Art of the Byzantine Era World Bank Publications
 In contemporary European and American urban policy and politics and in academic research it is typically assumed that spatial concentrations of poor households and/or ethnic minority households will have negative effects upon the opportunities to improve the social conditions of those who are living in these concentrations. Since the level of concentration tends to be correlated with the level of spatial segregation the 'debate on segregation' is also linked to the social opportunity discussion. This book explores the central questions in urban and housing studies: Do poor neighbourhoods make their residents poorer? Does the neighbourhood structure exert an effect on the residents (behavioural, attitudinal, or psychological) even when controlling for individual characteristics of the residents? This issue has offered a locus for multi-disciplinary investigations on both sides of the Atlantic, and this volume demonstrates the rich geographical, sociological, economic and psychological dimensions of this issue. This book was previously published as a special issue of the journal *Housing Studies*.

Heraldry as art: An account of its development and practice, chiefly in England Good Press
 This volume introduces, through a series of freshly researched studies, new perspectives on the history of European urban culture from the eighteenth to the twentieth century. The approach is an international one, with essays on Austria-Hungary, France, Germany, Great Britain and Italy, and the authors drawn not only from Europe, but also the USA and Japan. The essays examine a range of specialist aspects of culture, such as gardening, spa towns, painting, and music. At the same time the contributors also explore jointly several broader interconnected themes - health, nature, the arts and cultural institutions, leisure, and tourism - of central importance to the cultural identity and development of the modern European town.

The Psychology of Extreme Traumatization Alpha Edition

This volume analyzes the history of the Lithuanian Metrica—the chancellery books of the Lithuanian grand duke—from the formation of its books in the mid-fifteenth century until now. It reveals how the first Metrica books emerged in the second half of the fifteenth century, discussing the titles given to them in different periods in history, and explains why the Lithuanian Metrica should be considered the state archive of early Lithuania. Material hitherto unknown in academic literature about the fate of the Lithuanian Metrica at the end of the eighteenth century, in the last years of the existence of the joint Polish-Lithuanian state, is also revealed in this account. The book dedicates a great deal of attention to the history of the publication and research of the documents and books of the Lithuanian Metrica, which are now kept in Moscow, Russia, as a historical source.

In the Wake of Naxalbari Routledge

This book addresses the shifting identity of Ruthenians on both sides of Orthodox/Uniate divide. The dissolution of the Polish-Lithuanian Commonwealth in the late 18th century and the incorporation of the majority of the Ruthenians - ethnic Ukrainians and Belarusians - into the Russian Empire from the backdrop for confessional history critical to modern Ukrainian, Belarusian, and Russian identities. In a region long shaped by religious and cultural tensions between the Roman Catholic and Eastern Orthodox churches, the creation in 1596 of the Uniate church, which retained the Eastern rite but accepted Catholic doctrine, cut a new religious fault line through Ruthenian communities that set the stage for religious and political conflict. Drawing on archival sources from Russia, Poland, and Ukraine, "The Western Front of the Eastern Church" addresses the shifting identity and fate of Ruthenians on both sides of the Orthodox/Uniate divide during the politically charged era of the partitions of Poland. Skinner investigates diverging components of these faith communities in the 18th century, the changing political landscape as the Russian Empire expanded its borders, and the

religious tensions and violence that occurred as a result. She reveals cultural influences that shaped Ukrainian and Belarusian identities and sheds light on aspects of Russian imperial identity and mythology as it laid claim to its western borderlands. The confessional focus critiques the nationalist perspective that has dominated the presentation of Ukrainian and Belarusian history, and Skinner's treatment brings the region into the broader discussion of confessional development in Europe as a whole. The narrative culminates in the Uniate conversions under Catherine II, providing new insight into the limits of religious toleration in Catherinian Russia. This book is essential reading for Russian and East European historians and those interested in the history of relations between the Roman Catholic and Orthodox churches, as well as those studying the tensions between Russia, Ukraine, and Belarus today.

 HISTORICAL REVIEW *Aspilogia* means materials of heraldry, and this first volume in the series on heraldry published by the Society of Antiquaries is a comprehensive listing of the known medieval rolls of arms of English origin. The rolls vary from very grand and luxurious painted manuscripts to simple records made by heralds using descriptive code, and this book is the best guide to them. It includes details of all known copies and variants, and includes rolls which are only known to us through later transcripts.

In his work Dr Walters starts from the premise that the traditional methods used in the study of art history distort our appreciation of Byzantine art. Development can be traced more plausibly, he argues, in terms of the function of the artefacts and the message they were designed to communicate.

This volume is the first scientific publication of the results of a systematic, intensive archaeological field survey conducted in the agricultural territory (chora) of a Greek colony in Southern Italy. Over twenty years, nearly six hundred sites, ranging in date from the prehistoric through the modern periods, were documented in an area of approximately forty square kilometers, resulting in a comprehensive record of the chora's occupation and settlement over the course of more than six thousand years. This volume presents compelling new documentation of the expansive nature and dense population of rural settlement in the western Greek colonies. The larger archaeological survey is complemented by specialist studies on the environment and landscape (geology and geomorphology), the classes of artifacts (stone tools, ceramics, and metal objects) of greatest cultural and chronological significance, and the methods and procedures employed before, during, and after the fieldwork. This volume is also one of the first studies of its kind to employ Geographic Information Systems software (GIS), remotely-sensed data (aerial photography, satellite imagery, digital terrain models), mathematical modeling, and three-dimensional rendering as the platform for spatial analysis and interpretation, alongside traditional statistical analyses using databases. The text is richly illustrated with hundreds of line drawings, photographs, and maps, and a separate large-format atlas will contain detailed maps of the entire study area.
