The Wiley Handbook of
Sustainability in Higher
Education Learning and
Teaching PALGO centar

This book analyzes regional and local models of development, in the context of existing socio-economic disparities and the impact of EU enlargement and European policy, offering a comparative and in-depth analysis of the distinct nature of regional differences within Central and Eastern Europe.

Implementation of action plans for Roma at the local level

Springer Nature

In this new edition, the progress made in the last decade to solve the environmental problems described in the first edition is assessed. The attempts to bring environmental legislation into line with West European norms is also described. Environmental Problems of East-Central Europe looks at air and water pollution, modern

farming, water supplies, waste management and landscape protection.

These topics are placed within economic, social and political profiles, as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs, European Union assistance, civil society and the work of environmental NGOs are also discussed. All of these matters are considered within the context of the wider geographical area and then by each individual country, including the previously communist states lying to the west of the Soviet Union (now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities) and a review of the former Soviet Union with particular reference to the Baltic States. Environmental Problems in East-Central Europe provides a wealth of up-to-date reference material, with a vast amount of supporting literature on environmental conditions

and the functioning of civil society and a map of each country. The environment is being taken seriously by them all, such is the influence of the Rio sustainability agenda in general and the EU environmental 'acquis' in particular. The book reveals that Eastern Europe is not a blighted area, but in some respects has a higher biodiversity than Western Europe. Although there is enormous waste and inefficiency in energy use, people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of 'fair share' of the earth's resources.

*Conflict Management and
Resolution in Regions of
Long Confronted Nations*
FON

The book analyzes the twenty years of economic transition from socialism to capitalism in Serbia. It offers a comprehensive evaluation of the achievements and failures of the transition, and explains why its course has been more complex and unique than elsewhere in the former

socialist world.

SPIN je naučni i stručni skup koji još od 2003. godine organizuje Centar za operacioni menadžment Univerziteta u Beogradu – Fakulteta organizacionih nauka, u saradnji sa Privrednom komorom Srbije i Privrednom komorom Beograda. Ove godine skup je posvećen mogućnostima razvoja privrede zasnovanim na savremenim digitalnim rešenjima, kao i na zelenom razvoju kao jedinom mogućem i odgovornom razvoju koji omogućava održivo upravljanje prirodnim dobrima, bez narušavanja tananog ekosistemskog ekvilibrijuma na kojem se zasniva i naše samo ljudsko bitisanje i blagostanje. XIV SPIN pod nazivom „Digitalni i zeleni razvoj privrede“ zabeležio je preko 100 naučnih radova i gostujućih predavanja, što čini rekordni broj radova na SPIN-u. Ovome treba dodati da je u njihovom pisanju, učestvovalo 295 autora i preko 30 institucija iz sedam zemalja – Srbije, Severne Makedonije, Hrvatske, Bosne i Hercegovine, Slovenije, Velike Britanije i Grčke. Tema ove

konferencije nije bila samo skup izabranih i aktuelnih reči; ona je poziv na akciju, poziv na transformaciju i poziv da se napravi razlika i neophodna promena. Zato skup podrazumeva razmatranje ključnih tema, istraživanje novih koncepata, otkrivanje rešenja, postavljanje temelja za promene i sejanje semena napretka koje će povezati akademiju i privredu. Svako od prisutnih, bilo da je bio govornik, panelista, učesnik ili gost doprineo je skupu kroz svoju jedinstvenu perspektivu i stručnost, obogaćujući ovu konferenciju kroz prezentaciju rezultata naučno-istraživačkih radova, učešća u panel diskusijama i prikaza primera dobre poslovne prakse. Na ovaj način struka i akademija su doprineli odgovornom i neophodnom digitalnom i zelenom razvoju kako srpske privrede, tako i privrede regiona. U Zborniku radova XIV Skupa privrednika i naučnika SPIN'23 su radovi koji su recenzirani i prihvaćeni za izlaganje na Skupu, a raspoređeni su u sledeće tematske oblasti:

