Many primary teachers need help with their personal subject knowledge in science. Now that there is a nationally published scheme of work for science in primary schools, many teachers also need

help in constructing lesson plans in order to cover all of the themes and possible activities in the scheme. Designed with those needs in mind, this book provides practical help in the form of sample lesson plans together with linked background subject knowledge for each of the science topics in the primary national curriculum. Each chapter has sample lesson plans for four different age-groups: reception, years 1-2, years 3-4 and years 5-6.
