JAYLA SNYDER

Backing Hitler

Bloomsbury Publishing
A detailed comparative analysis of speaker-audience interactions in Greek historiography, Josephus, and Acts that examines historians' use of speeches as a means of instructing/persuading their readers and highlights Luke's distinctive depiction of the apostles as adaptable yet frequently alienating orators.

Friedrich Schleiermacher's Pathways of Translation

Harvard University Press
This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1945.

for Holocaust Research
The scale and the depth of Nazi brutality seem to defy understanding. What could drive people to fight, kill, and destroy with such ruthless ambition? Observers and historians have offered countless explanations since the 1930s.

According to Johann Chapoutot, we need to understand better how the Nazis explained it themselves. We need a clearer view, in particular, of how they were steeped in and spread the idea that history gave them no choice: it was either kill or die. Chapoutot, one of France's leading historians, spent years immersing himself in the texts and images that reflected and shaped the mental world of Nazi ideologues, and that the Nazis disseminated to the German public. The party had no official ur-text of ideology, values, and history. But a clear narrative emerges from the myriad works of intellectuals, apparatchiks, journalists, and movie-makers that Chapoutot explores. The story went like this: In the ancient world, the Nordic-German race lived in harmony with the laws of nature. But since Late Antiquity, corrupt foreign

norms and values—Jewish values in particular—had alienated Germany from itself and from all that was natural. The time had come, under the Nazis, to return to the fundamental law of blood. Germany must fight, conquer, and procreate, or perish. History did not concern itself with right and wrong, only brute necessity. A remarkable work of scholarship and insight, *The Law of Blood* recreates the chilling ideas and outlook that would cost millions their lives.

Faust, with notes by G.G. Zerffi Taylor & Francis

In this book, Weikart helps unlock the mystery of Hitler's evil by vividly demonstrating the surprising conclusion that Hitler's immorality flowed from a coherent ethic. Hitler was inspired by evolutionary ethics to pursue the utopian project of biologically improving the human race.

Lenin, Stalin and Hitler

Central European University Press
Speech in Speech explores the techniques by which Classical Greek texts written primarily for public performance weave in direct quotations (oratio recta) of "other voices"-imagined or real. This "speech in speech" is

usually perceived as endowed with a greater vividness and authenticity than indirect quotation, even when the words report what someone might say, or enliven the verbal texture of plays and speeches, and examines the intricate relation of direct quotations to their "originals". As the first synoptic and detailed study of oratio recta in Classical Greek literature, *Speech in Speech* will be useful to anyone interested in ancient literary technique.

The Spirit and the Letter LIT Verlag Münster
Hermann Cohen was a Jewish-German thinker with a passion for philosophy. Two forms of national engagement influenced his philosophical system and his Jewish thought: a cultural-political 'Germanness' (Deutschtum) and a religious Judaism beyond the political.

A History of the Interpretation of the Acts of the Apostles
Routledge
Walter Hallstein was among the great European visionaries. This is the first book length study of one of the key shapers of the European Community in its early

years. The range of contributors include those who worked with Hallstein and have personal recollections of him, and younger historians drawing upon documents only recently available. The book contains sections on his contribution as State Secretary to post-war German foreign policy, his seminal role as the first President of the Commission of the EEC and the legacy of his work and ideas and later years as President of the European Movement.

The Kaiser and His Court U of Nebraska Press
A leading expert on the 20th-century history of Berlin, employing new and little-known German sources to track Hitler's attitudes and plans for the city, presents a fascinating new account of Hitler's relationship with Berlin, a place filled with grandiose architecture and imperial ideals, which he used as a platform for his political agenda.

The Beginnings of Christianity: The Acts of the Apostles BRILL
"Charity" as a Christian and, in particular, also monastic virtue was a complex phenomenon in the Middle Ages. The

present volume outlines, albeit with broad strokes, the field of charity in the monastic form of life. The collected essays endeavour to approach the subject from different angles, which present themselves as especially significant. The focus is placed both upon older communities oriented towards separation from the world as well as upon those open to the world and interested in interaction with all people, so that insights can be gained into mutual fraternal charity within the convents as well as into charity towards all. Additionally, the volume attempts to touch upon the wide spectrum of the communication levels of charity. Not least, attention is given to the pivotal point of charity - the systemic embedding of charity between people in the love of man for God, which leads to assimilation with Him. In doing so, the purpose was to draw attention to the fertility of the subject and to outline its importance for the history of the *vita religiosa*.

English/German Dictionary of Idioms OUP Oxford

Thomas Hörber analyses the building process of European integration. He

shows the parliamentary discourses of France, Germany and Britain to be representative of the national position of these states towards the developing concept of 'Europe'. He covers all key events and developments of the time which had an impact on the European integration process and provides an explanation for the convergence of national discourses towards a common Europe. This development was by no means a given and the analysis of parliamentary debates shows for the first time how vigorous the debates were on European integration in the 1950s, and how, despite setbacks (notably the failure of the European Defence Community), the discussion went in favour of integration.

Eranos A&C Black

A personal and political analysis of the reign of Kaiser Wilhelm II using new archival sources.

A Dictionary of the German and English Languages BRILL

The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of

Husserl's groundbreaking work and the extension of this work by such figures as Scheler, Heidegger, Sartre, Levinas, Merleau-Ponty and Gadamer.

