Life Orientation Springer Science & Business Media

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

Corporate Practices and Conduct Kumarian Press

Experts estimate that nearly 60 percent of all U.S. pregnanciesâ€"and 81 percent of pregnancies among adolescentsâ€"are unintended. Yet the topic of preventing these unintended pregnancies has long been treated gingerly because of personal sensitivities and public controversies, especially the angry debate over abortion. Additionally, child welfare advocates long have overlooked the connection between pregnancy planning and the improved well-being of families and communities that results when children are wanted. Now, current issuesâ€"health care and welfare reform, and the new international focus on populationâ€"are drawing attention to the consequences of unintended pregnancy. In this climate *The Best Intentions* offers a timely exploration of family planning issues from a distinguished panel of experts. This committee sheds much-needed light on the questions and controversies surrounding unintended pregnancy. The book offers specific recommendations to put the United States on par with other developed nations in terms of contraceptive attitudes and policies, and it considers the effectiveness of over 20 pregnancy prevention programs. *The Best Intentions* explores problematic definitionsâ€"unintended" versus "unwanted" versus "mistimed"â€"and presents data on pregnancy rates and trends. The book also summarizes the health and social consequences of unintended pregnancies, for both men and women, and for the children they bear. Why does unintended pregnancy occur? In discussions of "reasons behind the rates," the book examines Americans' ambivalence about sexuality and the many other social, cultural, religious, and economic factors that affect our approach to contraception. The committee explores the complicated web of peer pressure, life aspirations, and notions of romance that shape an individual's decisions about sex, contraception, and pregnancy. And the book looks at such practical issues as the attitudes of doctors toward birth control and the place of contraception in both health insurance and "managed care." *The Best Intentions* offers frank discussion, synthesis of data, and policy recommendations on one of today's most sensitive social topics. This book will be important to policymakers, health and social service personnel, foundation executives, opinion leaders, researchers, and concerned individuals.

Opting Back In Gazelle Distribution

This book was developed in order to deliver a unit standards-based curriculum that is in line with

the National Qualifications-Framework (NQF).

"This New York Times bestseller is packed with incredible photos, tons of fun facts, crafts, activities, and fascinating features about animals, science, nature, technology, and more. New features include highlights on National Geographic Explorers and their amazing initiatives (plus, ways you can get involved!); a tour of history's most famous sites; an updated "Fun and Games" chapter filled with all-new games, jokes, and comics; an exclusive sneak peek from a National Geographic Kids Chapters book; all new weird-but-true facts, crafts, and activities; a new special "17 Facts for 2017" feature in every chapter; updated reference material, and much more."

To Survive and Succeed Univ of California Press

Taking a career break is a conflicted and risky decision for high-achieving professional women. Yet many do so, usually planning, even as they quit, to return to work eventually. But can they? And if so, how? In *Opting Back In*, Pamela Stone and Meg Lovejoy revisit women first interviewed a decade earlier in Stone's book *Opting Out? Why Women Really Quit Careers and Head Home* to answer these questions. In frank and intimate accounts, women lay bare the dilemmas they face upon reentry. Most succeed but not by returning to their former high-paying, still family-inhospitable jobs. Instead, women strike out in new directions, finding personally gratifying but lower-paid jobs in the gig economy or predominantly female nonprofit sector. *Opting Back In* uncovers a paradox of privilege by which the very women best positioned to achieve leadership and close gender gaps use strategies to resume their careers that inadvertently reinforce gender inequality. The authors advocate gender equitable policies that will allow women—and all parents—to combine the intense demands of work and family life in the twenty-first century.

Education and Development Routledge

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force —make this bestselling book a must-have for policing courses.

Vocationalisation of Secondary Education Revisited National Geographic Children's Books

Annotation This is the first book to give a comprehensive overview of the new field of housing microfinance practice worldwide. The expert contributors provide guidance to practitioners and policymakers on what works best, and look at the applicability of developing world experience of housing microfinance in the United States. The book takes experience from the separate fields of

housing policy and microfinance and explores what each can learn from the other. The contributors review the important issues for microfinance institutions which are considering expanding into housing, or providers of conventional housing loans who seek to offer products for poor clients who lack collateral or a regular salary income. Although there are differences between the low-income housing market in the United States and in developing countries, the book explores lessons from international experience that can be applied domestically. With lessons for both housing policymakers and housing microfinance practitioners, this will be a crucial book in putting the new field of housing microfinance on the map.

Mathematics IGI Global

This book explores the place of education in development debates and provides a systematic and a theoretical overview of the main approaches to the subject. It emphasizes the fact that education is profoundly shaped by national and local cultures even if many issues are shared across locations.

Old Age and how to Survive it National Academies Press

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

Introduction to Policing SAGE Publications

Booklet outlining the duties of company directors and their ethical and legal responsibilities.

Produced by eight business organisations concerned about recent corporate practices, with a working group chaired by Henry Bosch, former head of the National Companies and Securities Commission.

Get Ready ... Get Set ... GO! UJ Press

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources

Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

National Geographic Kids Almanac 2017, I

Old age comes to us all, and this book advises on how to survive its trickier obstacles, not least the people who suggest you must 'do something'. It guides those entering their finer years on how to make the most of old age.

Through the Eyes of an African Chef

Human movement has an influence on the socio-economic dynamics of people, regions, and countries. The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies. However, immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants. In association, this brings about social challenges such as Afrophobia, racism, xenophobia, hatred, and violence within these countries. While these challenges are deeply rooted

across the world, Africa has its own unique challenges. Still struggling with massive underdevelopment, Africa needs to remove all the negative factors that could impede its quest of achieving development imperatives. *Impact of Immigration and Xenophobia on Development in Africa* analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent. The book focuses on demonstrating how immigrant skills and expertise can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa's quest of resolving its own challenges. The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan-Africanism as a uniting instrument and ideology for Africans. This book is a valuable reference tool for activists, retired and practicing politicians, governments, policymakers, practitioners, stakeholders, researchers, students, and academicians.

Impact of Immigration and Xenophobia on Development in Africa

Mkhuseli 'Khusta' Jack was born on a white-owned farm in the Eastern Cape. Evicted from their

home, his family was split up, wandering between different relatives, with nowhere to live legally. The young Khusta had a fierce yearning to go to school. Meeting obstacles at every turn, he never gave up. Reaching high school in Port Elizabeth, against all the odds, his drive finds a new focus: freedom for his people. Through fiery years of activism, his resolve never wavered. Khusta Jack became a respected leader in the democratic movement. Today, as a successful businessman, he is as outspoken as always. A true story of sacrifice, courage and triumph.

The Best Intentions

This book presents different perspectives of support of the doctoral education value chain. Themes such as the scope of doctoral education, planning and roll-out of the research project, student and supervisor responsibilities, publication writing, grant applications, the application of research results and research ethics and integrity are addressed. This book forms part of one of the three pillars of postgraduate research, namely research capacity building. The other two pillars are policy and methodology, which are addressed in other publications.
