MARQUEZ HARRISON

Lake Trasimene 217 BC NewSouth

Exploring the history and religious community of a group of Muslim Sufi mystics in colonial French West Africa, this study shows the relationship between religious, social and economic change in the region. It highlights the role that intellectuals played in shaping social and cultural change and illuminates the specific religious ideas and political contexts that gave their efforts meaning. In contrast to depictions that emphasize the importance of international networks and anti-modern reaction in twentieth-century Islamic reform, this book claims that, in West Africa, such movements were driven by local forces and constituted only the most recent round in a set of centuries-old debates about the best way for pious people to confront social injustice. It argues that traditional historical methods prevent an appreciation of Muslim intellectual history in Africa by misunderstanding the nature of information gathering during colonial rule and misconstruing the relationship between documents and oral history.

Africa from the Twelfth to the Sixteenth Century University of Chicago Press

This is not a hoax. Jim Theis was a real person, who wrote *The Eye of Argon* in all seriousness as a teenager, and published it in a fanzine, *Osfan* in 1970. But the story did not pass into the oblivion that awaits most amateur fiction. Instead, a miracle happened, and transcribed and photocopied texts began to circulate in science fiction circles, gaining a wide and incredulous audience among both professionals and fans. It became the ultimate samizdat, an underground classic, and for more than thirty years it has been the subject of midnight readings at conventions, as thousands have come to appreciate the negative genius of this amazing Ed Wood of prose.

The Sexual Demon Routledge

Pangolins: Science, Society and Conservation brings together experts from around the world to document the most up-to-date

scientific knowledge on pangolins and their conservation. It chronicles threats facing the species, explores the current initiatives required to protect them, and looks ahead at the future of pangolin science and conservation efforts. Led by a team of editors with more than 20 years collective experience in pangolin conservation, this book includes accounts of the species' evolution, morphology, and systematics. It discusses the role of pangolins in historically symbolic, mythological, and ritualistic practices across Africa, Asia, and Europe, as well as contemporary practices including international trafficking. Chapters in the latter portion of this book focus on conservation solutions, including law enforcement and international policy, behavior change, local community engagement, ex situ conservation, tourism, and other interventions needed to secure the future of the species.

Pangolins: Science, Society and Conservation is the latest volume in Elsevier's species-specific series, *Biodiversity of the World: Conservation from Genes to Landscapes*. This book is a valuable resource for researchers and students in species conservation science, planning, and policymaking. Provides detailed accounts of the natural history and conservation status of each pangolin species. Explores the cultural significance of pangolins, historic and contemporary use, and international trade and trafficking. Discusses conservation solutions ranging from law enforcement and local community engagement to ex situ conservation, innovative finance, and tourism.

Novel Aspects on Epilepsy BoD - Books on Demand

Introduction to Digital Audio Coding and Standards provides a detailed introduction to the methods, implementations, and official standards of state-of-the-art audio coding technology. In the book, the theory and implementation of each of the basic coder building blocks is addressed. The building blocks are then fit together into a full coder and the reader is shown how to judge the performance of such a coder. Finally, the authors discuss the features, choices, and performance of the main state-of-the-art coders defined in the ISO/IEC MPEG and HDTV standards and in commercial use today. The ultimate goal of this book is to present the reader with a solid enough understanding of the major issues in the theory and implementation of perceptual audio coders that

they are able to build their own simple audio codec. There is no other source available where a non-professional has access to the true secrets of audio coding.

Metal Curtain Walls Cambridge University Press

Metal Curtain Walls is a comprehensive guide to the design and construction of modern curtain wall systems. It covers everything from the basics of construction to detailed information on materials, finishes, and installation methods. With contributions from leading experts in the field, this book is an essential resource for architects, engineers, and builders involved in the design and construction of commercial and industrial buildings. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

SIMPLE IRA Plans for Small Businesses Bloomsbury Publishing

A collection of work by six prominent artists accompanied by critical essays which place the work in the context of the artists' socio-cultural backgrounds. All six artists are of African origin but work in the West: Ethiopian painter Elisabeth T Atnafu; US fibre and mixed-media artist Xenobia Bailey; Jamaican photographer Renee Cox; Cameroon photographer Angele Essamba; painter Houria Niati from Algeria; and Ethiopian sculptor Etiye Dimma Poulsen.

