This textbook provides a comprehensive introduction to modern strategy, covering the context, theory, and practice of military strategy in all its different forms. Covering all the main issues in the field, the book explores the major themes through a combination of classical and modern strategic theory, history, and current practice. It is split into three main sections: The first provides the context for contemporary strategy and includes discussions of the human, technological, intelligence, ethical, and grand strategic dimensions. The second part explores the theory

and practice of strategy in different geographical domains, including land, sea, air, space, and cyberspace. The final part engages with three of the most challenging forms of strategy in the contemporary era: nuclear weapons, terrorism, and insurgency. This second edition brings the book up to date by including discussions of the rise and fall of the Islamic State of Iraq and Syria (ISIS); the emergence of robotics and artificial intelligence; major events in space and cyberspace; and the growing profile of nuclear weapons. Each chapter presents the reader with a succinct summary of the topic, provides a challenging analysis of current issues, and finishes with key points, questions for discussion, and further reading. This book will be essential reading for upper-level students of strategic studies, war studies, military history, and international security.

The newest book in Michael Mattesi's Force Drawing series takes movement to the next level. *Force: Drawing Human Anatomy*, explores the different facets of motion and the human body. As opposed to the memorization technique, Mattesi stresses the function of each body part and how gravity relative to different poses affects the aesthetics and form of muscle. The chapters are divided by the different parts of the body, thus allowing the reader to concentrate on mastery one body part at a time. Color coded images detail each muscle and their different angles. Special consideration is given to anatomy for animation, allowing the reader to create a character that is anatomically accurate in both stillness and motion. Key Features Detailed visual instruction includes colourful, step-by-step diagrams that allow you to easily follow the construction of an anatomically correct figure. Clearly organized and color coded per regions of the body's anatomy, a clarity of design for better reader understanding. Learn how anatomy is drawn and defined by the function of a pose. Visit the companion website for drawing demonstrations and further resources on anatomy.

Sun, fun, and Jo Pomeroy, the sexiest, most-driven attorney around, await NYPD Sergeant Gabe Townsend in Los Angeles. A trip to the West Coast is the perfect vacation – he won't have to hide his relationship with Jo from the NY anti-counterfeiting task force, and he can finally enjoy some overdue time-off with the woman of his dreams. Jo makes undercover deals for fake merchandise, but her feelings for Gabe are all too real. Unfortunately, she isn't the one on vacation, and while she can't wait to get her heartthrob alone, she also can't say no when the mayor of L.A. asks for her help in ridding the city of illegal knockoffs. Being too dedicated for her own good backfires when Jo ends up on a killer's hit list. Gabe wants Jo to back down; she's not about to. As the danger escalates, so do their feelings for each other. All Jo's ever wanted is to expand her task force nationwide. Now, with her life on the line, Jo must decide if heading the taskforce is worth sacrificing it all, including a future with the man she loves.

An Irish officer in the British Army, Major General Robert Ross (1766–1814) was a charismatic leader widely admired for his bravery in battle. Despite a military career that included distinguished service in Europe and North Africa, Ross is better known for his actions than his name: his 1814 campaign in the Chesapeake Bay resulted in the burning of the White House and Capitol and the unsuccessful assault on Baltimore, immortalized in "The Star Spangled Banner." *The Man Who Captured Washington* is the first in-depth biography of this important but

largely forgotten historical figure. Drawing from a broad range of sources, both British and American, military historians John McCavitt and Christopher T. George provide new insight into Ross's career prior to his famous exploits at Washington, D.C. Educated in Dublin, Ross joined the British Army in 1789, earning steady promotion as he gained combat experience. The authors portray him as an ambitious but humane commanding officer who fought bravely against Napoleon's forces on battlefields in Holland, southern Italy, Egypt, and the Iberian Peninsula. Following the end of the war in Europe, while still recovering from a near-fatal wound, Ross was designated to lead an "enterprise" to America, and in August 1814 he led a small army to victory in the Battle of Bladensburg. From there his forces moved to the city of Washington, where they burned public buildings. In detailing this campaign, McCavitt and George clear up a number of misconceptions, including the claim that the British burned the entire city of Washington. Finally, the authors shed new light on the long-debated circumstances surrounding Ross's death on the eve of the Battle of North Point at Baltimore. Ross's campaign on the shores of the Chesapeake lasted less than a month, but its military and political impact was enormous. Considered an officer and a gentleman by many on both sides of the Atlantic, the general who captured Washington would in time fade in public memory. Yet, as McCavitt and George show, Ross's strategies and achievements during the final days of his career would shape American defense policy for decades to come.

