 Learn the ins and outs of health promotion and disease prevention in Canada with Edelman and Kudzma's Canadian Health Promotion Throughout the Life Span. This all-new, comprehensive text grounds you in the Canadian health objectives for promotion and prevention which aims to improve the health of the entire population and to reduce health inequities among population groups. Among the text's chapters you'll find extensive coverage of growth and development throughout the life span — including coverage of the normal aspects, the unique problems, and the health

promotion needs that are found in each age and stage of development. Separate chapters discuss each population group — the individual, the family, and the community — and highlight the unique aspects of caring for each of these groups. In all, this comprehensive and culturally relevant text provides all the tools needed to stay up on the latest research and topics in Canadian health promotion. The 5 Love Languages Springer

 Didactically, a textbook of criminology should start at the beginning. The learning process, also an emotional process, begins in criminology with the concepts, views, emotions, attitudes and ideas we have regarding crime and criminals. Exploration of these underlying factors is one of the

aims of the present book. We can free our thinking only by being aware of the significance of our own feelings and thoughts about a phenomenon like crime. 'That is the basic problem confronting us. In scientific thinking implicit postulates as to the *sensus communis*, unless recognized and neutralized, grow into idols.' The fight against crime is one example of such an idol. Crimes and criminals exist only by virtue of reactions to certain forms of behavior. For this reason this book will begin by examining the reactions of society to crime.

Criminology is primarily a science of others than offenders. In this sense I invert criminology. The history of criminology is not so much a history of offenders, as a history of the reactions of those in power.

Overcoming app now available via iTunes and the Google Play Store. Depression is one of the most common mental health problems and affects 121 million people at any time. It is recognised by the World Health Organisation as one of the Top 10 most disabling health conditions.

Behavioural Activation, a therapy developed from CBT, is an effective new technique in managing depression and ideally suited to self-help. By analysing, challenging and changing behaviours such as avoidance, ruminating and excessive worrying, the sufferer can gradually reinforce their positive experiences and decrease the behaviour which reinforces their depression. Includes worksheets and practical problem-solving techniques.

Step-by-step approach to analysing and changing behaviours. Includes an explanation of depression and associated behaviours and case studies. Written by leading clinicians in the field.

Career Counseling: A Holistic Approach Elsevier Health Sciences

The argument of this book begins with the proposition that there are certain things we must understand about the criminal sanction before we can begin to talk sensibly about its limits. First, we need to ask some questions about the rationale of the criminal sanction. What are we trying to do by defining conduct as criminal and punishing people who commit crimes? To what extent are we justified in thinking that we can or ought to do what we are trying to do? Is it possible to construct an acceptable rationale for the criminal sanction enabling us to deal with the argument that it is itself an unethical use of social power? And if it is possible, what implications does that rationale have for the kind of conceptual creature that the criminal law is? Questions of this order

make up Part I of the book, which is essentially an extended essay on the nature and justification of the criminal sanction. We also need to understand, so the argument continues, the characteristic processes through which the criminal sanction operates. What do the rules of the game tell us about what the state may and may not do to apprehend, charge, convict, and dispose of persons suspected of committing crimes? Here, too, there is great controversy between two groups who have quite different views, or models, of what the criminal process is all about. There are people who see the criminal process as essentially devoted to values of efficiency in the suppression of crime. There are others who see those values as subordinate to the protection of the individual in his confrontation with the state. A severe struggle over these conflicting values has been going on in the courts of this country for the last decade or more. How that struggle is to be resolved is a second major consideration that we need to take into account before tackling the question of the limits of the criminal sanction. These problems of process are examined in Part II. Part III deals directly with the central problem of defining criteria for limiting the reach of the criminal sanction. Given the constraints of rationale and process examined in Parts I and II, it argues that we have over-relied on the criminal sanction and that we had better start thinking in a systematic way about how to adjust our commitments to our capacities, both moral and operational.

This practical guide presents Leahy's multidimensional model of resistance in cognitive therapy. Richly illustrated with case examples and session vignettes, the book addresses a variety of ways that clients may resist basic therapeutic procedures: noncompliance with agenda setting and homework assignments, splitting transference with other therapists, inappropriate behavior, and premature termination. Underlying processes of resistance are explored, from the desire for validation to risk aversion and self-handicapping. Also highlighted are ways that the therapist's own responses may inadvertently impede change. Provided are innovative tools for getting treatment back on track, including targeted interventions, in-session "experiments," and questionnaires and graphic models to share with clients.