Until the Letter Came Hachette UK

The theme of 2016 is "Solidarity in a competing world - fair use of resources". While on the one hand, one part of the world is profiting from natural resources, the other part of the world is suffering with hunger, malnutrition, human diseases, low income, violence and lately is also challenged through climate change. There is need to rethink and engage in a fair share of all

resources between the continents and nations. This includes huge engagement into the management of natural resources to solve the long list of environmental threats expressed through ongoing erosion, loss of soil fertility and loss of biodiversity, and topped by climate change having strong impact on the productivity in agriculture, fishery and forestry, and the use and quality of water and of energy in the South.

Sambo Diallo is unable to identify with the soulless material civilization he finds in France, where he is sent to learn the secrets of the white man's power.

Conned Again, Watson! Routledge

'We are at war with them,' wrote a Tasmanian settler in 1831. 'What we call their crime is what in a white man we should call patriotism.' Australia is dotted with memorials to soldiers who fought in wars overseas. So why are there no official memorials or commemorations of the wars that were fought on Australian soil between First Nations people and white colonists? Why is it more controversial to talk about the frontier wars now than it was one hundred years ago? In this updated edition of *Forgotten War*, winner of the 2014 Victorian Premier's Award for non-fiction, influential historian Henry Reynolds makes it clear that there can be no reconciliation without acknowledging the wars fought on our own soil. 'Impressive ... In terse, uncompromising sentences, Reynolds lays out a new road map towards true reconciliation.' — Raymond Evans, *The Age* 'A brilliant light shone into a dark forgetfulness: ground-breaking, authoritative, compelling.' — Kate Grenville 'Forgotten War invites us to recognise and applaud the courage and tenacity of those Aborigines who defended their lands against impossible odds and to recognise the cost to them and to their descendants.' — Franklin Richards 'Forgotten War is a work of passion by one of Australia's greatest living historians, a scholar who has helped to redefine the relationships between white and black Australians ... His measured prose and scholarly authority should be heeded.' — Peter Stanley, *Sydney Morning Herald* 'Henry Reynolds' *Forgotten War* calls for the principle of 'lest we forget' to include all Australians who died in defending their country, including Indigenous people. Timely historical analysis of newly collated and discovered evidence shows that the coming of European settlers to Aboriginal territories was

firmly defined as a frontier war ... Reynolds makes a compelling and measured case that we should officially honour and acknowledge the tens of thousands of people who died in our frontier wars.' — Judges' Report, The Victorian Premier's Literary Awards

Introduction to Digital Audio Coding and Standards John Wiley & Sons

Following Hannibal's crushing victory at the battle of the Trebbia, the reeling Roman Republic sent a new army under the over-confident consul Caius Flaminius to destroy the Carthaginian invaders - unbeknownst to him they were ready and waiting. The destruction of the Roman force at Lake Trasimene firmly established Hannibal as one of the Ancient World's greatest commanders thanks to his use of innovative tactics, including the first recorded use of a turning movement. The Romans would not send another major army to confront him until the battle of Cannae in 216 BC. This new study, based on recent archaeological work on the battlefield itself, tells the full story of one of Hannibal's greatest victories with the help of maps, full-colour illustrations, and detailed sections on the make-up of the armies and their commanders.

Tax Withholding and Estimated Tax Leuven University Press
Innovations in Technology Enhanced Learning, edited by Dr Anton Ravindran and Professor Liz Bacon, is a collection of state-of-the-art research papers discussing innovations in the area of technology enhanced learning in adult education. It was inspired by ideas presented at the annual Computer Science Education: Innovation and Technology Conferences, organized and administered by Global Science and Technology Forum (GSTF). Input for the twelve chapters have been sourced from ten geographically dispersed countries from across the world: USA, Spain, Portugal, UK, Bahrain, Saudi Arabia, Malaysia, Singapore, Iran and Australia, providing a truly international perspective on the field. With rapid developments in the technology and delivery mechanisms including the development of MOOCs (Massive Open Online Courses), online learning is in the process of revolutionising higher education, which makes this book all the more relevant and timely.

