BRIGGS STEWART

World Faiths Insight Oxford University Press, USA

"In this book, we examine the past and present research and theory on the motivations (the why), the situations and contexts (the when), the individual difference variables and traits (the who), and the affective and cognitive processes (the how) that lead to stereotyping and prejudice. The intent is to provide an in-depth and broad-ranging analysis of stereotyping and prejudice. The text focuses on understanding the issues, theories, and important empirical experiments that bear upon each problem in stereotyping and prejudice and to

understand the most up-to-date research, theories, and conclusions of the leading researchers in the field. Stereotyping and prejudice are indeed complex in their origin, and one of the main goals of this book is to provide a coherent picture of the conditions under which stereotyping and prejudice are more (or less) likely to occur. Another primary focus is to examine whether (and how) stereotyping and prejudice can be reduced or eliminated"--
Problems As Possibilities Wipf and Stock Publishers

The Student's Book and Workbook are bound together for ease-of-use. There is a structured approach to skills with reading, writing, listening and speaking skills development integrated within each unit. Clear grammar-reference and extra practice material are at the end of each unit (Levels 1-4) and Student Book section

(Levels 5 & 6).

Index Medicus A&C Black

This book presents an evidence-based framework for understanding the literacy needs of adolescents. The premise is that educators and other critical stakeholders need to understand evidence-based principles in order to develop effective curriculum to meet the needs of diverse learners. Recommendations are provided for middle and secondary education, professional development, teacher education research and policy. At the center of the book are Eight Guiding Principles developed by the authors through a process that included an extensive review of research and policy literature in literacy and related fields, a comparison of National Standards documents, and visits to the classrooms of 28 middle and high school teachers across

the United States. The Principles are broad enough to encompass a variety of contexts and student needs, yet specific enough to offer real support to those involved in program development or policy decisions. They provide an overarching structure that districts and teachers can use to develop site-specific curriculum that is both research-based and designed to meet the needs of the learners for whom they are responsible. Important Text Features: Organized to help readers understand empirically supported principles of practice that can be used to address literacy concerns in today's schools, each chapter that addresses one of the eight Principles follows a similar format: * The Principle is presented along with a brief explanation of the research base and a sample of national standards that support it. * One or more case examples spanning a wide variety of disciplines, grade levels, and local conditions - provide an in-depth look at the Principle in action. * A well-known adolescent literacy expert offers a response to each case example, giving readers an informed view of the importance of the Principle, how it is enacted in the cases, and examples of other work related to the Principle. Discussion questions are provided that can be used for individual reflection or group discussion. Principled Practices for Adolescent Literacy is intended as a text for pre-service and in-service upper-elementary, middle and high school literacy methods courses and graduate courses related to adolescent literacy, and as a resource for school district personnel, policymakers and parents.

Psychology of Prejudice Peeters Publishers

Cattle have been the mainstay of Irish farming since the Neolithic began in Ireland almost 6000 years ago. Cattle, and especially cows, have been important in the life experiences of most Irish people, directly and/or through legends such as the Táin Bó Cuailnge (The Cattle-raid of Cooley). In this book, diverse aspects of cattle in Ireland, from the circumstances of their first introduction to recent and ongoing developments in the management of grasslands - still the main food-source for cattle in Ireland - are explored in thirteen essays written by experts. New information is presented, and several aspects relating to cattle husbandry and the interactions of cattle and people that have hitherto received little or no attention are discussed.

Sources of Holocaust Insight maps the

odyssey of an American Christian philosopher who has studied, written, and taught about the Holocaust for more than fifty years. What findings result from John Roth's journey; what moods pervade it? How have events and experiences, scholars and students, texts and testimonies--especially the questions they raise--affected Roth's Holocaust studies and guided his efforts to heed the biblical proverb: "Whatever else you get, get insight"? More sources than Roth can acknowledge have informed his encounters with the Holocaust. But particular persons--among them Elie Wiesel, Raul Hilberg, Primo Levi, and Albert Camus--loom especially large. Revisiting Roth's sources of Holocaust insight, this book does so not only to pay tribute to them but also to show how the ethical, philosophical, and religious reverberations of the Holocaust confer and encourage responsibility for human well-being in the twenty-first century. Seeing differently, seeing better--sound learning and teaching about the Holocaust aim for what may be the most important Holocaust insight of all: Take nothing good for granted.