First published in 1978, *The Indonesian Tragedy* is a controversial book that

argues that Indonesia's lack of economic development is due to the blind attempt to force a Western economic model on a population, whose culture and psychology are unsuited to it. The author demonstrates the 'Indonesian Tragedy' not so much by argument, as by depicting the country as he experienced it day to day. In developing his conclusion, he draws on history, and the works of sociologists, some of whom he disagrees with. In this way he sheds light on the predicament of Indonesia and helps to illuminate a problem common to much of the Third World. This book will be of interest to students of history, sociology, journalism, and Southeast Asian studies.

Harvard University Professor David C.

McClelland is chiefly known for his work on achievement motivation, but his research interests extended to personality and consciousness. He pioneered workplace motivational thinking, developing achievement-based motivational theory and models, and promoted improvements in employee assessment methods, advocating competency-based assessments and tests, arguing them to be better than traditional IQ and personality-based tests. His ideas have since been widely adopted in many organisations, and relate closely to the theory of Frederick Herzberg. He is most noted for describing three types of motivational need, which he identified in this book, *The Achieving Society*: 1. achievement motivation (n-ach), 2. authority/power motivation (n-pow), 3. affiliation motivation (n-affil). First published in 1961, his classic book provides a factual basis for evaluating economic, historical, and sociological theories that explain the rise and fall of civilizations.

Anyone interested in discovering their family genealogy should carry a copy of this book everywhere. Written by internationally recognized expert, George

G. Morgan, this book is an irreplaceable resource for beginner to expert knowledge gatherers. Not only does Morgan explain how to get the search started – creating a family tree, locating and evaluating documents, selecting the appropriate hardware and software for the search – he goes steps further and dedicates an entire section to research methods and strategies where he discusses, among other topics, getting past “dead ends,” and organizing possible research travel.

Longtime leader in the luxury goods sector and former Chairman of LVMH Moët Hennessy Louis Vuitton North America reinvents the art and science of brand-building under the rubric of Aesthetic Intelligence. In a world in which people have cheap and easy access to most goods and services, yet crave richer and more meaningful experiences, aesthetics has become a key differentiator for most companies and a critical factor of their success and even their survival. In this groundbreaking book, Pauline Brown, a former leader of the world’s top luxury goods company and a pioneer in identifying the role of aesthetics in business, shows executives, entrepreneurs, and other professionals how to harness the power of the senses to create products, services, and experiences that stand out, resonate with their customers, and create long-term value for their businesses. The power is rooted in Aesthetic Intelligence—or “the other AI,” as Brown refers to it. Aesthetic Intelligence can be learned. Indeed, people are born with far more capacity than they use, but even those that are naturally gifted must continue to refine their skills, lest their aesthetic advantage atrophy. Through a combination of storytelling and practical advice, the author shows how aesthetic intelligence creates business value and how executives, entrepreneurs and others can boost their own AI and successfully apply it to business. Brown offers research, strategies and practical exercises focused on four essential AI skills. Aesthetic Intelligence provides a crucial roadmap to help business leaders build their businesses in their own authentic and distinctive way. Aesthetic Intelligence is about creating delight, lifting the human spirit, and rousing the imagination through sensorial experiences.

The Achieving Society Routledge

This “well-researched, nuanced” study of the rise of social media activism explores how marginalized groups use Twitter to advance counter-narratives, preempt

political spin, and build diverse networks of dissent (Ms.) The power of hashtag activism became clear in 2011, when #IranElection served as an organizing tool for Iranians protesting a disputed election and offered a global audience a front-row seat to a nascent revolution. Since then, activists have used a variety of hashtags, including #JusticeForTrayvon, #BlackLivesMatter, #YesAllWomen, and #MeToo to advocate, mobilize, and communicate. In this book, Sarah Jackson, Moya Bailey, and Brooke Foucault Welles explore how and why Twitter has become an important platform for historically disenfranchised populations, including Black Americans, women, and transgender people. They show how marginalized groups, long excluded from elite media spaces, have used Twitter hashtags to advance counternarratives, preempt political spin, and build diverse networks of dissent. The authors describe how such hashtags as #MeToo, #SurvivorPrivilege, and #WhyIStayed have challenged the conventional understanding of gendered violence; examine the voices and narratives of Black feminism enabled by #FastTailedGirls, #YouOKSis, and #SayHerName; and explore the creation and use of #GirlsLikeUs, a network of transgender women. They investigate the digital signatures of the “new civil rights movement”—the online activism, storytelling, and strategy-building that set the stage for #BlackLivesMatter—and recount the spread of racial justice hashtags after the killing of Michael Brown in Ferguson, Missouri, and other high-profile incidents of killings by police. Finally, they consider hashtag created by allies, including #AllMenCan and #CrimingWhileWhite.

