reality that caring, for ourselves and others, should be the highest value that shapes how we view the economy, politics, and institutions such as schools and the family. Care is at the center of our human lives, but Tronto argues it is currently too far removed from the concerns of politics. Caring Democracy traces the reasons for this disconnection and argues for the need to make care, not economics, the central concern of democratic political life. Joan C. Tronto is a Professor in the Political Science Department at the University of Minnesota. She is the author of Moral Boundaries: A Political Argument for an Ethic of Care (Routledge).

Precarious Life New York, Columbia U. P

Atlas of Shiatsu presents clear, detailed descriptions of the twelve main meridians used in Shiatsu practice. The study of the meridians is a difficult aspect of Shiatsu training and this highly-illustrated atlas explains and illustrates their positions within the body. The description of each meridian is supported by 15-30 illustrations. Clear and detailed descriptions of each of the twelve main meridians used in Shiatsu practice Highly illustrated, with 15-30 illustrations supporting the description of each meridian Attractively designed The first atlas of shiatsu

Accept no substitutes! America's oldest continuously published periodical and best-loved annual is often imitated but never equaled. This is the one, the only, Old Farmer's Almanac! Featuring: • An astronomy quiz to test your Sky-Q • Anglers' six favorite fish and secrets to hooking them • Vegetables and other perennial edibles to grow • The time in our lives: where it goes, ways to make the most of it, and more • The whole truth about whole grains • How to get bitten by a pet (if you're not careful) • Rings around Earth (think Saturn) that might influence our weather • Health

tips for each zodiac sign • Envelope and napkin jottings that changed the world • Plus: Moon phases and other celestial sightings, tides, historic trivia, gardening tables, best days, and too much more to mention! • Full-color winter and summer weather maps

Manual of Small Animal Internal Medicine Random House Books for Young Readers

Examination and Treatment Methods in Dogs and Cats 2nd Edition is an essential pocket-sized reference for the busy veterinary practitioner. The book is organized in a quick look-up format with step-by-step diagrams and punchy, concise text, ideal for any clinical environment. Each entry covers a standard procedure that is carried out in everyday small animal practice – whether that is restraining patients, taking a blood or tissue sample, performing an endoscopy, taking an X-ray, or carrying out a biopsy – and provides a step-by-step pictorial guide on how to do so, accompanied by easy to read text – ideal for quick access before a procedure or during a consult. The contents are organized by body system, and include examination methods in: cardiology, respiratory medicine, gastrointestinal medicine, urology, gynaecology, andrology, orthopedics, neurology, ophthalmology, otology and dermatology. The book also includes extensive sections on giving injections, catheter use, transfusions, inhalation techniques, parenteral nutrition, drainage, flushes and bandaging. Covering a vast array of standard veterinary procedures, this is an ideal support guide from an established veterinarian, with extensive experience in veterinary practice. It is also an invaluable resource for the veterinary practitioner and veterinary student. This is the English translation of the German work Untersuchungsund Behandlungsmethoden bei Hund und Katze 2 Auflage which was published by Schattauer 2014. © 5m Books

Science, Medicine and Culture NYU Press

"The Essential Asian Cookbook" assembles recipes from every East Asian country, from Pakistan to Japan, into one complete volume. With an accessible pictorial glossary of Asian ingredients, the book demystifies Asian cooking and shows just how simple and fun it can be. Color photos.

The Colour Scheme Sourcebook [Minneapolis] : Walker Art Center and Minneapolis Institute of Arts The textbook 'Parasitology in Veterinary Medicine' is based on 'Lehrbuch der Parasitologie für die Tiermedizin' (3rd ed.), published in 2013 by Enke, Germany. Wageningen Academic Publishers presents a revised edition in English, suited both for basic and advanced studies and as reference book for the veterinary practice. Although focused on the European situation, the book also deals with important parasitic diseases occurring in other regions. The main part is organized by parasite groups (protozoa, helminths, arthropoda, etc.). It provides information on the parasites' biology, epidemiology, immunology, pathogenesis, clinical signs, diagnosis, therapy and control.

Summaries allow for a quick overview. Another part is arranged according to animal species (cattle, sheep and goats, pigs, horses, dogs and cats, rabbits, poultry, bees). It contains tables listing the parasites of the organ systems and showing antiparasitic drugs. Furthermore, practical instructions on the control of parasitic diseases are given. Further chapters deal with general parasitology, zoonoses, parasites in food, diagnostic procedures, and essentials of therapy and control of parasitoses. A detailed glossary with etymological notes is intended for a better understanding of parasitological terms. The book contains numerous tables and is illustrated with 421 figures, including many instructive drawings of parasite life cycles.

Aromatherapie in Wissenschaft und Praxis Hutchinson Radius

The 1918 Spanish flu epidemic is now widely recognized as the most devastating disease outbreak in recorded history. This cultural history reconstructs Spaniards' experience of the flu and traces the emergence of various competing narratives that arose in response to bacteriology's failure to explain and contain the disease's spread.

The Complete Incense Book Konemann

Constructive Realism, an increasingly discussed philosophy of science founded by the Viennese philosopher of science Fritz G. Wallner, is the core issue of the texts gathered in this volume. The authors either discuss the constructive-realistic view philosophically or present their research interpreted by the constructive-realistic doctrine. Constructive Realism inspires philosophy as well as natural science and humanities. This volume proves this inspiring feature of Constructive Realism. All texts are written by colleagues, friends and scholars of Fritz G. Wallner to honour his 60th birthday.
