In *Art and Representation*, John Willats presents a radically new theory of pictures. To do this, he has developed a precise vocabulary for describing the representational systems in pictures: the ways in which artists, engineers, photographers, mapmakers, and children represent objects. His approach is derived from recent research in visual perception and artificial intelligence, and Willats begins by clarifying the key distinction between the marks in a picture and the features of the scene that these marks represent. The methods he uses are thus closer to

those of a modern structural linguist or psycholinguist than to those of an art historian. Using over 150 illustrations, Willats analyzes the representational systems in pictures by artists from a wide variety of periods and cultures. He then relates these systems to the mental processes of picture production, and, displaying an impressive grasp of more than one scholarly discipline, shows how the Greek vase painters, Chinese painters, Giotto, icon painters, Picasso, Paul Klee, and David Hockney have put these systems to work. But this book is not only about what systems artists use but also about why artists from different periods and cultures have used such different systems, and why drawings by young children look so different from those by adults. Willats argues that the representational systems can serve many different functions beyond that of merely providing a convincing illusion. These include the use of anomalous pictorial devices such as inverted perspective, which may be used for expressive reasons or to distance the viewer from the depicted scene by drawing attention to the picture as a painted surface. Willats concludes that art historical changes, and the developmental changes in children's drawings, are not merely arbitrary, nor are they driven by evolutionary forces. Rather, they are determined by the different functions that the representational systems in pictures can serve. Like readers of Ernst Gombrich's famous *Art and Illusion* (still available from Princeton University Press), on which *Art and Representation* makes important theoretical advances, or Rudolf Arnheim's *Art and Visual Perception*, Willats's readers will find that they will never again return to their old ways of looking at pictures.

Parabole e novelle Usborne Books

Shortlisted for the International Booker Prize 2022 From the bestselling author of *Breasts and Eggs* and international literary

sensation Mieko Kawakami comes a sharp and illuminating novel about a fourteen-year-old boy subjected to relentless bullying. In *Heaven*, a fourteen-year-old boy is tormented for having a lazy eye. Instead of resisting, he chooses to suffer in silence. The only person who understands what he is going through is a female classmate, Kojima, who experiences similar treatment at the hands of her bullies. Providing each other with immeasurable consolation at a time in their lives when they need it most, the two young friends grow closer than ever. But what, ultimately, is the nature of a friendship when your shared bond is terror? Unflinching yet tender, sharply observed, intimate and multi-layered, this simple yet profound novel stands as yet another dazzling testament to Mieko Kawakami's uncontainable talent. There can be little doubt that it has cemented her reputation as one of the most important young authors at work today. *TIME's* 100 Must-Read Books of 2021. 'Mieko Kawakami is a genius' - Naoise Dolan, author of *Exciting Times* 'An expertly told, deeply unsettling tale of adolescent violence' - *Vogue* Translated from the Japanese by Sam Bett and David Boyd.

Quilter's Patch Franklin Watts

The Book of the Virgins, published here in its first English translation, is one of Gabriele D'Annunzio's very first collections. Remarkable for its descriptive powers, it is a compelling account of self-knowledge and coming-of-age. Recovering from a near-fatal illness, a young woman resolves to experience for herself all that life has to offer. Spurning her old saintly ways, she sets out to explore the beauty and energy in everything around her. But as she senses the first stirrings of passion, so too comes tragedy, and with it, the realization that to truly live, she must embrace life in all its brutality. Poet, dramatist, novelist, and one of the most popular and controversial Italian writers of the 20th century, Gabriele D'Annunzio represented the very height of decadence in Italy.

A unique program for understanding and communicating effectively with your baby from infant expert Tracy Hogg. The combination of interactive self-questioning and expert, friendly advice will change how you approach parenting, leading to transformative results. 'Miracles are her business' -- Jodie Foster 'The honest truth is that Tracy Hogg has provided me with more insight into the things that matter than anyone else' -- Observer Review 'She achieves what, to hard-pressed parents, seem like miracles' -- Mail on Sunday '...in a different league than all other 'how to manage as a parent' books' -- Daily Mail 'A book that changed our lives' -- ***** Reader review 'This book is amazing' -- ***** Reader review 'Great book, full of easy tips and tricks for new parents. I would highly recommend it!!!!' -- ***** Reader review 'The BEST baby advice book, EVER!!!' -- ***** Reader review 'A God Send!' -- ***** Reader review

Tracy Hogg knows babies. She can calm even the most distressed or difficult infant, because she understands their language. Hence, her clients call her 'The Baby Whisperer'. In this remarkable parenting book, Tracy demystifies the magic she has performed with some five thousand babies. She teaches parents how to work out what kind of baby they have, what kind of mother or father they are, and what kind of parenting plan will work best for them. Believing that babies need to become part of the family - rather than dominate it - she has developed a practical programme that works with infants as young as a day old. Full of questionnaires, clearly explained theories and easy-to-follow, practical, expert advice - this book is guaranteed to set

you on the path to calm and confident parenting.

How Did I Begin?

This book presents real-world decision support systems, i.e., systems that have been running for some time and as such have been tested in real environments and complex situations; the cases are from various application domains and highlight the best practices in each stage of the system's life cycle, from the initial requirements analysis and design phases to the final stages of the project. Each chapter provides decision-makers with recommendations and insights into lessons learned so that failures can be avoided and successes repeated. For this reason unsuccessful cases, which at some point of their life cycle were deemed as failures for one reason or another, are also included. All decision support systems are presented in a constructive, coherent and deductive manner to enhance the learning effect. It complements the many works that focus on theoretical aspects or individual module design and development by offering 'good' and 'bad' practices when developing and using decision support systems. Combining high-quality research with real-world implementations, it is of interest to researchers and professionals in industry alike.
