Academic Literacy Development

The Construction of Words

MADDEN SHAFFER

Harnessing Technology for Deeper Learning

Samuel French, Inc.
This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a

researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

The Rough Guide to Books for Teenagers W. W. Norton
Jy het by my verbygestrompel en op hierdie dubbelbed

neergeval. Ek het jou na die koppenent se kant toe probeer sleep. Die man wat my knieë lam gemaak het wanneer hy in uniform tussen ander staan, was pap en swaar, 'n dronk pateet. Die Weermag, die noodlot, die sisteem — het 'n man en beskermer, 'n mens wat 'n morele leier kon gewees het, van my gesteel. Die man op ons dubbelbed kon enigets gewees het, enigets. Maar jy moes drink om die oorlog in jou kop beëindig te kry. Die dampe van die drank in die vertrekke van ons huis was oorlogsdampe. Maretha Maartens en Magda Slabbert neem hande om in Klankgrens die verhaal van pyn, oorlewing en die diepe worstelinge van die grensoorlog se weermagvroue oop te vlek. Uit die oogpunt van die vrouens wat moes agterbly, wat moes aanhou, wat moes verstaan, en kop bo water hou, leer ken ons vir Jo en haar kinders en die stryd wat die vrouens gevoer het, weg van die grens.

In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the

Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

Economic and Management Sciences, Grade 9 Solutions for Creating the Lea

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated

and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

This volume focuses on detailed studies of various aspects of Construction Morphology, and combines theoretical analysis and descriptive detail. It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language. It presents applications and extensions of the model of Construction Morphology to a wide range of languages. Construction Morphology is one of the theoretical paradigms in

present-day morphology. It makes use of concepts of Construction Grammar for the analysis of word formation and inflection. Complex words are seen as constructions, that is, pairs of form and meaning. Morphological patterns are accounted for by construction schemas. These are the recipes for coining new words and word forms, and they motivate the properties of existing complex words. Both schemas and individual words are stored, and hence there is no strict separation of lexicon and grammar. In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties. This architecture of the grammar is in harmony with findings from other empirical domains of linguistics such as language acquisition, word processing, and language change.

At first sight, this volume, which contains chapters covering topics ranging from economic methodology through central bank independence to pension systems, might be viewed as a potpourri of largely unrelated issues. Yet these chapters, written by leading researchers in their respective fields, dispel this notion, illustrating the ongoing

merger process between hitherto quite separate economic sub-disciplines.

People are Living There

Springer

She is Helena Bosman, from a tiny little town lost in the vast expanses of the Northern Cape, but Grandpa and Grandma call her Vaselinetjie. She is their little angel from the veldt, the beginning and the end of their world. But when Vaselinetjie is ten years old, two officials from Welfare step in and she is sent away to a boarding school in Gauteng – the orphanage where Madiba's reject children have to live. It's a strange, hard, dangerous world of scum children, bad-tempered matrons and a harsh, unfair principal; a world of smoking cigarette butts,

having one's hair shaved off and making plans to run away. It's a world where no one bothers about anyone else, where you too learn not to give a damn. But as the months turn into years, there is one name that crops up again and again: Texan Kirby. And that name does strange things to Vaselinetjie's heart.
