KARSYN BALLARD

Building Quantities Explained Taylor & Francis
Drawing on a wealth of practical experience, both in the construction industry and teaching students, Chris March presents this study of construction management

and the major aspects of controlling the building process. Covering the stages from the client's initiation, to the final handover of the building, March includes evidence from those currently working in the industry, and covers the key industry requirements: knowing that in today's market place, those

entering the field must be aware of how projects are financed and controlled, and to financially run and maintain a building. Finance and Control for Construction examines the various stages, from development, through the design, to procurement and post-contract processes, and culminates in a discourse on facilities

management. This book is written with a down-to-earth approach, with evidence supporting theories and principles, and is a book that students of construction management and related subjects need if they wish to succeed in the field.

Project Finance for Construction Routledge International Valuation Standards: a guide to the valuation of real property assets is an essential road map to using the new International Valuation Standards in everyday practice for real estate

assets, explains their content, application and operation. It shows how to value assets including property, plant and equipment and is written in an explanatory style using commonly understood business English with as little jargon as possible. It takes a thematic format, focusing on the application of IVSs to investment property and owner-occupied property with the author addressing valuation instruction, operation and reporting under IVSs.

Building Conservation Contracts and Grant Aid CRC Press

The Estimator's Pocket Book is a concise and practical reference covering the main pricing approaches, as well as useful information such as how to process sub-contractor quotations, tender settlement and adjudication. It is fully up-to-date with NRM2 throughout, features a look ahead to NRM3 and describes the implications of BIM for estimators. It includes instructions on how to handle: the NRM

order of cost estimate; unit-rate pricing for different trades; pro rata pricing and dayworks; builders' quantities; approximate quantities. Worked examples show how each of these techniques should be carried out in clear, easy-to-follow steps. This is the indispensable estimating reference for all quantity surveyors, cost managers, project managers and anybody else with estimating responsibilities. Particular attention is given to NRM2, but the overall

focus is on the core estimating skills needed in practice. **Spon's Architects' and Builders' Price Book 2011** Elsevier Science & Technology Spon's Architects' and Builders' Price Book 2012, compiled by Davis Langdon, provides the most accurate, detailed and professionally relevant construction price information currently available for the UK. Its unique Tender Index, updated through the year, provides an ongoing reality check and

adjustment for changing market conditions. This is the o *The Presentation and Settlement of Contractors' Claims - E2* Scientific Publishers Most medium to large construction contracts include a claim for extra payment for variations or disruption to the programme. Whilst the causes of the claim are often well documented, what can and cannot be included in the payment is often misunderstood and the calculation of quantum consequently becomes

vague and poorly substantiated. Thoroughly updated over the previous edition, reflecting pertinent Court decisions on damages and the duty to mitigate, the new edition covers new provisions of the revised JCT 2005 contracts and the 2005 New Engineering Contract. There is substantial additional material on issues arising from time and delay analysis and the financial consequences of changes to time - issues that regularly cause real

problems in the evaluation of quantum for construction claims. Most current books on the subject concentrate on the establishment of liability and the requirements of individual standard forms of contract. This book, however, concentrates on the quantification of claims after liability has been established, regardless of the form of contract used, and sets out the principles and methods that should be reflected in the evaluation of claim quantum and the

standard of substantiation required. It will therefore appeal to those working with both building and engineering contracts. Reviews of the previous edition "Well written and highly informative" Building Engineer "His observations on the assessment of productivity and the use of facilities and equipment are particularly helpful for lawyers, who deal with construction claims" Construction Law Spon's External Works and Landscape Price Book 2013 John Wiley & Sons

"Now substantially revised and fully up-to-date with NRM1 and NRM2, the Quantity Surveyor's Pocket Book remains the essential reference for newly qualified and student quantity surveyors. Outlines all of the practical skills, contractual and management techniques needed in the profession with a no-nonsense approach"--

