Farming for Health Edinburgh University Press

Join Jules on an imaginative quest for a pet in this hilarious picture book filled with vibrant illustrations and a wild menagerie of animals. Jules has a plan, a wild plan. He wants a pet, but first, he has to convince his reluctant mom. He asks for a lion! Then he tries for a hippo. He even says he wants a goat. Mark Janssen's noisy, boisterous illustrations bring this romping story to life as animals from Jules' imagination swing and stomp onto the pages. Children will love the fun premise of the book. And it won't be long before parents are asked, "May I please have a pet lion?"

How to Study Public Life Hatje Cantz Verlag

A winner of the European Publishers Award for Photography, Ambroise wanders through Beijing find a city caught between two worlds - an ancient past and a frenzied present.

Making Africa« takes a fresh look at African design. For the first time, we have a book that focuses on creative accomplishments on the continent, without being obsessed with the usual tropes of recycling, humanitarian design or traditional crafts. Instead, »Making Africa« shows a new generation of designers who use their work as a tool for economic, political and social change and therefore also to create a new future for the continent. Their creative output defies all definitions of genres - crossing over classical fields such as furniture design, product design and typography to encompass digital media, art, photography, architecture and film. A large section of the catalogue is dedicated to documenting work by over 120 protagonists of Africa's new creative epoch - including Cyrus Kabiru, Cheick Diallo, Mário Macilau, Francis Kéré, David Adjaye, Kunlé Adeyemi, Bodys Isek Kingelez, Robin Rhode, Alaforu Sikoki, Selly Raby Kan and many more. The historical and theoretical background is explored in essays and discussions with Okwui Enwezor, Koyo Kouoh, Edgar Pieterse and Amelie Klein, among others. These are complemented by statements from around 70 other experts from Africa, who met at interviews and think tanks in cities such as Cape Town, Johannesburg, Lagos, Dakar, Nairobi and Cairo. This is a book about the future of Africa and about a new, more open way of understanding design - which means it is also a book about what design can achieve in the 21st century.

Africa Junctions Tra Publishing

The events of 1968 have been seen as a decisive turning point in the Western world. The author takes a critical look at "May 1968" and questions whether the events were in fact as "revolutionary" as French and foreign commentators have indicated. He concludes the student movement changed little that had not already been challenged and altered in the late fifties and early sixties. The workers' strikes led to fewer working hours and higher wages, but these reforms reflected the secular demands of the French labor movement. "May 1968" was remarkable not because of the actual transformations it wrought but rather by virtue of the revolutionary power that much of the media and most scholars have attributed to it and which turned it into a symbol of a youthful, renewed, and freer society in France and beyond.

Liberalism at Work BoD - Books on Demand

How do we accommodate a growing urban population in a way that is sustainable, equitable, and inviting? This question is becoming increasingly urgent to answer as we face diminishing fossil-fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture, knowledge, and finance. Jan Gehl has been examining this question since the 1960s, when few urban designers or planners were thinking about designing cities for people. But given the unpredictable, complex and ephemeral nature of life in cities, how can we best design public infrastructure—vital to cities for getting from place to place, or staying in place—for human use? Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space. In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw

from their combined experience of over 50 years to provide a history of public-life study as well as methods and tools necessary to recapture city life as an important planning dimension. This type of systematic study began in earnest in the 1960s, when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city. City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems. Studies can be used as input in the decision-making process, as part of overall planning, or in designing individual projects such as streets, squares or parks. The original goal is still the goal today: to recapture city life as an important planning dimension. Anyone interested in improving city life will find inspiration, tools, and examples in this invaluable guide.

Love in Old Cloathes and Other Stories Egmont Modern Classics

Bill wakes up one morning and finds that he has turned into a girl. From this experience, he learns how ridiculous gender constraints are.

Autonomous Driving Bloomsbury Academic

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.

Campingplätze und Feriendörfer in Italien. Ausgabe 2005 Touring Editore

Our lives today are oppressed by the demand that we live, feel and experience with ever greater intensity. We are enticed to try exotic flavors and smells; urged to enjoy a wide range of sexual experiences; pushed to engage in extreme sports and recreational drugs - all in the pursuit of some new, unheard-of intensity. Tristan Garcia argues that such intensity rarely lives up to its promise. It always comes at a price: one that defines the ethical predicament of contemporary life. The notion of intensity was the hidden key to Garcia's landmark book *Form and Object*. In *The Life Intense*, the first part of his ambitious *Letting Be* trilogy, he begins to develop it in detail. This first book focuses on ethics; the forthcoming volumes will be devoted to politics and then metaphysics.

Visions for Global Tourism Industry Apa Publications (UK) Limited

Built and designed by Ludwig Mies van der Rohe 1928–1930, the Tugendhat House in Brno / Czech Republic is one of the most significant buildings of European modernism. In 2001, UNESCO added the house to the List of World Cultural Heritage Sites. In this third, updated edition, the authors give personal and historic insights relating to the house; also documenting aspects pertaining to art history and conservation-science studies. The comprehensive description and in-depth discussion of the materials used is a special feature in this field of research. The appeal of this monograph lies in the publication of photographs from the family archive which, for the first time, show the house in its lived-in condition. The experimental artistic color photographs by Fritz Tugendhat are among the pioneering achievements of amateur photography.

Edited by Jeffrey Kastner, Sina Najafi and Frances Richard. Essay by Jeffrey Kroessler.

I Want a Lion Georgetown University Press

For more than 20 years, the Swiss architect Peter Markli has been constructing smaller buildings - mainly houses - in concrete. In his work this humble material is rendered sensuous through traces of the formboards and the seams and slight variations in colour. A companion volume to Peter Zumthor: *Thermal Bath at Vals*, this publication will relate Markli's approach to design.

