For nearly 40 years, *Medicine for the Outdoors: The Essential Guide to First Aid and Medical Emergencies* has been the take-

along manual of choice for anyone venturing into the mountains, forest, desert, or on water. This essential guide provides highly illustrated, easy-to-follow guidance on immediate stabilization and treatment of persons with virtually any possible medical problem—designed for on-the-spot use when higher-level medical care is not accessible. Written by experts in outdoor medicine, this updated edition helps you manage any situation until medical personnel can take over. Covers key information on a wide range of disorders related to specific environments, including natural disasters, high-altitude problems, water-related incidents, heat- and cold-related illnesses, and wildland fires. Provides easy-to-understand recommendations for dealing with animal attacks, venomous wildlife, wild plant and mushroom poisoning, minor and major medical problems, infectious diseases, water disinfection, and severe bleeding. Discusses key topics, including antibiotics, medicines, opioid overdose treatment, wound closure techniques, severe bleeding, spinal assessment and immobilization, tourniquets, the use of a Gamow bag for severe altitude illness, splinting, dental emergencies, disaster preparedness, global conflict guidelines, canine medicine, today's infectious disease threats, and much more. Includes up-to-date guidelines, even more helpful illustrations and diagrams, and a new chapter: Patient Assessment: A Structured Approach to Emergencies in the Outdoors. Includes advanced topics valuable to physicians and expedition medical staff at all levels of training and experience. **Basic Emergency Care: Approach to the Acutely Ill and Injured** Mountaineers Books

Developed in partnership with the National Ski Patrol, *Outdoor Emergency Care: A Patroller's Guide to Medical Care*, Sixth Edition, is designed to prepare first responders to handle any medical situation in the outdoor environment, during all seasons. The Sixth Edition features: A straightforward, consistent patient assessment process. The patient assessment process is presented in the same way patients are assessed in the health care system. Flowcharts are provided throughout the Patient Assessment chapter to keep the reader focused on each step of the process. Up-to-date content. As you read through each chapter, you will find new information that is current with present prehospital patient care. Subject matter that meets and, in many cases, exceeds the National Emergency Medical Responder criteria. Information unique for ski and bicycle patrollers, including extrication, is included. This material is presented in a format that combines the disciplines of urban EMS and wilderness medical rescue. Continuous case studies. A continuous case study is included in each chapter to encourage critical thinking and application of the information as readers progress through the chapter. End-of-chapter review questions. The review questions included at the end of each chapter allow students to evaluate

the knowledge they have gained while reading the chapter. Focus on learning objectives. Specific objectives listed at the beginning of each chapter tell students at the outset what they are expected to learn as they move through the chapter.

*Being Your Own Wilderness Doctor* Jones & Bartlett Learning Thoroughly revised and featuring a more efficient and streamlined design, the new 7th edition of Sheehy's trusted emergency care resource offers complete, up-to-date coverage of the essentials emergency nurses need to know. #### Diagnosis Before First Aid Saunders

Comprehensive guide for ski and snowboard patrollers, search and rescue groups, mountaineers, wilderness medical technicians, mountain bikers, river rafters, cavers, outdoor recreationists, and anyone else who may be called upon at one time or another to help someone in need in the outdoor setting. *Manual of Emergency Care* Elsevier Health Sciences  
"For over eighty years the National Ski Patrol (NSP) has trained people who have successfully cared for thousands of injured snow sports enthusiasts. Early in its history an Advanced Red Cross first aid course was used for training. Since that time pre-hospital care has significantly changed. The public has greater expectations of care now, so the NSP has improved the patrol-ler's level of training to that of an NHTSA (National Highway Traffic Safety Administration) Emergency Medical Responder. Today there are a variety of outdoor activities available at ski areas, bike parks, and other land management areas that occur during all seasons of the year. As a result, the NSP changed the medical training of patrollers to cover not just snow sports, but a variety of other non-winter activities, including mountain biking, ziplining, downhill bike racing, and bike parks. In the mid 1980's Dr. Warren Bowman, the National Medical Advisor for the NSP creat-ed a text and course called Winter Emergency Care providing prehospital medical care training for ski patrollers. Today, the program, aptly named "Outdoor Emergency Care", is the backbone of the NSP's medical training program. It is also the standard of training for other organizations using an Emergency Medical Responder curriculum involved with outdoor recrea-tion. Outdoor Emergency Care (OEC) is the primary resource for a student who wants to become a ski or bicycle patroller, or prehospital first responder called an OEC Technician. It also has value for other outdoor enthusiasts. It bridges the gap between urban medical responders with immediate access to an ambulance and advanced equipment, and wilderness search-and-rescue personnel who are several hours from advanced care. No other comprehensive medical textbook covers this niche of prehospital care . River rafters, rope-course rescuers, cavers, park rangers, mountain bike race personnel, search-and-rescue personnel, rescuers at large sporting events, and outdoor concerts will find the information in this text invaluable when providing care for patients"--