Jack Kirby is a former Army Ranger and an elite sniper for the US

Marshals. Until one foggy morning while on a mission in Nebraska the unthinkable happens, he suddenly can't pull the trigger. Due to his inability to do his job one of the most wanted men in the country is able to get off two last shots. On administrative leave to clear his head and work through his mental health he returns to his hometown, only to find it isn't the same small town he left years ago. The rural town is full of drugs and the problems that come with it. Reuniting with old friends, he wants to believe the modern problems haven't changed them but he can't ignore it. Catherine Elizabeth Greene is a small town detective determined to stop an unknown killer; a man of skill, who kills from ambush using a long ranged rifle. Desperate for help she asks Jack, a man she barely knows for help. Together, can they find they discover the killer?

"In this work, Maslov relates the fate of those generals who fell into German captivity. After relating the grisly circumstances of their ordeal in German prisoner-of-war camps, Maslov then tells the sordid tale of how an ungrateful Soviet state condemned for treason against their homeland many of those who had served it loyally both in combat and in German prisoner-of-war camps. By exploiting unprecedented archival materials, Maslov demonstrates how Stalin and the Soviet security organs condemned and shot many of the returnee-generals, most on trumped-up charges, in part as scapegoats for the real crimes committed by Stalin and the Soviet military leadership during the tragic initial period of the war."--Publisher's description.

Professor Mazrui, Reith Lecturer and presenter of BBC1's series *The Africans*, makes us reconsider the realities of power in world politics. Ali Mazrui argues that the emphasis in world politics continues to be on arms, on resources and on strategic calculations and that the importance of culture has been grossly underestimated. Professor Mazrui's own mind is a cultural cross-roads; he can give Islamic insights to Western audiences about *The Satanic Verses*; he relates the Beijing Spring to the Palestinian Intifada; he compares the effects of Zionism and Apartheid; he puts together Muhammad, Marx and market forces; and he tells the Americans that their attitude to the Third World is a dialogue of the deaf. ALI A. MAZRUI was Director of the Institute of Global Cultural Studies at the State University of New York at Binghamton and Senior Scholar in African Studies at Cornell University Kenya: EAEP

This handbook reveals those aspects of hacking least understood by network administrators. It analyzes subjects through a hacking/security dichotomy that details hacking maneuvers and defenses in the same context. Chapters are organized around specific components and tasks, providing theoretical background that prepares network defenders for the always-changing tools and techniques of intruders. Part I introduces programming, protocol, and attack concepts. Part II addresses subject areas (protocols, services, technologies, etc.) that may be vulnerable. Part III details consolidation activities that hackers may use following penetration.

Operation Barbarossa: Volume IIA concerns the Wehrmacht. All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I, along with the contextual history. An assessment of each weapon system's inherent 'combat power' is provided, as well as attributes such as the relative anti-tank, anti-personnel and anti-aircraft values. Volume IIA then focuses on the detailed Kriegstarkenachweisungen (KStN, or TOE) for German land units (including those in the West), as well as the unit's actual organisation and equipment. All significant units in the German Army (Heer), Waffen SS, Luftwaffe and security forces are included; ranging from the largest panzer divisions, down to small anti-aircraft companies, military-police units, Landeschützen battalions, and rail-road and construction companies. In all cases the data is presented in detailed tables, using the weapon systems and combat squads previously analysed.

The 17 revised full papers presented together with edited transcriptions of some of the discussions following the presentations have gone through multiple rounds of reviewing, revision, and selection. The theme of this workshop was "Brief Encounters". In the old days, security protocols were typically run first as preliminaries to, and later to maintain, relatively stable continuing relationships between relatively unchanging individual entities. Pervasive computing, e-bay and second life have shifted the ground: we now frequently desire a secure commitment to a particular community of entities, but relatively transient relationships with individual members of it, and we are often more interested in validating attributes than identity. The papers and discussions in this volume examine the theme from the standpoint of various different applications and adversaries.
