ESTILOS DE APRENDIZAJE

Elsevier

Everyday aesthetic experiences and concerns occupy a large part of our aesthetic life. However, because of their prevalence and mundane nature, we tend not to pay much attention to them, let alone examine their significance.

Western aesthetic theories of the past few centuries also neglect everyday aesthetics because of their almost exclusive emphasis on art. In a ground-breaking new study, Yuriko Saito

provides a detailed investigation into our everyday aesthetic experiences, and reveals how our everyday aesthetic tastes and judgments can exert a powerful influence on the state of the world and our quality of life. By analysing a wide range of examples from our aesthetic interactions with nature, the environment, everyday objects, and Japanese culture, Saito illustrates the complex nature of seemingly simple and innocuous aesthetic responses. She

discusses the inadequacy of art-centered aesthetics, the aesthetic appreciation of the distinctive characters of objects or phenomena, responses to various manifestations of transience, and the aesthetic expression of moral values; and she examines the moral, political, existential, and environmental implications of these and other issues.

McGraw Hill Professional AECT Design & Development Outstanding Book Award for 2008! Design and Development Research thoroughly discusses methods and strategies appropriate for conducting design and development research. Rich with examples and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research.

Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of

information and data often gathered in studies, and unique procedures for collecting these data; examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It is intended

for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field.

Actualmente, en la cultura visual, impera lo gráfico y la imagen, recursos que se han vuelto indispensables en los

medios de comunicación ya sean impresos o digitales para transmitir de manera eficaz las noticias. Sin embargo, ambas formas de presentación de la prensa tienen particularidades de comunicación diferentes. Es en este contexto que, a pesar del creciente desarrollo de lo digital en la comunicación periodística, esta publicación se centra en los fundamentos del diseño periodístico en la prensa impresa, a partir del estudio y análisis interdisciplinario de

publicaciones periodísticas diarias. La idea de este texto es proporcionar contenidos de manera didáctica que permitan, al estudiante de periodismo, al periodista o a personas interesadas en la materia, incorporar conocimientos básicos sobre el diseño periodístico impreso a su quehacer profesional, potenciando así su capacidad comunicadora gracias a la articulación, en un mismo resultado, del contenido y el diseño. Este libro ofrece una visión actualizada del

diseño periodístico. Margarita Ramírez Jefferson y Orietta Marquina Vega proponen la sistematización de los principales conceptos y teorías del diseño y la comunicación visual, y analiza el espacio del diseño periodístico como elemento comunicativo, presentando referentes locales que ejemplifican la articulación y materialización del diseño gráfico, la imagen y el periodismo como una unidad comunicativa cohesionada. Si bien esta publicación está dirigida a

estudiantes de periodismo, su lenguaje sencillo y la exposición de los temas con diversos ejemplos la hace también útil para cualquier interesado en explorar por cuenta propia el espacio de realización del diseño periodístico.

En la dimensión de la calidad e innovación educativa y docente, esencial en nuestros compromisos a lo largo de toda nuestra trayectoria, los esfuerzos han sido relevantes. En el singular año 2020, el I Congreso de Innovación Docente presentó un conjunto de iniciativas que podemos calificar de ejemplares, y que fueron recogidas en

el correspondiente libro de actas. Ahora presentamos las aportaciones que se expusieron en el II Congreso, en 2021, en un formato híbrido, en unos momentos en que teníamos clara la complementariedad entre, por un lado, proyectos de adecuación a las nuevas realidades y exigencias en ámbitos de contenidos y recursos tecnológicos, y, por otra parte, la conformación de experiencias que nos permitían ir articulando una nueva generación de

iniciativas, metodologías y sistemáticas que, independientemente de su génesis, habían venido para quedarse.

"For more than fifty years, Milton Glaser has designed much of the world we live and experience every day. His posters, books, albums, restaurants, advertisements, and so much more have identified him as the preeminent force in design in America. Now, in

Drawing is Thinking, Glaser draws upon an amazing vocabulary of images and techniques to create his most personal book to date. In a way, he has not only been drawing all his life, he has been thinking about art and design on that journey." "Based on his view that all art has its origin in the impulse to create, he has designed a book that powerfully delineates this position. In Drawing is Thinking, the drawings depicted are meant to be experienced sequentially, so that the viewer not

only follows Glaser through these pages, but comes to inhabit his mind. The drawings represent a sweeping range of subject matter taken from the full range of a reflective master's career. The pages suggest that drawing is not simply a way to represent reality, but, as the title implies, a better way to perceive the world. The maker and the viewer become more attentive, one by creating the work, the other by experiencing it." "Glaser's two signature books, Graphic Design and Art is

Work, are each in print decades after their first appearances. In different ways, each is a display of his work with extended descriptions of how the work came about, and how design problems were visually resolved. But in Drawing is Thinking the author is less interested in display. Glaser this time is concerned with how the mind works in its attempt to create reality."--BOOK JACKET.
