This volume confronts an important historical hypothesis with empirical evidence from selected periods of history. The hypothesis in question states that competition among political and legal organisations in developing rules has been a crucial condition for liberty, innovation and growth in the history of mankind. It is due to Immanuel Kant, Edward Gibbon and Max Weber and has been revived and further developed by Nobel-Laureate Douglass C. North who contributes the first chapter. The volume brings together political economists, historians and legal scholars to discuss the role of political competition in the rise and decline of nations - both in theory and in a large number of case studies.

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions:

state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

China's Influence and American Interests David and Charles

This book is an exploration of the economic history of the German Democratic Republic, with an emphasis upon its confrontation by and contribution towards economic and military competition on the world stage. Beginning with an analysis of the Soviet bloc as a state-capitalist formation, the GDR's economic history is charted, with detailed examinations of the challenges to Soviet-style autarky that were posed by the globalising world market, as well as of GDR policymakers' attempts to use Western imports and credits as a 'whip' to spur growth. The book's central section consists of an exploration of the ambivalent attitudes of East German policymakers and industrialists towards their West German counterparts in the 1980s, as the whip was transformed into an ever-tightening noose of debt. Here, a prodigious range of secondary sources as well as hitherto unpublished documents from the archives of the old regime are drawn upon to document the means by which relative economic decline and dependency upon Western institutions came to constrain the options available to the East German nomenklatura. Finally, this study analyses the political economy of the 1989 revolution and unification and of post-unification Eastern Germany.