Insights, Level 6 Open Book Publishers
Enormous changes are affecting African production agriculture, urbanization, and food consumption patterns, requiring new approaches to training and knowledge generation and dissemination to achieve food security. Many agricultural universities and other tertiary agricultural education (TAE) organizations have been slow to respond, hindered by inadequate staffing and facilities and growing competition for funds. However, some African agricultural universities are transforming themselves and are achieving remarkable success. This book documents successful approaches to remaking TAE in Africa to inspire leaders, both formal and informal, of other TAE organizations. It emphasises adaptive strategies and processes creating an internal culture driven by stakeholder needs and where organizational transformation improves the quality and relevance of teaching, research, and outreach. The chapters cover the role of TAE in agricultural transformation, trends in TAE in Africa, solutions to the rigour-versus-relevance dilemma, curriculum design informed by actual and emerging labour market conditions, innovation and entrepreneurship, TAE quality assurance, and networking among TAE institutions.

SEC Filings Insight Springer

The insight a patient shares into their own psychosis is fundamental to their condition - it goes to the heart of what we

understand 'madness' to be. Can a person be expected to accept treatment for a condition that they deny they have? Can a person be held responsible for their actions if those actions are inspired by their own unique perceptions and beliefs - beliefs that no-one else shares? The topic of insight in schizophrenia and related disorders has become a major focus of research in psychiatry and psychology. It has important clinical implications in terms of outcome, treatment adherence, competence, and forensic issues. In order to study 'insight' a broad perspective is required. This involves applying knowledge from the cognitive and brain sciences, as well as from philosophy and the social sciences. Insight and Psychosis comprises a series of in-depth, well-referenced, scholarly overviews from each of these perspectives with a strong empirical foundation - including in some cases the presentation of new data and meta-analysis of the published literature. These are integrated and synthesised by the editors, both acknowledged experts in the field. The scope is truly international and spans theoretical perspectives, clinical practice, and consumer views. The book will act as a source for students and researchers interested in pursuing any number of questions and controversies around lack of insight and awareness, and will guide clinical psychologists and psychiatrists who seek a broader view of the many facets of insight that might arise during their day-to-day work.

Toward Behavioral Transaction Cost Economics Routledge

This is a new edition of the first comprehensive text to show how the advances in molecular and cellular biology and in the basic neurosciences have brought the revolution in molecular medicine to the field of psychiatry. The book begins with a review of basic neuroscience and methods for studying neurobiology in human patients then proceeds to discussions of all major psychiatric syndromes with respect to knowledge of their etiology, pathophysiology, and treatment. Emphasis is placed on synthesizing information across numerous levels of analysis, including molecular biology and genetics, cellular physiology, neuroanatomy, neuropharmacology, and behavior, and in translating information from the basic laboratory to the clinical laboratory and finally to clinical treatment. Editors Dennis Charney and Eric Nestle, along with their six section editors and over 150 contributors, have revised and updated all 80 chapters from the previous edition and have added new chapters on topics

relating to, for example, genetics, experimental therapeutics, and late-life mood disorders. Both a textbook and a reference book, *Neurobiology of Mental Illness* is intended for psychiatrists, neuroscientists, and upper level students.

Computer-mediated Lexicography in the Foreign Language Learning Context

Information molecules, such as Cortico-Releasing Factor (CRF), are ancient and widely distributed across diverse organs, playing various regulatory roles. CRF has been associated with a range of human conditions, including fear and anxiety, social contact, and most recently, addiction – in particular the euphoric feelings associated with alcohol consumption. Since its original discovery, research has unearthed that the role of this molecule is much broader than first thought. The scientific community now knows that CRF is a dynamic and diversely widespread peptide hormone that plays many roles and has many functions, in addition to its role as a releasing factor in the brain. This book explores the role of CRF, examining the relationship between location and function. It considers recurrent features that are linked to CRF - movement and change. CRF expression in regions of the brain is tied to paying attention to novel events and invoking movement in response to those events. Indeed, CRF provokes simple organized rhythmic behavior and can be mobilized under diverse conditions, including adversity. Examining the evolutionary origins of CRH, its neural functions, and its role in a variety of human characteristics and social behaviors, this book provides unique insights into CRF, and will be of interest to students and researchers in Neuroscience, Psychology, and Biology.

