STEPHENSON STARK

Weiwei-isms Vintage
Concise lessons in
design, drawing, the
creative process, and
presentation, from the
basics of "How to Draw
a Line" to the

complexities of color
theory. This is a book
that students of
architecture will want
to keep in the studio
and in their backpacks.
It is also a book they
may want to keep out
of view of their
professors, for it
expresses in clear and
simple language things
that tend to be murky
and abstruse in the

classroom. These 101 concise lessons in design, drawing, the creative process, and presentation—from the basics of "How to Draw a Line" to the complexities of color theory—provide a much-needed primer in architectural literacy, making concrete what too often is left nebulous or open-ended in the architecture curriculum. Each lesson utilizes a two-page format, with a brief explanation and an illustration that can range from diagrammatic to whimsical. The lesson on "How to Draw a Line" is illustrated by examples of good and bad lines; a lesson on the dangers of awkward floor level changes shows the television actor Dick

Van Dyke in the midst of a pratfall; a discussion of the proportional differences between traditional and modern buildings features a drawing of a building split neatly in half between the two. Written by an architect and instructor who remembers well the fog of his own student days, *101 Things I Learned in Architecture School* provides valuable guideposts for navigating the design studio and other classes in the architecture curriculum. Architecture graduates—from young designers to experienced practitioners—will turn to the book as well, for inspiration and a guide back to basics when solving a complex

design problem. The Architect Says Courier Corporation The New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In

his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort-- even their own

survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking. The Monk Who Sold his Ferrari Princeton Architectural Press A classic examination of superb design through the centuries. Widely regarded as a classic in the field, Experiencing Architecture explores the history and

promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past, Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in "a remarkably suitable comeliness." While we cannot return to a

former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit, but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. Experiencing Architecture reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging

and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”

Let's Make Love

Princeton Architectural Press

The quotable Ai Weiwei
This collection of quotes demonstrates the elegant simplicity of Ai Weiwei's thoughts on key aspects of his art, politics, and life. A master at communicating powerful ideas in astonishingly few words, Ai Weiwei is known for his innovative use of social media to disseminate his views. The short quotations presented here have been carefully selected from articles, tweets, and interviews given by this acclaimed Chinese artist and activist. The book is organized into

six categories: freedom of expression; art and activism; government, power, and moral choices; the digital world; history, the historical moment, and the future; and personal reflections. Together, these quotes span some of the most revealing moments of Ai Weiwei's eventful career—from his risky investigation into student deaths in the 2008 Sichuan earthquake to his arbitrary arrest in 2011—providing a window into the mind of one of the world's most electrifying and courageous contemporary artists. Select Quotes from the Book: On Freedom of Expression "Say what you need to say plainly, and then take responsibility for it." "A small act is worth a

million thoughts." "Liberty is about our rights to question everything." On Art and Activism "Everything is art. Everything is politics." "The art always wins. Anything can happen to me, but the art will stay." "Life is art. Art is life. I never separate it. I don't feel that much anger. I equally have a lot of joy." On Government, Power, and Making Moral Choice "Once you've tasted freedom, it stays in your heart and no one can take it. Then, you can be more powerful than a whole country." "I feel powerless all the time, but I regain my energy by making a very small difference that won't cost me much." "Tips on surviving the regime: Respect yourself and speak for

others. Do one small thing every day to prove the existence of justice." On the Digital World "Only with the Internet can a peasant I have never met hear my voice and I can learn what's on his mind. A fairy tale has come true." "The Internet is uncontrollable. And if the Internet is uncontrollable, freedom will win. It's as simple as that." "The Internet is the best thing that could have happened to China." On History, the Historical Moment, and the Future "If a nation cannot face its past, it has no future." "We need to get out of the old language." "The world is a sphere, there is no East or West." Personal Reflection "I've never planned any part of my

career—except being an artist. And I was pushed into that corner because I thought being an artist was the only way to have a little freedom." "Anyone fighting for freedom does not want to totally lose their freedom." "Expressing oneself is like a drug. I'm so addicted to it." Everybody Has Everything Grove/Atlantic, Inc. Pioneering manifesto by founder of "International School." Technical and aesthetic theories, views of industry, economics, relation of form to function, "mass-production split," and much more. Profusely illustrated. Talking Architecture Farrar, Straus and Giroux "An inspirational reference with words

