Putting Family First

Edward Elgar Publishing
 Constitutions and Religion
 is the first major
 reference work in the
 emerging field of
 comparative
 constitutional law and
 religion. It offers a
 nuanced array of
 perspectives on various
 models for the treatment
 of religion in domestic and
 supranational legal
 orders.

Education and the Crises of Multiculturalism

Routledge

Looks at immigration and
 asylum legislation and
 policies in Europe to
 investigate how
 immigrants are 'othered'
 by them.

of Religion) Transnational

migration has contributed

to the rise of religious

diversity and has led to

profound changes in the

religious make-up of

society across the

Western world. As a

result, societies and

nation-states have faced
 the challenge of crafting
 ways to bring new
 religious communities into
 existing institutions and
 the legal frameworks.
 Regulating Difference
 explores how the state
 regulates religious
 diversity and examines
 the processes whereby
 religious diversity and
 expression becomes part
 of administrative
 landscapes of nation-
 states and people's
 everyday lives. Arguing
 that concepts of
 nationhood are key to
 understanding the
 governance of religious
 diversity, *Regulating
 Difference* employs a
 transatlantic comparison
 of the Spanish region of
 Catalonia and the
 Canadian province of
 Quebec to show how
 processes of nation-
 building, religious
 heritage-making and the
 mobilization of divergent
 interpretations of
 secularism are co-
 implicated in shaping
 religious diversity. It
 argues that religious
 diversity has become
 central for governing
 national and urban
 spaces.

Across the West,

something called
 multiculturalism is in
 crisis. Regarded as the
 failed experiment of
 liberal elites,
 commentators and
 politicians compete to
 denounce its corrosive
 legacies; parallel
 communities threatening
 social cohesion, enemies
 within cultivated by
 irresponsible cultural
 relativism, mediaeval
 practices subverting
 national 'ways of life' and
 universal values. This
 important new book
 challenges this familiar
 narrative of the rise and
 fall of multiculturalism by
 challenging the existence
 of a coherent era of
 'multiculturalism' in the
 first place. The authors
 argue that what we are
 witnessing is not so much
 a rejection of
 multiculturalism as a
 projection of neoliberal
 anxieties onto the social
 realities of lived
 multiculturalism. Nested in an
 established post-racial
 consensus, new forms of
 racism draw powerfully on
 liberalism and questions
 of 'values', and unsettle
 received ideas about
 racism and the 'far right'
 in Europe. In combining
 theory with a reading of
 recent controversies
 concerning headscarves,
 cartoons, minarets and
 burkas, Lentin and Tiley

trace a transnational crisis that travels and is made to travel, and where rejecting multiculturalism is central to laundering increasingly acceptable forms of racism.

Nationhood, Migration and Global Politics

Springer Nature

This volume offers a remarkable collection of theoretically and practically grounded conversations with internationally recognized scholars, who share their perspectives on Global Citizenship Education (GCE) in relation to university research, teaching, and learning. *Conversations on Global Citizenship Education* brings together the narratives of a diverse array of educators who share their unique experiences of navigating GCE in the modern university. *Conversations* focus on why and how educators' theoretical and empirical perspectives on GCE are essential for achieving an all-embracing GCE curriculum which underpins global peace. Drawing on the Freirean concept of "conscientization", GCE is presented as an educational imperative to combat growing inequality, seeping

nationalism, and post-truth politics. This timely volume will be of interest to educators who are seeking to develop their theoretical understanding of GCE into teaching practice, researchers and students who are new to GCE and who seek dynamic starting points for their research, and general audience who are interested in learning more about the history, philosophy, and practice of GCE.

Multiculturalism is controversial in the liberal state and has frequently been declared dead, even in countries that have never had a policy under that name. This authoritative book reviews the different meanings multiculturalism has acquired across theories, countries, and domains to evaluate the extent of its demise and the ways in which it lives on. Christian Joppke intriguingly argues that, beyond the ebb and flow of policy, liberal constitutionalism itself bears out a multiculturalism of the individual that is not only alive but necessary in a liberal society. Through a provocative comparison of

gay rights in the United States and the accommodation of Islam in Europe, he shows that liberal constitutionalism constrains majority power, requiring the state to be neutral about peoples values and ethical commitment. It cannot but give rise to multiple ways of life or cultures, as people are endowed with the freedom to embrace them. Accordingly, impulses toward multiculturalism persist, despite its political crisis, but with a new accent on the individual, rather than group, as the unit of integration. Tightly argued and clearly written, this book provides a judicious assessment of multiculturalism in the West and will be of interest to a broad readership across the social sciences and legal studies.

