Clinical Teaching Strategies in Nursing, Fourth Edition Elsevier Health Sciences

"Placement Learning in Medical Nursing covers the following areas: Takes a logical, step-by-step approach to preparing for learning on a medical nursing placement. Provides the principles of care, treatment and management of an individual, linking university-learned theory to clinical practice. Gives helpful evidence-based practice examples and resources to support placement learning. Identifies clinical skills that underpin care of an individual. Highlights potential learning opportunities and experiences available on a medical nursing placement. Explains how to develop your clinical portfolio by completing specific exercises and activities. Maps all activities and exercises to the NMC competencies. Advises on approaches to a range of situations that may arise as a student nurse. Adopts a case-study/patient pathway approach to consolidating learning, from pre-diagnosis, through a range of treatment options to discharge."--Publisher.

**Nurse Educator's Guide to Best Teaching Practice** Jones & Bartlett Learning

Set yourself up for success as a nurse educator with the award-winning *Teaching in Nursing: A Guide for Faculty*, 5th Edition. Recommended by the NLN for comprehensive CNE prep, this insightful text is the only one of its kind to cover all three components of teaching: instruction, curriculum, and evaluation. As it walks through the day-to-day challenges of teaching, readers will benefit from its expert guidance on key issues, such as curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advancements in technology and information. This new edition contains all the helpful narrative that earned this title an AJN Book of the Year award, along with updated information on technology-empowered learning, the flipped classroom, interprofessional collaborative practice, and much more. Coverage of concept-based curricula includes strategies on how to approach and implement concept-based lessons. Extensive information on online education discusses the use of webinars and other practical guidance for effective online instruction. Evidence-based teaching boxes cover issues, such as: how to do evidence-based teaching; applications of evidence-based teaching; implications for faculty development, administration, and the institution; and how to use the open-ended application questions at the end of each chapter for faculty-guided discussion. Strategies to promote critical thinking and active learning are incorporated throughout the text, highlighting various evaluation techniques, lesson planning insights, and tips for developing examinations. Updated research and references address forward-thinking approaches to education and trends for the future. Guidance on teaching in diverse settings addresses topics such as the models of clinical teaching, teaching in interdisciplinary settings, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Strong focus on practical content — including extensive coverage of curriculum development — equips future educators to handle the daily challenges and opportunities of teaching. NEW! Chapter on Interprofessional Education and Collaborative Practice focuses on the collaboration of care across patient care providers, emphasizing clear communication and shared patient outcomes. NEW! Renamed unit on Curriculum as a Process better reflects the latest QSEN competencies and other leading national standards. NEW! Renamed unit on Technology-Empowered Learning covers the use of technology for learning — including non-traditional course formats, active learning, flipped classrooms, and more.

**Learning and Teaching Nursing** Elsevier Health Sciences

2007 AJN Book of the Year Award Winner *Nursing Education in the Clinical Setting* provides a practical approach to clinical nursing instruction. Although grounded in adult learning theory, this unique resource provides practical suggestions and addresses common questions and issues. The text incorporates illustrative scenarios, discussion questions, and reflection exercises designed to facilitate thoughtful application of the content. Addresses the role transition for a nurse with clinical expertise to that of clinical nursing instructor. Provides important tips for effectively appraising student performance such as student involvement in self-evaluation and goal setting, and suggestions for how evaluation and appraisal are shared with the student. Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning, including "cognitive" (e.g., critical thinking), "affective" (e.g., caring), and "psychomotor" (e.g., technical skills). Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that contains a variety of supplemental resources, including sample approaches for teaching and evaluation, suggestions for preparing anecdotal notes, and relevant reference material. Incorporates issues related to computer access of patient data banks for students, and the federal regulations mandated by HIPAA and their clinical education implications.

