Balls and Bulldust is a rich collection of images that explores life and work among the cattlemen in the Northern Territory in Australia. It is not another cowboy story, rather one about men and women working very hard, and seeking some kind of solitude and sense of space in the midst of harsh conditions. For some, life in Australia's outback is a life-long routine. The young are attracted by its romanticism, which is more often than not shattered by reality's hardships. The red dust covering this vast scrubby landscape and filling the air is prevalent in Ludwigson's images. Days can be blistering hot and temperatures at nights may sometimes fall below zero. People sleep on swags on the ground for weeks. The food is drab and the men are in their saddles twelve hours a day mustering herds of cattle, branding and castrating young bulls. Hkan Ludwigson, who is one of the world's leading commercial photographers, spent three months with the cattlemen of the Australian outback early in his career, and returned to his native Sweden with a body of work that

became Balls and Bulldust in 2012. The work was first exhibited at Strandverket Konsthall on Marstrand in Sweden in 2012. The exhibition was curated by Hasse Persson.

The second novel from GG finalist and international award winner Kenneth Bonert, who brought Jewish Johannesburg to explosive life in his 2013 debut, *The Lion Seeker*. As the 1980s draw to a close, apartheid is in its death throes and South Africa is a maelstrom of political violence. Young Martin Helger has problems of his own. Out of place at an elite private school, he is the son of a rough-handed scrap dealer and lives in the shadow of his enigmatic brother, a neighbourhood legend. When an irresistible young American boards at the Helger home, a transfixed Martin soon finds himself wrenched out of the isolated bubble of his white privilege and thrust into the raw heart of South Africa's racial struggle. At the same time, secrets from the past begin to emerge and old sins long-buried return in terrifying new ways, tearing at the Helgers, a second-generation Jewish family, even as the larger forces of history and politics tear apart the country. Migration, terrorism, revolution, identity and memory--these are just some of the bold themes brilliantly and honestly explored in this powerful novel. At once a riveting literary thriller, a moving coming-of-age tale, and an unforgettable journey through a fascinating world, *The Mandela Plot* entertains and terrifies in equal measure, and resonates profoundly in light of current affairs.

Throughout the mining and processing of

minerals, the mined ore undergoes a number of crushing, grinding, cleaning, drying, and product sizing operations as it is processed into a marketable commodity. These operations are highly mechanized, and both individually and collectively these processes can generate large amounts of dust. If control technologies are inadequate, hazardous levels of respirable dust may be liberated into the work environment, potentially exposing workers. Accordingly, federal regulations are in place to limit the respirable dust exposure of mine workers. Engineering controls are implemented in mining operations in an effort to reduce dust generation and limit worker exposure.

 TALES OF A YOUNG COUPLE'S YEAR WORKING IN THE OUTBACK VIVIDLY TOLD IN "BULLDUST IN MY BRA". A dream year of working in Outback Australia offered more than Rebecca Long Chaney had anticipated. She had more heat and dust, more exhaustion building fence, more hours herding berserk feral cattle, more snakes and spiders in her sleeping quarters--and more adventure than she'd ever imagined! *Bulldust In My Bra* is the lively, funny story of a brainy and brave woman who took a hiatus from her career as a successful agricultural journalist to travel with her husband into the farthest reaches of the Outback. Their objective: find a cattle station that would accept them as ranch hands and work till they dropped every day. Chaney had grown up on a dairy farm and traveled widely reporting about the agricultural industry. Her husband Lee was the herdsman on a dairy farm. But they wanted a new challenge, and what would be better than the Australian Outback? On the way to Australia, the

Chaney stopped in Tonga, New Zealand and Papua New Guinea for escapades hiking and exploring, but their real adventure began when they arrived in Western Australia with their eager faces and American accents. Their "home" was a ruined shed with wide cracks to the wind and stars, a drippy shower over a mud hole, and lizards that darted across the walls. Chaney soon got over her dismay and came to love their primitive conditions, including the poisonous huntsman spider who was their "shack mate." Her anecdotes, amusing and sad, are full of vivid detail and exude the love she felt for the rough landscape and hardworking people who live there. Her understanding of herself changed, as did her relationship with her husband. The highlights of their months in Australia was the lengthy task of gathering and processing the thousands of cattle that ran wild on the tens of thousands of Ashburton acres. Over several months, the crew chased them on horseback and with adapted cards called "bull-buggies." There was tagging, dehorning, and castrating to be done in the cattle yards. Bulls were separated and hauled in multiunit "road trains" to shipping yards. The hundreds of running cattle churned up the dry earth into a fine "bulldust" that settled on everything--the mark of long days in the bush. Chaney describes their mustering days with such verve that the grueling work seems more like adventure sport than the life work on an Outback station. *Bulldust In My Bra* is a witty and rewarding account of a couple's life-changing year traveling and working half a world from home.