The Foundations of Europe Cambridge University Press

Kaiser Wilhelm II (1859–1941) is one of the most fascinating figures in European history, ruling Imperial Germany from his accession in 1888 to his enforced abdication in 1918 at the end of the First World War. In one slim volume, John Röhl offers readers a concise and accessible survey of his monumental three-volume biography of the Kaiser and his reign. The book sheds new light on Wilhelm's troubled youth, his involvement in social and political scandals, and his growing thirst for glory, which, combined with his overwhelming nationalism and passion for the navy provided the impetus for a breathtaking long-term goal: the transformation of the German Reich into one of the foremost powers in the world. The volume examines the crucial role played by Wilhelm as Germany's Supreme War Lord in the policies that led to war in 1914. It concludes by describing the rabid anti-

Semitism he developed in exile and his efforts to persuade Hitler to restore him to the throne.

An updated revision of the author's work, *A History of the Criticism of the Acts of the Apostles*, Gasque explores the credibility of recent interpretations of the book of Acts.

Speech in the Eneide of Heinrich Von Veldeke

Springer

Vivid, succinct, and highly accessible, Heinrich Winkler's magisterial history of modern Germany offers the history of a nation and its people through two turbulent centuries. It is the story of a country that, while always culturally identified with the West, long resisted the political trajectories of its neighbours. This second and final volume begins at the point of the collapse of the first German democracy, and ends with the joining of East and West Germany in the reunification of 1990. Winkler offers a brilliant synthesis of complex events and illuminates them with fresh insights. He analyses the decisions that shaped the country's triumphs and catastrophes, interweaving high politics

with telling vignettes about the German people and their own self-perception. The two volumes of *Germany: The Long Road West*, exploring the history of the German lands from the final days of the Holy Roman Empire to the very first of a reunified state in the late twentieth century, will be welcomed by scholars, students, and anyone wishing to understand a most complex and contradictory past. *Goering* Routledge Published in the Bloomsbury Revelations series and featuring a new preface by the author, this classic biography by acclaimed historian Richard Overy takes the reader on a chilling journey into the heart of Hitler's inner circle. Hermann Goering was Hitler's most loyal supporter, his designated successor and the second most powerful man in the Third Reich. One of the main architects of the Nazi regime, he was also instrumental in the creation of the Gestapo and directly ordered the Final Solution. But who was the man behind the carefully-constructed mask? Self-indulgent and ruthless, sybaritic and brutal, egotistical yet

capable of self-effacement, weak-willed yet fiercely calculating, Goering was a contradictory, complex and often bufoonish character. He styled himself as the 'Iron Man' but was known to wear togas, fur coats and faux-medieval hunting outfits. A brilliant World War I fighter pilot, military leader and mercurial Luftwaffe commander, he also loved the opera and took a perverse pride in his ill-gotten, infamous art collection. Richard Overy illuminates the many facets of Goering's personality and charts his story from his golden days as Hitler's most trusted commander to his failures and loss of power after the Battle of Britain, his sensational trial at Nuremberg and his ignominious death by suicide on the eve of his execution.

Germany: The Long Road West Rowman & Littlefield
 Edmund Husserl's *Origin of Geometry*: An Introduction (1962) is Jacques Derrida's earliest published work. In this commentary-interpretation of the famous appendix to Husserl's *The Crisis of European Sciences and Transcendental*

Phenomenology, Derrida relates writing to such key concepts as differing, consciousness, presence, and historicity. Starting from Husserl's method of historical investigation, Derrida gradually unravels a deconstructive critique of phenomenology itself, which forms the foundation for his later criticism of Western metaphysics as a metaphysics of presence. The complete text of Husserl's *Origin of Geometry* is included. [The Critic](#) Springer Science & Business Media Provides image and full-text online access to back issues. Consult the online table of contents for specific holdings. [Selected Writings: 1935-1938](#) Walter de Gruyter GmbH & Co KG This dictionary is the ideal supplement to the *German/English Dictionary of Idioms*, which together give a rich source of material for the translator from and into each language. The dictionary contains 15,000 headwords, each entry supplying the German equivalents, variants, contexts and the degree of currency/rarity of the idiomatic expression. This dictionary will be an invaluable resource for students and professional

literary translators. Not for sale in Germany, Austria or Switzerland
Rhetorical Adaptation in the Greek Historians, Josephus, and Acts vol.1
 Yale University Press
 From one of the most prominent biographers of the Nazi period, a new and provocative portrait of the figure behind the century's worst crimes
 Acclaimed historian Peter Longerich, author of *Goebbels and Heinrich Himmler* now turns his attention to Adolf Hitler in this new biography. While

many previous portraits have speculated about Hitler's formative years, Longerich focuses on his central role as the driving force of Nazism itself. You cannot separate the man from the monstrous movement he came to embody. From his ascendance through the party's ranks to his final hours as Führer in April 1945, Longerich shows just how ruthless Hitler was in his path to power. He emphasizes Hitler's political skills as Germany

gained prominence on the world's stage. Hitler's rise to, and ultimate hold on, power was more than merely a matter of charisma; rather, it was due to his ability to control the structure he created. His was an image constructed by his regime - an essential piece self-created of propaganda. This comprehensive biography is the culmination of Longerich's life-long pursuit to understand the man behind the century's worst crimes.