Izan adalah sosok pemuda idealis, cerdas dan berani. Dia menjadi Pegawai Negeri sipil atas keinginan ayahnya. Ayahnya adalah mantan PNS yang mengundurkan diri karena menghindari dari lingkungan birokrasi yang masih menjalankan budaya koruptif. Mereka tinggal di Kota Jambi sebuah kota kecil di Sumatera. Izan dan ayahnya hidup sederhana jauh dari gaya hidup mewah, meskipun kakeknya mantan bupati, pamannya walikota dan keluarga besarnya adalah orang-orang terpandang. Sepeninggal ayahnya, Izan mendapatkan warisan idealisme dan selalu terbawa baik di kehidupan sehari-hari maupun dalam dunia kerjanya. Sering ia menyaksikan perilaku koruptif para birokrat, sehingga Izan bertekad untuk mengubah semua itu, memperbaiki citra PNS yang dikenal sebagai sarang tikus-tikus koruptor.

Sepanjang menjalani karirnya Izan selalu menemui hambatan, dipertanyakan saat seleksi tugas belajar, karir yang terhambat, diskriminasi profesi. Selepas menjalankan tugas belajar izan kembali ke kampung halamannya, namun Izan masih merasakan lingkungan yang sama. Izan mengikuti seleksi mutasi dan lulus, lalu pindah kerja ke Jakarta, Jakarta tumpuan harapannya mewujudkan idealisme, dengan kecerdasannya Izan mendapatkan karir yang baik. Mulai jabatan pertamanya sebagai kepala seksi di kelurahan, di sinilah ia mulai menyadari ada yang salah dalam dunia birokrasi. Pergantian pemimpin Jakarta, mengubah sistem karir PNS Jakarta, Gubernur yang baru sosok idealis menerapkan sistem uji kompetensi dengan leleng jabatan. Di sinilah karir Izan makin naik, ia menjadi lurah dan berprestasi, meningkat lagi menjadi Kepala Kantor. Banyak pihak yang merasa keberadaan Izan adalah sebuah ancaman sehingga berbagai upaya untuk menjatuhkan karir Izan tetapi gagal karena Izan masih dilindungi oleh pemimpin Jakarta yang sejalan dengan idealismenya. Berubahnya suhu politik di Jakarta, berujung dimakzulkannya pemimpin Jakarta. Dimasa transisi kepemimpinan, orang-orang yang dendam dengan Izan mulai mencari kesempatan. Melalui konspirasi Izanpun dijatuhkan dari jabatannya sampai ke titik nol karir. Sebuah pertunjukan ketidakadilan yang sungguh nyata dialaminya. Hancurnya karir Izan tidak membuat hidupnya hancur, justru ia menjadi sadar dan mendapat jawaban mengapa ayahnya memintanya menjadi PNS, perubahan-perubahan yang dilakukan oleh Izan dan berbagai rintangan membuatnya menjadi makin kokoh. Dia menjadi penulis dan motivator bagi PNS-PNS baru. Izan tetap optimis suatu saat akan ada masa dimana sikap idealis bisa diterima di lingkungan birokrasi.

 Buku ini bercerita bagaimana KKN, kalo mendengar singkatan itu kita sering under estimate dengan maknanya. Terlebih saat

ini makna KKN boleh dikatakan mengalami peyorasi atau perubahan makna ke arah yang negatif. Bagaimana tidak, saat ini negara kita Indonesia sedang dilanda fenomena yang bernama Korupsi Kolusi dan Nepotisme atau kalau disingkat juga KKN. Banyak kalangan pejabat di negeri ini yang terlibat kasus korupsi yang dampaknya bisa menyengsarakan masyarakat. Padahal bagi masyarakat dahulu KKN dikenal sebagai kumpulan mahasiswa yang mengabdikan di suatu desa. Berbaur dengan masyarakat dan berkontribusi untuk kemajuan masyarakat. yah, mungkin justru dari sinilah mahasiswa sekarang akan merasa tertantang untuk kembali mempercantik kembali makna KKN. Yakni dengan berkontribusi dalam pengabdian untuk masyarakat melalui program Kuliah Kerja Nyata (KKN) yang benar-benar bisa memberikan dampak positif. Entahlah orang menginterpretasikan KKN itu sebagai Kuliah Kerja Nyata atau Korupsi Kolusi dan Nepotisme, yang terpenting bagi saya menganggap bahwa KKN adalah suatu hal yang mempunyai banyak kisah. Bagi saya, KKN itu tak hanya belajar untuk mengabdikan tapi KKN itu sesuatu hal di mana kita bisa belajar arti kebersamaan. KKN itu kesempatan di mana kita bisa belajar arti komitmen, KKN itu kesempatan di mana kita bisa belajar menghargai dan dihargai. KKN itu kesempatan di mana kita belajar keikhlasan hingga tak jarang pula yang mengatakan KKN itu kesempatan belajar memaknai arti cinta.] [UGM Press, UGM, Gadjah Mada University Press]