- Cirkularna i bioekonomija
- Ekološki menadžment i zelena tranzicija
- Finansijski

menadžment, revizija i računovodstvo

- Informacioni sistemi
- preduzeća
- Interdisciplinarni projekti kao nosilac razvoja
- privrede
- Kvantitativne metode u operacionom menadžmentu
- Lin i kaizen menadžment
- Menadžment kvaliteta i standardizacija
- Menadžment tehnologije i održivi razvoj
- Organizaciono restrukturiranje i upravljanje promenama
- Primena veštačke inteligencije u poslovanju
- Upravljanje inovacijama
- Upravljanje ljudskim resursima
- Upravljanje logistikom i lancima snabdevanja
- Upravljanje marketingom i komunikacijama
- Upravljanje poslovnim procesima
- Upravljanje proizvodnjom i uslugama
- Upravljanje projektima

Zbornik radova sadrži i radove plenarnih i uvodnih predavača XIV Skupa privrednika i naučnika SPIN'23, kojima se posebno zahvaljujemo za učešće na Skupu.

Socijalno stanovanje u Srbiji Univerzitet Singidunum

This Proceedings contains the papers presented at the 7th IFAC Workshop on Supplementary Ways for Improving International Stability held in Ohrid,

Republic of Macedonia on 22-24 May 2000. There are twenty papers which discuss a wide and diverse selection of issues such as peace, conflict, ethics, tourism, social systems and international law in relation to regions of long-confronted nations. Paper 1 is an invited plenary lecture which is dedicated to the study of mutual relationship and relevance of systems theory and human science. Paper 2 is the keynote lecture dedicated to the study of the concept of active peace. Paper 3 is the SWIIS 2000 survey paper dedicated to surveying the development of the application of systems engineering methods to international conflict resolution. Session one looked at behaviour indicated with slogans and proverbs and general security modelling in society systems via a view stability as ever evolving property and a need for safety and stability. Session two discusses power distribution, processes of coalition formation and conditions for multipolar stability. Structural analysis and modelling of complex hierarchical systems is also addressed here. The third session looks at how

fuzzy information is dealt with in human organisation systems and the theory of using fuzzy systems for analysing society systems in transitional crisis and reformulation of national goals. The fourth session is dedicated to non-technical problems in crisis or similar situations in society systems represented by issues of ethics, fairness and justice. In session five the authors presented the modelling and management results of their own multi-national co-operation following their goals and purposes. It also explores a new methodological approach to international cross-boundary co-operation in regions of long confronted nations which is enhanced by common ecological concerns and tendencies to save the living environment for future generations. The impact of NATO action on supplemental ways intended to improve international stability, with a primary focus on the 1999 Kosovo crisis is discussed in session six. Session seven looked at methods which can be used in order to empower individuals, teams, and even larger social groups to become more

competent in coping with changes. The impact of developing tourism and tourist industries on cross-border international co-operation in regions of long confronted nations is also discussed here.

The Montenegrin Adriatic Coast Routledge Entrepreneurship Development in the Balkans directly engages questions of innovation and risk management within various types of entrepreneurship, including female, social, migrant, and corporate entrepreneurship in the context of the Balkans. Young Children in the World and Their Rights FON

This book documents and compares the experiences of a wide range of universities across the five continents with regard to sustainable development, making it of special interest to sustainability researchers and practitioners. By showcasing how integrative approaches to sustainable development at the university level can be successfully employed to bridge the gaps between disciplines, the book provides a timely contribution to the literature on sustainability and offers a valuable resource for all those

interested in sustainability in a higher education context.