Few countries as culturally rich, politically pivotal, and naturally beautiful as Indonesia are as often misrepresented in global media and conversation. Stretching 3,400 miles east to west along the equator, Indonesia is the fourth most populous country in the world and home to more than four hundred ethnic groups and several major world religions. This sprawling Southeast Asian nation is also the world's most populous Muslim-majority country and the third largest democracy.

Although in recent years the country has experienced serious challenges with regard to religious harmony, its trillion-dollar economy is booming and its press and public sphere are among the most vibrant in Asia. A land of cultural contrasts, contests, and contradictions, this ever-evolving country is today rising to even greater global prominence, even as it redefines the terms of its national, religious, and civic identity. The Routledge Handbook of Contemporary Indonesia offers an overview of the modern making and contemporary dynamics of culture, society, and politics in this powerful Asian nation. It provides a comprehensive survey of key issues in Indonesian politics, economics, religion, and society. It is divided into six sections, organized as follows: Cultural Legacies and Political Junctures Contemporary Politics and Plurality Markets and Economic Cultures Muslims and Religious Plurality Gender and Sexuality Indonesia in an Age of Multiple Globalizations Bringing together original contributions by leading scholars of Indonesia in law, political science,

history, anthropology, sociology, religious studies, and gender studies this Handbook provides an up-to-date, interdisciplinary, and academically rigorous exploration of Indonesia. It will be of interest to students, academics, policymakers, and others in search of reliable information on Indonesian politics, economics, religion, and society in an accessible format.

Controlling Immigration John Wiley & Sons

This completely revised and updated textbook explores the moral, economic, political, and cultural dimensions of the movement of people across international borders. In style and substance, it is designed to spark thoughtful discussions and to challenge readers to draw their own conclusions to questions such as how should democracies balance the rights of immigrants with those of citizens? What exactly constitutes persecution and how should we define a refugee? How should democracies allocate citizenship? Can and should a distinction be made between voluntary and forced migration, and does one group of

migrants deserve admission more than the other? What does a reasonable border policy look like? The rise of populism, the vote for Brexit, and the unprecedented flow of refugees around the world are all evidence that these questions remain highly salient, controversial, and unresolved. The content has been thoroughly updated to cover: • Migration into Europe since 2015. • Climate change as a driver of migration and the concept of environmental refugees. • Unaccompanied minors fleeing gang violence, asylum for victims of domestic violence, family separation policies, and the building of a wall on the U.S./Mexican border. • The controversies surrounding the Danish cartoons, Charlie Hebdo, and hijabs as examples of the tensions in liberal democracies between free speech, individual freedom, religious expressions, and minority rights. • The Dream Act and Deferred Action for Childhood Arrivals (DACA). • Demographic shifts and the debates around multiculturalism and diversity. • Guest-worker programs as

alternatives to admitting immigrants. Intended as the main text for undergraduate classes on international migration, the book will also appeal to broad survey courses on world politics, comparative politics, international relations, global history, and more specialized courses on human rights, citizenship, and nationalism.

The SAGE Handbook of International Migration Rutgers University Press Winner of the 2023 Globalisation and Education SIG Best Book Award at CIES 2023! Immigration, Integration and Education offers a unique comparative analysis of the views and experiences of children of immigrants in school in France and England. It showcases how the theorization of children's narratives can offer new methodological tools and insights in comparative education and help understand the different role of educational systems and discourses around issues of immigration, integration, race, language and religion. Presenting an in-depth analysis of children's own narratives, this book offers a close comparative examination of the French and English

educational systems, and the ways in which they impact on the experiences and identities of children of immigrants. The narratives of the children reveal the multiple forms of othering, discrimination and exclusion that shape their experiences in school, but also the multiple strategies they deploy to navigate these complex educational landscapes. It stresses that beyond national ideologies and philosophies of integration, structural and cultural aspects need to be explored to understand the role played by schools in the inclusion of immigrant populations. This book is an essential resource for academics, researchers and graduate students in the fields of sociology of education, migration studies, intercultural education, educational policy and comparative and international education. It will also appeal to those who are committed to addressing inequalities and discrimination in education.

This volume *Boundaries of Inclusion and Exclusion* examines the many different and newly emerging ways in which citizenship refers to spatial, symbolic and social boundaries. Today, in the context of citizenship we face processes of inclusion and exclusion on national and supranational level but no less on the level of groups and individuals. The book addresses these different levels and discusses processes of inclusion and exclusion with regard to spatial, social and symbolic boundaries referring to such different problems as political participation, migration, or identity with regard to religion or the EU. This book will appeal to academics working in the field of political theory, political sociology and European studies.