Routledge

With tender prices rising slightly, looking at price

lists is not enough - you need SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2011 to get a competitive edge.SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK, compiled by Davis Langdon, provides the most accurate, detailed and professionally relevant construction price information currently available for *Highways & Road Construction* CRC Press SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK provides the most

detailed, professionally relevant construction price information currently available for the UK. This year, for the first time, the download includes a versatile and powerful ebook.1. The Preliminaries section has been re-written and based upon the 2005 JCT contract2. The new section on [The Law and Management of Building Subcontracts](#) CRC Press This code of practice, long established as a leading publication for the construction industry,

provides an authoritative guide to essential principles and good practice in estimating for building work. The seventh edition includes new material on estimating strategy, tendering, procedures and best practice, as well as the build-up of unit rates of cost, overheads and profit, and e-commerce.

CIRIA Index of Technical Publications

John Wiley & Sons

There are probably 20-25 subcontracts entered into for every major building contract. However,

despite this, there are relatively few books that discuss the problems particular to the subcontract relationship between main contracts and their subcontractors. This book examines the main issues that lead to disputes between contractors and subcontractors, identifies relevant law, including decisions of the courts, and also provides a view as to how other issues might be decided. The second edition has been extensively revised to cover all the 2005 JCT

subcontracts and works contracts, and recent case law. Four new chapters have been added on subcontractors selected by third parties; organisation of the subcontract; sub-subcontracts; and works contracts under management contracting arrangements. It draws on the author's extensive experience of managing building subcontracts, as well as his involvement in handling over 130 adjudications.

Spon's Architects' and Builders' Price Book

2009 Routledge
 Now in its 28th edition, Spon's External Works and Landscape Price Book 2009 offers the only comprehensive source of information for detailed external works and landscape costs. This year, for the first time, the download includes a versatile and powerful ebook. This edition includes the following new and heavily revised Measured Works items: New Aco Contract Practice for Surveyors John Wiley & Sons

This book describes all the principal methods of arranging letting building contracts for conservation work. It also covers contractor selection, the use of directly employed labour, and contractual considerations.

Delay and Disruption in Construction Contracts
 Taylor & Francis

The approach adopted has been to consider the duties of the surveyor in the light of the principal provisions of the JCT Standard Form of Building Contract, as those duties should be dealt with in

accordance with accepted good practice. This has been supported by detailed examples enabling the reader to appreciate how the provisions of the Standard Form should be addressed and how the duties laid upon the surveyor in relation to them should be discharged.

Code of Estimating

Practice Routledge
 This book provides a detailed guide to the principles and practice of construction contracts. It is written for both students and

professionals working in all branches of surveying and construction. Based around the JCT 05 Standard Building Contracts, it has been fully revised and updated to reflect the latest versions of these contracts. The book sets out clearly what should be done at each stage of the construction contract process. Each step is illustrated with examples of good practice making clear the role and responsibilities of the surveyor and how responsibilities are best

delivered. This fourth edition of Contract Practice for Surveyors builds on the book's reputation for clarity and simplicity to provide the most accessible and useful introductory guide to construction contracts available today.

Construction Management Taylor & Francis

A long established text that aims to meet the needs of students studying building measurement in the early years of quantity surveying and building

degree courses. It contains a careful selection of 28 worked examples embracing all the principal building elements and including alternative constructional methods to illustrate a range of approaches.

Spon's External Works and Landscape Price Book 2010 Taylor & Francis

Now in its 30th edition, SPON'S EXTERNAL WORKS AND LANDSCAPE PRICE BOOK 2011 offers the only comprehensive source of information for detailed external works and

landscape costs. All the items to be found in hard and soft landscape contracts are covered, forming an indispensable reference book for quantity surveyors, landscape architects, contractors and local authority managers - essential for compiling estimates, specifications, bills of quantities and works schedules - and no matter what the size of the project being undertaken. This edition includes new Major Works items: Priced Preliminary section A as NBC layout