Gendered Visions Stanford University Press

"Wonderfully written...Mr. Owen writes about water, but in these polarized times the lessons he shares spill into other arenas. The

world of water rights and wrongs along the Colorado River offers hope for other problems." —Wall Street Journal An eye-opening account of where our water comes from and where it all goes. The Colorado River is an essential resource for a surprisingly large part of the United States, and every gallon that flows down it is owned or claimed by someone. David Owen traces all that water from the Colorado's headwaters to its parched terminus, once a verdant wetland but now a million-acre desert. He takes readers on an adventure downriver, along a labyrinth of waterways, reservoirs, power plants, farms, fracking sites, ghost towns, and RV parks, to the spot near the U.S.-Mexico border where the river runs dry. Water problems in the western United States can seem tantalizingly easy to solve: just turn off the fountains at the Bellagio, stop selling hay to China, ban golf, cut down the almond trees, and kill all the lawyers. But a closer look reveals a vast man-made ecosystem that is far more complex and more interesting than the headlines let on. The story Owen tells in *Where the Water Goes* is crucial to our future: how a patchwork of engineering marvels, byzantine legal agreements, aging infrastructure, and neighborly cooperation enables life to flourish in the desert—and the disastrous consequences we face when any part of this tenuous system fails.

There's a local legend of a dense demon that roams the halls of a sports stadium who does nothing but partake in two things: drinking the finest summer beer and consuming the seed of the team's virgin star athletes! Rumor has it that if you find her and make her orgasm, miraculous comebacks can happen, and one player is about to find out it's more than just an urban legend! With each climax, home runs start racking up wins for the home team and this slugger thinks he can game this system with some light foreplay with the demon. But as the final game starts with the championship on the line, the demon wants more than just her sweet spot stimulated-she wants this power hitter to knock her out of the park!

I Had a Black Dog Heinemann

This book covers novel aspects of epilepsy without ignoring its foundation and therefore, apart from the classic issues that cannot be missing in any book about epilepsy, we introduced

novel aspects related with epilepsy and neurocysticercosis as a leading cause of epilepsy in developing countries. We are looking forward with confidence and pride in the vital role that this book has to play for a new vision and mission. Therefore, we introduce novel aspects of epilepsy related to its impact on reproductive functions, oral health and epilepsy secondary to tuberous sclerosis, mitochondrial disorders and lysosomal storage disorders. *The Hadley Circulation: Present, Past and Future* James Currey Publishers

Translating for Children is not a book on translations of children's literature, but a book on translating for children. It concentrates on human action in translation and focuses on the translator, the translation process, and translating for children, in particular. Translators bring to the translation their cultural heritage, their reading experience, and in the case of children's books, their image of childhood and their own child image. In so doing, they enter into a dialogic relationship that ultimately involves readers, the author, the illustrator, the translator, and the publisher. What makes *Translating for Children* unique is the special attention it pays to issues like the illustrations of stories, the performance (like reading aloud) of the books in translation, and the problem of adaptation. It demonstrates how translation and its context takes precedence can take over efforts to discover and reproduce the original author's intentions. Rather than the authority of the

author, the book concentrates on the intentions of the readers of a book in translation, both the translator and the target-language readers.

Women, Agency, and the State in Guinea Springer Science & Business Media

"Interrogates the development of the world's first international courts of humanitarian justice and the subsequent "liberation" of nearly 200,000 Africans in the nineteenth century"--
Judging Research *Whispered Words*

Children's classics from Alice in Wonderland to the works of Astrid Lindgren, Roald Dahl, J.K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than 'serious' (adult) literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations and on the translator's (in)visibility, and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of child(hood) images, the 'revelation' of the

translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany; questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of 'cultural intertextuality' in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies dealing with character names, and complex translation strategies used in dealing with the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's *Haroun and the Sea of Stories*.

The 2019 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of "how research should be evaluated and how researchers should be rewarded". Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis.
