Honorable Mention, Bolton Memorial Prize, Conference on Latin American History A government monopoly provides an excellent case study of state-society relationships. This is especially true of the tobacco monopoly in colonial Mexico, whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income. This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth-century Mexican social and economic history, from issues of economic growth and the supply of agricultural credit to rural relations, labor markets, urban protest and urban workers, class formation, work discipline, and late colonial political culture. Drawing on exhaustive research of previously unused archival sources, Susan Deans-Smith examines a wide range of new questions. Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it? How profitable were the tobacco manufactories, and how rational was their organization? What impact did the reorganization of the tobacco trade have upon those people it affected most—the tobacco planters and tobacco workers? This research uncovers much that was not previously known about the Bourbon government's management of the tobacco monopoly and the problems and limitations it faced. Deans-Smith finds that there was as much continuity as change after the monopoly's establishment, and that the popular response was characterized by accommodation, as well as defiance and resistance. She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering, entrenched opposition. Rather, an emphasis upon political stability and short-term profits prevented any innovative reforms that might have improved the monopoly's long-term performance and productivity. With detailed quantitative data and rare material on the urban working poor of colonial Mexico, Bureaucrats, Planters, and Workers will be important reading for all students of social, economic, and labor history, especially of Mexico and Latin America.

El propósito de este libro es proponer un modelo que permita explicar los cambios ocurridos en el sector financiero en Colombia entre 1990 y 2010, y sus principales impactos en las organizaciones del sector, en relación con el poder organizado visto desde la concentración de la propiedad y las formas corporativas de gobierno, y se convierta, en una herramienta para el análisis de los cambios organizacionales en empresas y organizaciones de otros sectores. Esta dinámica sectorial fue inicialmente desarrollada a partir de la política de apertura económica y la incursión decidida del país en una economía globalizada. El libro es el resultado de un proceso de investigación, donde la pregunta de investigación surge luego de percibir las transformaciones en el sector financiero colombiano y el desempeño organizacional de las más importantes organizaciones bancarias del país. Esta solución exige disponer de información respecto a las características de funcionamiento de la bomba como turbina y en especial las particularidades del trabajo conjunto

con el motor asíncrono como generador; aplicación que se ha investigado por el grupo de investigación "Sistemas Hidroeléctricos de Generación SHG" en el tema de "energización rural", cuyos resultados le han permitido validar diferentes métodos en condiciones de laboratorio y ha encontrado que es una solución confiable y de bajo costo.

In 1800, the per capita income of the United States was twice that of Mexico and roughly the same as Brazil's. By 1913, it was four times greater than Mexico's and seven times greater than Brazil's. This volume seeks to explain the nineteenth-century lag in Latin American economic development. Breaking with the longstanding dependency tradition in Latin American historiography, the contributors argue that the slowdown had far more to do with internal political and legal structures than foreign influences. Topics covered include the performance of Mexico and Brazil, the impact of independence, capital markets, regional growth, the impact of railroads, and the economic effects of 'culture'. The editor's introductory essay surveys the history of economic growth theories and Latin American economic historiography. -- Publisher's description.

Born in Nicaragua, Rubén Darío is known as the consummate leader of the Modernista movement, an esthetic trend that swept the Americas from Mexico to Argentina at the end of the nineteenth century. Seeking a language and a style that would distinguish the newly emergent nations from the old imperial power of Spain, Darío's writing offered a refreshingly new vision of the world—an artistic sensibility at once cosmopolitan and connected to the rhythms of nature. The first part of this collection presents Darío's most significant poems in a bilingual format and organized thematically in the way Darío himself envisioned them. The second part is devoted to Darío's prose, including short stories, fables, profiles, travel writing, reportage, opinion pieces, and letters. A sweeping biographical introduction by distinguished critic Ilan Stavans places Darío in historical and artistic context, not only in Latin America but in world literature. When Porfirio Díaz extended his modernization initiative in Mexico to the administration of public welfare, the families and especially the children of the urban poor became a government concern. Reforming the poor through work and by bolstering Mexico's emerging middle class were central to the government's goals of order and progress. But Porfirian policies linking families and work often endangered the children they were supposed to protect, especially when state welfare institutions became involved in the shadowy traffic of child labor. The Mexican Revolution, which followed, generated an unprecedented surge of social reform that was focused on families and accelerated the integration of child protection into public policy, political discourse, and private life. ø In ways that transcended the abrupt discontinuities and conflicts of the era, Porfirian officials, revolutionary leaders, and social reformers alike invoked idealized models of the Mexican family as the primary building block of society, making families, especially those of Mexico's working classes, the object of moralizing reform in the name of state construction and national progress. Domestic Economies: Family, Work, and Welfare in Mexico City, 1884?1943 analyzes family practices and class formation in modern Mexico by examining the ways in which family-oriented public policies and institutions affected cross-class interactions as well as relations between parents and children.