The SAGE Handbook of International Migration provides an authoritative

and informed analysis of key issues in international migration, including its crucial significance far beyond the more traditional questions of immigrant settlement and incorporation in particular countries. Bringing together chapters contributed by an international cast of leading voices in the field, the Handbook is arranged around four key thematic parts: Part 1: Disciplinary Perspectives on Migration Part 2: Historical and Contemporary Flows of Migrants Part 3: Theory, Policy and the Factors Affecting Incorporation Part 4: National and Global Policy Challenges in Migration The last three decades have seen the rapid increase and diversification in the types of international migration, and this Handbook has been created to meet the need among academics and researchers across the social sciences, policy makers and commentators for a definitive publication which provides a range of perspectives and insights into key themes and debates in the field. *Cultural and Social Division in Contemporary Japan* Routledge
"From the influx of immigrants in the 1950s

to contemporary worries about refugees and terrorism, *The Crisis of Multiculturalism in Europe* examines the historical development of multiculturalism on the Continent. Rita Chin argues that there were few efforts to institute state-sponsored policies of multiculturalism, and those that emerged were pronounced failures virtually from their inception. She shows that today's crisis of support for cultural pluralism isn't new but actually has its roots in the 1980s. Chin looks at the touchstones of European multiculturalism, from the urgent need for laborers after World War II to the public furor over the publication of *The Satanic Verses* and the question of French girls wearing headscarves to school. While many Muslim immigrants had lived in Europe for decades, in the 1980s they came to be defined by their religion and the public's preoccupation with gender relations. Acceptance of sexual equality became the critical gauge of Muslims' compatibility with Western values. The convergence of left and right around the defense of such personal freedoms

against a putatively illiberal Islam has threatened to undermine commitment to pluralism as a core ideal. Chin contends that renouncing the principles of diversity brings social costs, particularly for the left, and she considers how Europe might construct an effective political engagement with its varied population."-- Publisher web site
Constitutions and Religion
John Wiley & Sons
The idea that diverse cultural and ethnic groups should co-exist within a country and that assimilation should not be forced upon immigrant groups – “multiculturalism” – was orthodoxy 20 years ago. Today it’s coming under pressure. In this introduction to the political theory of multiculturalism, Andrew Shorten surveys the leading theories of multiculturalism, the critiques that have been levelled against the idea, and the debates surrounding cohesion, integration and diversity. He then goes on to demonstrate how multicultural political theory can be renewed, arguing that a single, monolithic vision of multiculturalism must be

replaced by a multiculturalism made up of different strands, responding to distinctive but interrelated issues, and inspired by real-world policy debates about how political communities should respond to differences of religion, language and nationality. After tracing the influence of earlier multicultural ideas on these debates, Shorten reveals some new and surprising possibilities for mutual learning. Containing an up-to-date overview of multicultural political theory and its various offshoots, this book is essential reading for students and scholars interested in the politics of cultural, religious, linguistic and national diversity.

Diversity in Decline?

Taylor & Francis
Bringing together prominent scholars in the field, this Handbook provides an interdisciplinary exploration of the

complex interrelationship between migration and welfare. Chapters further examine the effects of emigration on sending societies exploring issues such as the impact of remittances, diasporas, and skill deterioration as a result of human capital flight on capacity building and on economic and political development more generally.

Multiculturalism McGill-Queen's Press - MQUP Speaking at the Congress of African People in September 1970, Amiri Baraka said, "In Newark, when we greet each other on the streets, we say, 'what time is it?' We always say, 'It's nation time!' Nationalism is about land and nation, a way of life trying to free itself." National identity and nationhood are too often easily dismissed as retrograde populism or

racist exclusion. Instead, they need to be understood as a key part of a vision of globalization that holds the imperatives of diversity and solidarity in a delicate balance. Jerry White offers a defence of the nation based on the assumption that struggles for national identity have often unfolded in ways that should be familiar to those who defend the political standpoint of the progressive left. Having evolved into something that a wide variety of actors have sought to defend, nations can also serve as a defence against the homogenizing forces of globalization and as havens of diversity in opposition to more singularly minded forms of affiliation. It's Nation Time is structured as a series of specific case studies that speak to

theories of nation and their historical and cultural manifestations. It includes examples as varied as Black nationalism, Simone Weil's hopes for a postwar France, the first independence period of Georgia, the Bollywood cinema of Nehru-era India, and small or stateless nations such as New Zealand, Quebec, Ireland, Catalonia, the Métis, the Mohawk, and the Inuit to argue that nationalism is a social form that has much potential and life in it. Broadly internationalist but also deeply insightful about the particular cultures and politics of small nations, It's Nation Time defends an idea of nation, and a form of nationalism that are rooted in the potential for diversity, flexibility, and progressive politics.