from the likes of Saul Bass, Stephen Doyle, Milton Glaser, Chip Kidd and Paula Scher.”
—Cool Hunting
Whether musing about the creative process, the merits of failure and criticism, or the challenges of keeping the studio lights on, designers have opinions. The Designer Says is a compendium of quotations from more than one hundred of history’s leading practitioners. On the page they’re mixed like guests at a dinner party—a nineteenth-century designer might sit next to one working today, or two contemporary designers may strike up a conversation. Listen in as they compliment, provoke, and one-up each other in this lively volume of insights for anyone

curious about the ideas and personalities that shape the art of visual communication. This beautifully designed (of course!) compendium features quotations from * Otl Aicher * Saul Bass * Michael Bierut * Irma Boom * Robert Brownjohn * Matthew Carter * Art Chantry * Ivan Chermayeff * Seymour Chwast * Elaine Lustig Cohen * William Drenttel * Charles and Ray Eames * Ed Fella * Alan Fletcher * Adrian Frutiger * Eric Gill * Milton Glaser * Jessica Helfand * Experimental Jetset * Ellen Lupton * Karel Martens * Debbie Millman * L'szl Moholy-Nagy * Bruno Mari * Paul Rand * Michael Rock * Aleksandr Rodchenko * Paula Scher * Kurt Schwitters * Erik Spiekermann * Jan Tschichold *

How can a centrifuge be used to reverse male-pattern baldness? Do whales experience the passage of time at a faster rate than surface-dwellers? And why does Garfield hate Mondays -- he doesn't even have a job! The answers to these and literally dozens of other questions are found in this hilarious collection of conversations between Kris Straub and David Malki !, the hosts of Tweet Me Harder, the world's first, best, only, and last talkback-enabled interactive audio podblast. This first volume collects Episodes 1-10 of the

popular podblast -- an iTunes staff favorite -- and adds annotations, illustrations and indexing for rapid reference. Never wonder again how many grappling-hooks it takes to brake a car, or whether Minnie Mouse was coming on to you back in the nineties, or who won the rap battle with Fake Stan Lee: all the answers are here in the book. iTunes listener reviews of Tweet Me Harder: "A dadaist masterpiece, Tweet Me Harder provides the driest wit and humor this side of the Atlantic Ocean." "[Kris and David have a] trademark ability to craft a tangential 20-minute conversation on absolutely any topic on a dime that's not only informed and weird, but entertaining."

"When Kris and David get off on a jag on some ludicrous entrepreneurial idea, whether about wind-tunnel-based hair-replacement systems, variable-configuration clothing maintained by spiders, or simply a special radio to talk to schizophrenics -- this show is golden." Talking Architecture is a part of the series of Ramin Jahanbegloo's conversations with prominent Indian intellectuals. This revised edition presents additional visuals and an extended dialogue between Jahanbegloo and Raj Rewal, one of

India's leading architects. The conversation flows effortlessly and we learn of Rewal's early life and experiences in Europe. The discussions also encompass the aesthetic foundations of Indian architecture as well as the role of architecture in the twenty-first century. *Deep Things Out of Darkness* Darton Longman and Todd

Three of Patience Strong's most treasured and enduring anthologies of daily readings are brought together in one volume. *The Birthday Book* Reflections on the beauty of nature, through to thoughts about gardens, friendship, life and love. A selection of short passages for every day of the year,

all from the hand of Patience Strong, and all with the power to touch the heart. The Friendship Book Poems and prose from many sources, ranging from the Bible and Shakespeare to Wordsworth, Jane Austen and Patience Strong herself. The Bedside Book More of Patience Strong's much loved readings, combined with a selection of quotations from the notebook in which she jotted down the things that appealed to her over the years. A beautiful combination of her own simple but delightful philosophy and well-chosen words from others.

Anti-architecture and
Deconstruction

Princeton University
Press
If there's anything

architects like doing more than designing buildings, it's talking about architecture. Whether musing about their inspirations (a blank sheet of paper, the sun hitting the side of a building), expanding on each other's thoughts (on materials, collaboration, clients, and constraints), or dishing out a clever quip, architects make good copy. The Architect Says is a colorful compendium of quotations from more than one hundred of history's most opinionated design minds. Paired on page spreads like guests at a dinner party-an architect of today might sit next to a contemporary or someone from the eighteenth century-these sets of quotes

convey a remarkable depth and diversity of thinking. Alternately wise and amusing, this elegant gem of a book makes the perfect gift for architects, students, and anyone curious about the ideas and personalities that have helped shape our built world.

