Puppy Socialization: What It Is and How to Do It defines and demystifies the most important thing you can do for your puppy: socialization. The authors don't just tell you what you need to know about socialization. They show you with dozens of photographs and exclusive linked videos (a live internet connection is needed to view the videos). You'll see other owners socialize their puppies under the guidance of a nationally certified dog trainer and behavior consultant. These real-life examples of socialization show you what to do when things go well and when they don't go so well. You'll learn about:

- The magical time. Did you know that there is a special time in a puppy's life when he is primed to accept new things? The authors tell you when that time is, when that socialization window starts closing, and how a little effort by an owner during that time can save heartache later.
- Canine body language. Puppies and dogs are talking all the time—with their body language. Learn to tell when a puppy or dog is relaxed and happy, a bit nervous about something, or outright fearful.
- Myth-busting. There's a lot of advice out there about socialization and not all of it is good. Some common myths can actually cause a puppy harm. The authors give you the most up-to-date information on puppy socialization and put some harmful myths to rest.
- Socializing a puppy during COVID-19. Puppies have so much to get used to: people, environments, noises, and more. The authors provide strategies for keeping humans and puppies safe while socializing puppies, even during the COVID-19 pandemic.
- What supplies are needed during socialization. The authors provide checklists of things owners need when socializing a puppy at home and away from home.

Please note: This is a companion version & not the original book. Sample Book Insights: #1 We had a puppy, and I was not attracted to the idea of raising one. But we did, and it was wonderful. #2 I wanted to know what it was like to have a puppy, and I got one. It was wonderful. #3 Following a puppy's point of view can help you understand their behavior better. The life course of animals from beginning to end is woven into human lives, but we typically miss the first months of a puppy's life with their new family.

Telling stories in conversations is intricately interwoven with the interactive and local functions of story telling. Telling stories demands a certain kind of context and in itself establishes a particular interactive reality. Thus, narration is a specific kind of verbal interaction, governed by contextualizing devices, genre-specific cooperative regularities and corresponding verbal features. It plays an important role in institutional as well as in private modes of communication. The volume focuses on narration as a contextualized and contextualizing activity, which allocates specific structural tasks to the participants in the narrative process (narrator, co-narrator, listener). Thus, the research questions are oriented towards story telling under a functional and interactive perspective. The contributions analyze recordings of authentic narrations in different functions using different kinds of qualitative reconstructive methods. The data come from everyday as well as institutional settings and the languages covered are English, German, Greek, Hungarian, and Italian.