Organisational Capital Anthem Press
A free-standing 120-page component no longer bound into the SB/WB, as was the case with *American Inspiration for Teens*. The Teacher's Book Pack includes tests based on the tests in *Inspired*. They are editable and printable by the teachers and will be supplied on a Multi-Rom CD with audio material.

Behavioural Methods in Consciousness Research Taylor & Francis

The superordinate division of emotions is distributed along a bipolar dimension of affective valence, from approaching rewarding situations to avoiding punitive situations. Avoiding and approaching behaviors determine the disposition to the primary emotions of fear and attachment and the behavioral responses to the environmental stimuli of danger, novelty and reward. Approach or avoidance

behaviors are associated with the brain pathways controlling cognitive and attentional function, reward sensitivity and emotional expression, involving prefrontal cortex, amygdala, striatum and cerebellum. Individual differences in approach and avoidance behavior might be modulated by normal variance in the level of functioning of different neurotransmitter systems, such as dopaminergic, serotonergic, noradrenergic and endocannabinoid systems as well as many peptides such as corticotropin releasing hormone. These substances act at various central target areas to increase intensity of appetitive or defensive motivation. Physiologically, personality temperaments of approach and avoidance are viewed as instigators of propensity. They produce immediate affective, cognitive and behavioral inclinations in response to stimuli and orient individuals across domains and situations in a consistent fashion. Although the action undoubtedly emerges directly from these temperamental proclivities, ultimate behavioral outcomes are often a function of the integration among goal pursuit, self-regulation, and temperament trait. Defective coping strategies to aversive or rewarding stimuli characterize the patho-physiology of anxiety- and stress-related disorders or compulsive and addiction behaviors, respectively. Individuals with neuropsychiatric symptoms such as depression, suicidal behavior, bipolar mania, schizophrenia, substance use disorders, pathological gambling and anxiety disorders have scores which fall at the extreme tails of the normal distribution for a specific temperamental trait. The present Research Topic on the individual differences in emotional and motivational processing emphasizes the link between neuronal pattern and behavioral expression. The Topic includes experimental and clinical researches addressing the individual differences related to approach and avoidance and their behavioral characterization, structural and neurochemical profiles, synaptic connections, and receptor expressions. Studies are organized in a framework that puts in evidence the phenotypic expression and neurobiological patterns characterizing the individual differences and their biological variance.

Cattle in Ancient and Modern Ireland
Springer

Adopting a critical realist position, this book renders transaction cost economics (TCE) into a behavioral theory of organizational decision-making by foregrounding psychological processes

and introducing and integrating with effectuation theory. Consistent with its behavioral agenda, the book introduces the concept of uncertainty controllability and provides a clearer conceptualization and a novel modeling strategy of bounded rationality based on the conceptual separation of cognitive bounds from psychological 'rationalizing.' The book inspires new insights into the significance of cultural distance (CD). Based on the understanding that culture is socially-extended cognition, the author re-conceptualizes CD as reflecting cognitive bounds, and uses the biases arising from CD to contextualize effectuation and deepen the flat ontology of both TCE and effectuation theory. The book presents a full two-sided behavioral framework of organizational decision-making, with behavioral TCE and behavioral real options theory complementing each other to complete the full behavioral picture. Both sides are further linked to organizational learning, which reduces biases over time and thus drives governance structures toward more rational directions. The full framework uses prospect theory as the overarching theory that determines which side of the behavioral framework is relevant for the uncertainty of concern based on the different problem frames resulting from different degrees of uncertainty controllability. Because effectuation can take place on both sides of the framework based on competing risk logics, prospect theory serves to harmonize inconsistencies in the effectuation literature as a side note. This book applies the behavioral TCE side of the framework to the study of MNC subsidiary ownership decision-making process using a dataset of over 10,000 Japanese subsidiaries founded in 43 host countries. It concludes with a discussion of implications and future directions for TCE in general and international business in particular.

Transforming Tertiary Agricultural Education in Africa Frontiers Media SA

This volume discusses the latest developments in computerised dictionaries and how they may challenge and change current practices in language learning contexts. It contains contributions of authors from different countries, thus providing an international perspective on the topics tackled throughout the book.