The Twelve Immutable Laws of Humor

Chronicle Books

A WONDROUS NEW BOOK OF MCPHEE'S PROSE PIECES—IN MANY ASPECTS HIS MOST PERSONAL IN FOUR DECADES The brief, brilliant essay "Silk Parachute," which first appeared in *The New Yorker* a decade ago, has become John McPhee's most anthologized piece of writing. In the nine other pieces here—highly varied in length and theme—McPhee

ranges with his characteristic humor and intensity through lacrosse, long-exposure view-camera photography, the weird foods he has sometimes been served in the course of his reportorial travels, a U.S. Open golf championship, and a season in Europe "on the chalk" from the downs and sea cliffs of England to the Maas valley in the Netherlands and the champagne country of northern France. Some of the pieces are wholly personal. In luminous recollections of his early years, for example, he goes on outings with his mother, deliberately overturns canoes in a learning process at a summer camp, and germinates a future book while riding on a

jump seat to away games as a basketball player. But each piece—on whatever theme—contains somewhere a personal aspect in which McPhee suggests why he was attracted to write about the subject, and each opens like a silk parachute, lofted skyward and suddenly blossoming with color and form.

Towards a New Architecture Hachette UK

Compelling quotations from 150 chefs—including James Beard, Julia Child, Gordon Ramsay, April Bloomfield—to inspire and delight professional chefs, foodies, and anyone who's ever resolved a crisis by adding more butter. "Clean plates don't lie." —Dan Barber

Great chefs are not self-effacing or meek—there's no room for indecision in the professional kitchen, where the slightest stumble can send an entire restaurant into the weeds. So it follows that even in quieter moments, what chefs have to say is usually opinionated and always illuminating. The Chef Says invites readers to the ultimate food-lover's dinner party, where cooks from ancient Greece rub shoulders and talk shop with today's rising stars. These unruly culinarians compliment, compete, and disagree with one another as they discuss childhood and training, taste preferences and trends, the quest for perfection, and the grueling but

exhilarating business of opening a restaurant. *The Chef Says* will captivate anyone who has ever worked in a kitchen, been inspired by a flawlessly ripe tomato, or resolved a crisis by adding more butter. . The first compendium to focus on quotations from chefs themselves, it is the perfect gift for professionals, foodies, home cooks, and anyone interested in culinary culture . Features 150 quotes from an international roster of chefs, including Ferran Adrià, Lidia Bastianich, Mario Batali, James Beard, Daniel Boulud, Anthony Bourdain, David Chang, Julia Child, Tom Colicchio, Elizabeth David, Wylie Dufresne, Gabrielle Hamilton, Thomas Keller, Jim Lahey, Sarabeth

Levine, Edna Lewis, Anita Lo, Gordon Ramsay, Marcus Samuelsson, Andre Soltner, Charlie Trotter, Jean-Georges Vongerichten, Alice Waters, and many others . The fourth volume in our successful *Words of Wisdom* series (following *The Architect Says*, *The Designer Says*, and *The Filmmaker Says*) . Authors Nach Waxman and Matt Sartwell are the owner and manager, respectively, of the celebrated *Kitchen Arts & Letters* bookstore in New York City, which offers 13,000 food- and drink-related titles

Ask a Manager
"O'Reilly Media, Inc."
From Pulitzer Prize-winning architectural critic Paul Goldberger: an

engaging, nuanced exploration of the life and work of Frank Gehry, undoubtedly the most famous architect of our time. This first full-fledged critical biography presents and evaluates the work of a man who has almost single-handedly transformed contemporary architecture in his innovative use of materials, design, and form, and who is among the very few architects in history to be both respected by critics as a creative, cutting-edge force and embraced by the general public as a popular figure. Building Art shows the full range of Gehry's work, from early houses constructed of plywood and chain-link fencing to lamps made in the shape of fish to the

triumphant success of such late projects as the spectacular art museum of glass in Paris. It tells the story behind Gehry's own house, which upset his neighbors and excited the world with its mix of the traditional and the extraordinary, and recounts how Gehry came to design the Guggenheim Museum in Bilbao, Spain, his remarkable structure of swirling titanium that changed a declining city into a destination spot. Building Art also explains Gehry's sixteen-year quest to complete Walt Disney Concert Hall, the beautiful, acoustically brilliant home of the Los Angeles Philharmonic. Although Gehry's architecture has been written about widely, the story of his