Presented from the perspectives of a former FBI profiler and a forensic violence-risk expert, *Profiling Violent Crime: A Behavioral and Forensic Approach* educates readers about the nature of criminal profiling including how it works, the techniques it draws on, the types of offenders it applies to, and the psychological make-ups of those offenders. Drawing from technique, as well as from theory and the latest clinical research, *Profiling Violent Crime* delves into precisely what it means to profile. Students learn what it's like to be on the ground as an FBI profiler, dispelling myths and detailing the actual process. Subsequent chapters detail crime scene analysis; determination of the type of offender that may be at work; the fascinating interplay between mental illness and criminality; and breakdowns of the various types of criminal offenders including stalkers, murderers, rapists, mass murderers, and serial killers. The book also offers multiple real-life case examples to shed light further into the criminal mind. Rooted in the authors' personal experience in law enforcement and forensic psychology *Profiling Violent Crime* is an excellent text for courses in criminal justice, psychological profiling, and forensic psychology. It provides readers with real, intimate insight into criminal profiling, addressing its strengths and drawbacks, as well as offering a glimpse of where this crucial field has yet to go.

Statement on the Defence Estimates 1990 Die Gestalten Verlag-DGV

Rock climbing is probably the last thing that comes to mind when most people hear the word 'Palestine.' But rock climbing turns out to be an incredible medium through which to explore this beautiful, troubled land. *Climbing Palestine* is the first comprehensive guidebook to rock climbing in the West Bank, detailing over 300 climbing routes at 9 different areas. The book also describes how to travel to and within Palestine, where to stay, what to do on rest days from climbing, and where to eat the most delicious local food. Each chapter features detailed information on the history and access information for each cliff. All of the routes are accompanied by short descriptions, the French grade, and information on the required gear. The book offers unique insights into the political situation and local culture. By publishing this guidebook, the authors hope to put Palestine and its amazing rock on the international climbing map, encourage foreigners to visit and climb in this rich, incredible place, and advocate increased freedom of movement for Palestinians. This is your tool to visit and climb in Palestine!

Climbing Palestine Birkhäuser

Presents an analysis of the Occupational Safety and Health Administration.

Terra Incognita Cognella Academic Publishing

Farming for Health describes the use of farms, farm animals, plants and landscapes as a base for promoting human mental and physical health and social well-being. The book offers an overview of the development of 'Farming for Health' initiatives across Europe, resulting from changing paradigms in health care and the demand for new social and financial activities in agriculture and rural areas. The contributors are drawn from a range of countries and disciplines.

Goodwood Revival Lars Muller Publishers

Boon or blight? Ann Bowman and Michael Pagano define "vacant land" broadly, to include everything from brownfields (environmentally contaminated land) through trashed lots and abandoned buildings to greenspace (parks, community gardens, etc.). *Terra Incognita* takes a fresh look at what they believe can be the ultimate urban resource. Beyond the common studies of the influence of market forces, it explores how these areas are affected by the decisions of local governments, and then shows how vacant land can be a valuable strategic asset for localities. *Terra Incognita* derives from what—until now—has been the lack of substantial information about the amount and the diversity of urban vacant land. This book is based on an unprecedented survey sent to all U.S. towns with a population greater than 50,000, and contains data previously unavailable. Three cities were studied in greater depth for detailed case studies: the greater Phoenix and Seattle areas and Philadelphia-Camden. A number of other cities are cited frequently, including Boston, Chicago, Detroit, New York, Cleveland, Cincinnati, and Oklahoma City, among many others. Identifying the fiscal, social, and development imperatives that drive the decisions local officials make about using

vacant land, Bowman and Pagano pay particular attention to the varying dynamics of sales, property, and income taxes, and conclude with a model for making strategic decisions about land use based on a city's priorities.

Cities of the world Delius Klasing Verlag GmbH

This is the first English translation of the seminar Martin Heidegger gave during the Winter of 1934-35, which dealt with Hegel's *Philosophy of Right*. This remarkable text is the only one in which Heidegger interprets Hegel's masterpiece in the tradition of Continental political philosophy while offering a glimpse into Heidegger's own political thought following his engagement with Nazism. It also confronts the ideas of Carl Schmitt, allowing readers to reconstruct the relation between politics and ontology. The book is enriched by a collection of interpretations of the seminar, written by select European and North American political thinkers and philosophers. Their essays aim to make the seminar accessible to students of political theory and philosophy, as well as to open new directions for debating the relation between the two disciplines. A unique contribution, this volume makes available key lectures by Heidegger that will interest a wide readership of students and scholars.

From Somewhere to Nowhere Cornell University Press

We have been witnessing huge competition among the organisations in the business world. Companies, NGO's and governments are looking for innovative ways to compete in the global tourism market. In the classical literature of business the main purpose is to make a profit. However, if purpose only focus on the profit it will not be easy for them to achieve. Nowadays, it is more important for organisations to discover how to create a strong strategy in order to be more competitive in the marketplace. Increasingly, organisations have been using innovative approaches to strengthen their position. Innovative working enables organisations to make their position much more competitive and being much more value-orientated in the global tourism industry. In this book, we are pleased to present many papers from all over the world that discuss the impact of tourism business strategies from innovative perspectives. This book also will help practitioners and academicians to extend their vision in the light of scientific approaches.

The Just City Dewi Lewis Publishing

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Approximations Routledge

"High-population centers of enormous size are springing up in China with dizzying speed. With them comes an increased demand for migrant workers in the construction sector, factories and mines. Some 150 million people have already set out from underdeveloped provinces to earn their living in the growth centers of China. The photographer Andreas Seibert accompanied migrant workers over a period of several years in order to document their lives and work. These laborers allowed him to photograph their efforts to find a better life and a brighter future."--Back cover.