Insights in evolutionary and population genetics: 2022 Oxford University Press
This book explores why widespread predictions of the radical transformation in the recording industry did not materialise. Although the growing revenue generated from streaming signals the recovery of the

digital music business, it is important to ask to what extent is the current development a response to digital innovation. Hyojung Sun finds the answer in the detailed innovation process that has taken place since Napster. She reassesses the way digital music technologies were encultured in complex music valorisation processes and demonstrates how the industry has become reintermediated rather than disintermediated. This book offers a new understanding of digital disruption in the recording industry. It captures the complexity of the innovation processes that brought about technological development, which arose as a result of interaction across the circuit of the recording business – production, distribution, valorisation, and consumption. By offering a more sophisticated account than the prevailing dichotomy, the book exposes deterministic myths surrounding the radical transformation of the industry.

A Composer's Insight: Richard Rodney Bennett Frontiers Media SA

Every business knows that the best customer is a happy customer. They return again and again, bring their friends and family, and deliver tons of free advertising via word of mouth and social media. But in order to grow that loyal base, you must be keenly aware of your customers' needs and preferences. Drawing on the latest research in the exploding field of positive psychology, Columbia Business School professor Bernd Schmitt offers three unique approaches any business can use to turning a casual customer into a committed fan:

- The Feel-Good Method: Use the experience of pleasure and positive emotion to hook new customers, and watch those feel-good moments transform an impulsive buyer into a committed loyalist.
- The Values-and-Meaning Method: Attract passionate customers by appealing to their core values, like being socially responsible, protecting the environment, or living a simple life
- The Engagement Method: Get

customers to notice a unique or limited offer, immerse them in the experience, and have them share it with friends and family. Schmitt shows marketers, brand managers, and entrepreneurs how to design an authentic and successful campaign that will reach, grow, and sustain a devoted base of customers.

Digital Revolution Tamed Routledge

The attitude of Karl Barth to Israel and the Jews has long been the subject of heated controversy amongst historians and theologians. The question that has so far predominated in the debate has been Barth's attitude, both theologically and practically, towards the Jews during the period of the Third Reich and the Holocaust itself. How, if at all, did Barth's attitudes change in the post-war years? Did Barth's own theologising in the aftermath of the Holocaust take that horrendous event into account in his later writings on Israel and the Jews? Mark Lindsay explores such questions through a deep consideration of volume four of Barth's Church Dogmatics, the 'Doctrine of Reconciliation'.

Insights, Level 3 Springer

We're all learners on life's journey, and often the messy problems we encounter present us with the best education. Researchers are finding that the same concept holds true for students in our classrooms. Problem-based learning (PBL) is an authentic, experiential form of learning centered around the collaborative investigation and resolution of real-world problems. In PBL, students address a problematic situation from the perspective

of a stakeholder in the situation. As both a curriculum organizer and instructional strategy, PBL fosters active learning, supports knowledge construction, integrates disciplines, and naturally combines school learning with real life. In this second edition of their book, Torp and Sage offer opportunities to learn about PBL from a variety of perspectives. New to this edition is an in-depth look at assessing education in and through problem-based learning--how to use assessment not only to see what students have learned during the PBL experience, but also how to use assessment to enhance PBL itself. New examples--from elementary, secondary, and university levels--new charts, and expanded graphics enhance every chapter of this new edition. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

Neurobiology of Mental Illness Oxford University Press

Insight and intuition might be the most mysterious and fascinating fields of human thinking and problem solving. They are different from standard and analytical problem solving accounts and provide the basis for creative and innovative thinking. Until now they were investigated in separate academic fields with differing tradition. Therefore, this eBook attempts to bridge the gap between both processes and to provide a more integrated perspective. Several experts address the underlying cognitive processes and provide a broad spectrum of new empirical, theoretical, and methodological insights.

Barth, Israel, and Jesus Greenleaf Book Group

'Behavioural methods in consciousness research' is the first book of its kind, providing an overview of methods and approaches for studying consciousness. The chapters are written by leading researchers and experts who describe the methods they actually use in their own studies, along with their pitfalls, problems, and difficulties