Brick and block piers
Green screen Pleached trees
Deadman tree anchoring
Platipus tree watering systems
Electrical infrastructure

labour, materials and other components detailed guidance on wage rates, landscape consultants' fee scales extensive Approximate Estimates section for rapid spot estimating Updated, free of charge, two or three times a year - see inside for registration details. Updates are available online at www.pricebooks.co.uk. ? Buyers of this 2011 edition can make a free internet download of SPON'S EXTERNAL WORKS AND LANDSCAPE price

data, which will run to the end of 2011 and: produce estimate and tender documents generate priced or unpriced schedules access Spon's Approximate Estimates rate data, as well as the Measured Works data adjust rates and data and enter rogue items export schedules into Excel carry out an index search. This year, for the first time, the resources include a versatile and powerful ebook. *Finance and Control for Construction* CRC Press Contractual disputes,

often involving large sums of money, occur with increasing frequency in the construction industry. This book presents - in non-legal language - sound professional advice from a recognized expert in the field on the practical aspects of claims. This edition has been brought right up to date by taking into account legal decisions promulgated over the last 17 years, as well as reflecting the effect of current inflation on claims. The new edition is based on the 1998 JCT

contract. *Fully updated second edition of this practical guide. *Worked examples to back up the advice offered and relate it to practitioners' experience.

International Valuation Standards Routledge

This year's special focus is on water related issues. Now in its 32nd edition, SPON'S EXTERNAL WORKS AND LANDSCAPE PRICE BOOK 2013 offers the only comprehensive source of information for detailed external works and landscape costs. It covers all the items to be

found in hard and soft landscape contracts, and forms an indispensable reference book for **Spon's External Works and Landscape Price** Routledge

The fourth edition of Quantity Surveyor's Pocket Book remains a must-have guide for students and qualified practitioners. Its focused coverage of the data, techniques and skills essential to the quantity surveying role makes it an invaluable companion for everything from initial cost advice to the final

account stage. Key features and updates included in this new edition are as follows: The impact of Brexit on construction and public procurement; New developments in digital construction; Renewed focus on ethics in the industry; Up-to-date analysis of NRM1, 2 and 3; Latest practice guidance notes and government publications; Post-contract administration; A companion website with alternative approaches to taking off quantities using spreadsheets. This text

includes recommended formats for cost plans, developer's budgets, financial reports, financial statements and final accounts. This is the ideal concise reference for quantity surveyors, project and commercial managers, and students of any of the above.

Spon's Mechanical and Electrical Services Price Book 2023 CRC Press

In today's economic turmoil most materials costs are still rising but tender prices are falling sharply. So looking at

price lists is not enough – you need Spon's Architects' and Builders' Price Book 2010 to find out what contractors are actually charging and to get for real price data. Compiled by Davis Langdon, Spon's Architects' and Builders' Price Book provides the most accurate, detailed and professionally relevant construction price information currently available for the UK. Its unique Tender Index, updated through the year, provides an ongoing reality check and

adjustment for changing market conditions. This is the only price book which sets out a detailed cost base for Major Works contracts exceeding £3,500,000 in value. Major changes have been made to this 135th edition: Overheads and profits have been revised sharply downwards to 2.5% in line with actual levels. Preliminaries have also been dropped to 13%, on a lower cost base. And labour rates have been adjusted to reflect today's economic conditions. As well as

updating all prices, Spon's Architects' and Builders' Price Book 2010 includes about 150 new Measured Works items, including: Additional ACO drainage systems such as Qmax – a large capacity drainage channel and Kerbdrain made from recycled and recyclable material An overhauled Kalzip roofing section Plus, over 900 key Approximate Estimate items with high & low rate ranges And 13 elemental building cost models Buyers of this 2010 edition can make a free internet download of

Spon's Architects' and Builders' price data, which will run to the end of 2010 and: – Access Spon's new Approximate Estimates rate data, as well as the Measured Works data – Produce estimate and tender documents – Generate priced or unpriced schedules – Adjust rates and data and enter rogue items – Export schedules into Excel – Carry out an index search This year, for the first time, the download includes a versatile and powerful ebook. ...plus all the standard features you

have come to expect from Spon's Architects' and Builders' Price Book: – 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups – 600 pages of Major and Minor Works items – Hundreds of alternative materials prices, easily substituted into the build-up calculations, for the more unusual items – Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus

useful formulae, design
