Facilities management is a broad-based discipline that calls into play architectural, construction, engineering and management skills, particularly for running

and maintaining commercial, institutional, academic, and industrial buildings. This book will cover the essential role and responsibilities of the facilities manager, both as manager of existing building inventory as well as future planning and risk-based maintenance. Newcomers to facilities management will find this an excellent introduction, while established professionals will be able to brush up on the latest technological and regulatory trends affecting how complex facilities should be successfully maintained by way of risk assessment. For the classroom, the book contains ample exercises, useful ready-to-use forms and resources for extended study and instruction. Highlights include: Coverage of key components of facilities management including maintenance, risk management, building safety, operations and purchasing,

staffing, and more. Guidance on new trends including 'lean building maintenance' and Green Building specs (Green Spec) like LEED. Guidance on legal contracts, safety regulations, energy efficiency, and more. Specific management guidance by building type including apartments, office buildings, hotels and resorts, government buildings, schools, transport facilities and many others.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

**Ask a Manager**