life has never been told in full detail. Here we come to know his Jewish immigrant family, his working-class Toronto childhood, his hours spent playing with blocks on his grandmother's kitchen floor, his move to Los Angeles when he was still a teenager, and how he came, unexpectedly, to end up in architecture school. Most important, *Building Art* presents and evaluates Gehry's lifetime of work in conjunction with his entire life story, including his time in the army and at Harvard, his long relationship with his psychiatrist and the impact it had on his work, and his two marriages and four children. It analyzes his carefully crafted

persona, in which a casual, amiable "aw, shucks" surface masks a driving and intense ambition. And it explores his relationship to Los Angeles and how its position as home to outsider artists gave him the freedom in his formative years to make the innovations that characterize his genius. Finally, it discusses his interest in using technology not just to change the way a building looks but to change the way the whole profession of architecture is practiced. At once a sweeping view of a great architect and an intimate look at creative genius, *Building Art* is in many ways the saga of the architectural milieu of the twenty-first century. But most of all

it is the compelling story of the man who first comes to mind when we think of the lasting possibilities of buildings as art.

An Exact Replica of a Figment of My Imagination Pharos Books

For a century and a half, the artists and intellectuals of Europe have scorned the bourgeoisie. And for a millennium and a half, the philosophers and theologians of Europe have scorned the marketplace. The bourgeois life, capitalism, Mencken's "booboisie" and David Brooks's "bobos"—all

have been, and still are, framed as being responsible for everything from financial to moral poverty, world wars, and spiritual desuetude. Countering these centuries of assumptions and unexamined thinking is Deirdre McCloskey's *The Bourgeois Virtues*, a magnum opus that offers a radical view: capitalism is good for us. McCloskey's sweeping, charming, and even humorous survey of ethical thought and economic realities—from Plato to Barbara Ehrenreich—overturns every assumption we have about being bourgeois. Can you be virtuous and bourgeois? Do markets improve ethics? Has capitalism made us better as well as

richer? Yes, yes, and yes, argues McCloskey, who takes on centuries of capitalism's critics with her erudition and sheer scope of knowledge. Applying a new tradition of "virtue ethics" to our lives in modern economies, she affirms American capitalism without ignoring its faults and celebrates the bourgeois lives we actually live, without supposing that they must be lives without ethical foundations. High Noon, Kant, Bill Murray, the modern novel, van Gogh, and of course economics and the economy all come into play in a book that can only be described as a monumental project and a life's work. The Bourgeois Virtues is nothing less than a dazzling

reinterpretation of Western intellectual history, a dead-serious reply to the critics of capitalism—and a surprising page-turner. 14,000 Quips and Quotes Chronicle Books
 "Compelling and sometimes controversial words from the visionaries behind the camera . . . from Charlie Chaplin to Kathryn Bigelow to Akira Kurosawa."
 —Cool Hunting No saint, no pope, no general, no sultan, has ever had the power that a filmmaker has; the power to talk to hundreds of millions of people for two hours in the dark. —Frank Capra Inspiring everything from pop culture earthquakes to popular revolutions, filmmakers have demonstrated an

uncanny ability to move the masses. But the drama they project on screen is only half the picture. Stretching from its earliest days of two-reel silent films to the latest 3D digital blockbusters, film history provides a cast of characters ready to spill witty bon mots, outrageous pronouncements, and heartfelt reflections. *The Filmmaker Says* is a colorful compendium of quotations from more than one hundred of history's most influential and opinionated creators of filmed entertainment. Paired like guests at the ultimate film geek dinner party, a celebrated filmmaker of today might sit next to a silent-era giant as this raucous crew argues, compliments, and disagrees with

each other about every step of the moviemaking process. *The Lawyer Says* Prestel Publishing For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use—or could use—the spaces where they live and work. In this revolutionary book, Gehl presents his latest work creating (or recreating) cityscapes on a human scale. He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be: cities for people. Taking into account changing demographics and changing lifestyles, Gehl emphasizes four

human issues that he sees as essential to successful city planning. He explains how to develop cities that are Lively, Safe, Sustainable, and Healthy. Focusing on these issues leads Gehl to think of even the largest city on a very small scale. For Gehl, the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or

train. This small-scale view, he argues, is too frequently neglected in contemporary projects. In a final chapter, Gehl makes a plea for city planning on a human scale in the fast-growing cities of developing countries. A "Toolbox," presenting key principles, overviews of methods, and keyword lists, concludes the book. The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe.