How do you think like a staff nurse? What behaviour and level of work is needed to be awarded your degree? How will you adapt to working as a professional and working in a team? This book is for you if you're in the final stage of a pre-registration nursing course or if you are making the transition to becoming a registered nurse. It provides you with a toolkit of advice to help you deal with challenges you'll face and prepare you with an understanding of what the university and NMC will be looking for. Clear advice is given on the academic skills you will need, how to face the rigours of the final year, and what you need to demonstrate in your behaviour and placements. Professional issues covered include using evidence in practice, managing a caseload, and how far to fit into or question workplace culture. The features of this book include: • Guidance enriched by the latest research and expert knowledge of this transition period • Reflective learning boxes to help you identify how you can prepare • Case studies raising issues from student and registered nurses' experience going through this transition • Short chapters enable quick learning to support you now • Knowledge that will build your confidence and enhance your ability to fit into your first job This book is recommended reading for all final year nursing students and nurses new to the profession. "Packed with practical detail and the supporting evidence, it's obvious the authors are anchored in the reality of today's complex healthcare environments. The journey from student to registered nurse is more like a vertical ladder than a learning curve. This book helps you climb up every rung of the way. This book doesn't just describe the process of transition; it gives advice for both academic and practice based achievement, preparing you to think and practise as a staff nurse. It's a resource you can either dip into as needed, or read from cover to cover. In addition there's an evidence-based preceptorship toolkit for transition which is a useful tool for employers to devise an effective system of support. The experienced nurse would also benefit from this as a reference tool to support their students and preceptees and a reminder of the demands placed on them." Liz Allibone, Head of Clinical Education and Training, Royal Brompton and Harefield NHS Foundation Trust, London, UK, and Chair of UK Clinical Nurse Educator Network "The transition from student nurse to registered nurse is daunting, to say the least. The realisation of what accountability actually means and the implications of working within the NMC Code (2015) become a reality rather than the focus of an academic essay. This book Transition to Nursing: Preparation for Practice effectively prepares third-year student nurses for the reality of becoming a Registrant. The book offers useful and practical advice on how to make the most of your final year as a student nurse and how to achieve the highest degree classification possible. The book utilises case studies to encourage self-reflection, and consider how the NMC Code (2015) applies to the daily life of a Registrant. The book acknowledges the reality of working in modern day health care and the challenges that it brings - and offers practical advice on how to develop resilience, mindfulness and self-awareness. This book is a must for all final year students." Mike Parker, Senior Lecturer in Emergency and Unscheduled Care, University of York, UK "This interesting book takes the pre-registration nursing student on a journey from the beginning of their third year through to registration and working as a newly qualified nurse. The book is divided into three distinct sections, addressing academic aspects, the final clinical placement and lastly registration as a newly qualified nurse. It is written in an easy to read style using a case study approach with each chapter addressing a specific aspect thus allowing it to be read as a whole or dipped into as the need arises. The

areas covered in each section are relevant to all fields of nursing and the case studies are realistic and encompass all aspects of the transition. This will be a very useful resource for third year students embarking on what is undoubtedly a stressful year as they strive to achieve success in their nursing degree and make the transition from student nurse to newly qualified nurse." Pauline Carson, Lecturer, Children and Young People's Nursing, Queens University Belfast, UK "Transition to Nursing: Preparation for Practice is an excellent text for all students embarking on the last stages of their journey to become a Registered Nurse. It offers great advice and guidance that will inform and help boost confidence, during the final year of the programme and beyond. The logical structure of the contents and use of case study scenarios allows the reader to develop their understanding of the important aspects of theory and practice requirements at Level 6, and the expectations and reality of life as a Newly Qualified Nurse. This is essential reading for all final year students." Claire Williams, Senior Lecturer, University of Derby, UK "Much has been written about transition to practice for newly qualified nurses, Bill and Michelle have done a fantastic job in putting this in one place and producing a valuable resource for student nurses to help them prepare for this part of their journey to registered professional. They have covered all the important elements of transition including resilience, speaking out, developing confidence and dealing with reality shock culminating in a very handy toolkit that can be used to help manage this exciting and sometimes stressful time !!" Claire Agnew, Senior Nurse – Clinical Practice Development, University Hospitals of Leicester NHS Trust, UK
