Chemistry 2e is designed to meet the scope and sequence requirements of the two-semester general chemistry course. The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them. The book also includes a number of innovative features, including interactive exercises and real-world applications, designed to enhance student learning. The second edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Substantial improvements have been made in the figures, illustrations, and example exercises that support the text narrative. Changes made in Chemistry 2e are described in the preface to help instructors transition to the second edition.

Princeton Review

From W. Bruce Cameron, the author of the New York Times and USA Today bestselling novel *A Dog's Purpose*, which is now a major motion picture! After 13-year-old Charlie Hall's mother dies and his father retreats into the silence of grief, Charlie finds himself drifting lost and alone through the brutal halls of junior high school. But Charlie Hall is not entirely friendless. In the woods behind his house, Charlie is saved from a mountain lion by a grizzly bear, thought to be extinct in northern Idaho. And this very unusual bear will change Charlie's life forever. Deeply moving, and interwoven with hope and joy, *Emory's Gift* is not only heartwarming and charming coming of age story, but also a page-turning insightful look at how faith, trust, and unconditional love can heal a broken family and bridge the gaps that divide us. *A Dog's Purpose Series #1 A Dog's Purpose #2 A Dog's Journey #3 A Dog's Promise* (forthcoming) Books for Young Readers *Ellie's Story: A Dog's Purpose Puppy Tale Bailey's Story: A Dog's Purpose Puppy Tale Molly's Story: A Dog's Purpose Puppy Tale Max's Story: A Dog's Purpose Puppy Tale Toby's Story: A Dog's Purpose Puppy Tale* (forthcoming) *Shelby's Story: A Dog's Way Home Novel The Rudy McCann Series The Midnight Plan of the Repo Man Repo Madness Other Novels A Dog's Way Home The Dog Master The Dogs of Christmas Emory's Gift* At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Newly Hired Teachers of Science* Houghton Mifflin Harcourt  
The Princeton Review realizes that acing the Biology exam is very different from getting straight As in school. They don't try to teach students everything there is to know about biology--only the techniques they'll need to score higher on the exam. "There's a big difference. In *Cracking the Virginia SOL EOC Biology*, TPR will teach test takers how to think like the test makers and: Learn tips and techniques for solving problems when test takers are

unsure of the answer Improve scores by focusing on the material most likely to appear on the test Test knowledge with review questions for each biology concept covered Master all the material readers will need to know to score higher: the cell, reproduction, genetics, photosynthesis, evolution, ecology, and more \*\*\*This book includes 2 full-length simulated end-of-course Biology exams. All of TPR's sample test questions are just like the ones test takers will see on the actual exam, and TPR fully explains every solution. "Contents Include: The Mystery Exams Structure and Strategies II The Subject Review Scientific Investigations Life at the Molecular Level Photosynthesis and Cellular Respiration The Cell Life at the Systems and Organisms Level Humans Cell Reproduction and Genetics Taxonomy and Ecology III The Princeton Review Practice Tests

*The Structure and Function of Enzymes* McGraw-Hill Education Mitosis/Cytokinesis provides a comprehensive discussion of the various aspects of mitosis and cytokinesis, as studied from different points of view by various authors. The book summarizes work at different levels of organization, including phenomenological, molecular, genetic, and structural levels. The book is divided into three sections that cover the premeiotic and premitotic events; mitotic mechanisms and approaches to the study of mitosis; and mechanisms of cytokinesis. The authors

used a uniform style in presenting the concepts by including an overview of the field, a main theme, and a conclusion so that a broad range of biologists could understand the concepts. This volume also explores the potential developments in the study of mitosis and cytokinesis, providing a background and perspective into research on mitosis and cytokinesis that will be invaluable to scientists and advanced students in cell biology. The book is an excellent reference for students, lecturers, and research professionals in cell biology, molecular biology, developmental biology, genetics, biochemistry, and physiology.

*STAAR Success Strategies EOC Biology: STAAR Test Review for the State of Texas Assessments of Academic Readiness* Princeton Review

This edition of our successful series to support the Cambridge IGCSE Biology syllabus (0610) is fully updated for the revised syllabus for first examination from 2016. Written by an experienced teacher and examiner, Cambridge IGCSE Biology Coursebook with CD-ROM gives comprehensive and accessible coverage of the syllabus content. Suggestions for practical activities are included, designed to help develop the required experimental skills, with full guidance included on the CD-ROM. Study tips throughout the text, exam-style questions at the end of each chapter and a host of revision and practice material on the CD-ROM are designed to help students prepare for their examinations. Answers to the exam-style questions in the

Coursebook are provided on the CD-ROM.