Odabrana Područja Za Dnevne Leptire Nenad Dikić

This book systematically compares the innovation and entrepreneurship education (IEE) in the United States, the United Kingdom, Finland, Germany, Croatia, Canada, South Korea, and China. The book invites the most distinguished professors of each country in this field to contribute. It provides a context analysis that can lead to greater insight into why and how IEE has become an important government agenda and an institutional priority in different country settings. Following the context, each chapter analyzes governmental policies and the guidance of entrepreneurship education in recent years. This book also analyzes the internal development and supporting system of IEE from an ecosystem perspective. Based on the comparison of case countries, the book puts forwards the common successful experience and the differentiation of IEE. [Integrative Approaches to Sustainable Development at University Level](#) Springer Nature

This report assesses the extent to which Croatia's multi-level governance system is supporting its regional development objectives. In particular, it provides an overview of the country's regional development performance on several demographic, economic and well-being indicators. From there, it considers how the regional development reforms adopted since 2014 affect the ability of national and subnational governments to design, implement, fund, monitor and evaluate place-based regional development plans.

Nacionalna strategija stvaranja poticajnog okruženja za razvoj civilnog društva od 2012. do 2016. godine

Springer Nature
Knjiga obravnava Resoluciju o nacionalnih razvojnih projektih za obdobje 2007-2023, njene razvojne izzive in njen vpliv na skladen regionalni razvoj, pa tudi nekatere klasične teme regionalne politike in regionalnega razvoja. Prva poglavja osvetljujejo celotno Resolucijo, sledijo pa poglavja, ki iz različnih zornih kotov obravnavajo njene posamezne projekte. Drugi del knjige je namenjen različnim vidikom skladnega

regionalnega razvoja, predvsem vlogi znanja v regionalnem razvoju in pomenu naravnih dejavnikov pri regionalnem planiranju.

Entrepreneurship Development in the Balkans Routledge

A comprehensive resource for higher education professionals interested in sustainability pedagogy In *The Wiley Handbook of Sustainability in Higher Education Learning and Teaching*, a team of distinguished researchers delivers an insightful reference for higher education professionals seeking to embed sustainability in learning and teaching. The book offers a way for higher education institutions to implement sustainability goals in their curricula and provides comprehensive guidance to educators, researchers and practitioners. The authors discuss recent developments in technological innovations, best practices, lessons learned, current challenges, and reflections in the area of sustainability teaching in higher education. They also examine the impact of the COVID-19 pandemic on sustainability education. With

contributors from a variety of disciplines, including engineering, medicine, urban design, business, environmental science, and social science, the book considers the embedding of sustainability in regenerative learning ecologies, living laboratories, and transgressive forms of learning. It also includes: A thorough introduction to activist learning for sustainability and outcome-based education towards achieving sustainable goals in higher education Comprehensive explorations of factors that hinder the implementation of sustainability initiatives in higher education institutions Practical discussions of developing stakeholder agency in higher education sustainability initiatives In-depth examinations of global trends and country-specific initiatives in sustainability teaching Perfect for education developers seeking to incorporate sustainability, The Wiley Handbook of Sustainability in Higher Education Learning and Teaching is also ideal for academics, researchers, policymakers, and accreditation personnel

working in the area of sustainability.
Prvi kongres o dijetetskim suplementima sa međunarodnim učešćem Emerald Group Publishing
 Obnova dvorca Ars Eugenium, prvotnog vlasnika princa Eugena Savojskog, razotkriva tajne dvorca podignutog na prinčevu najvećem posjedu smještenom u Bilju. Utvrđeni biljski dvorac izgrađivao se od 1707. godine do 1712. godine, a u izgradnji je aktivno sudjelovao prinčev omiljeni arhitekt – Johann Lucas von Hildebrandt. Istraživačkom studijom „Dvorac Ars Eugenium – atraktorskom biseru ususret“ opisuje se prvo projektno razdoblje obnove dvorca Ars Eugenium kojemu su nositelji Osječko-baranjska županija i Općina Bilje. Riječ je o razdoblju započetom 2017. godine, a završenom koncem 2022. godine kada je dovršena i predstavljena tehničko-projektna dokumentacija obnove dvorca Ars Eugenium. Interpretiranjem prostora dvorca, njegove namjene i uloge, određen je budući smjer obnove dvorca Ars Eugenium. Autorice

studije pritom posežu za vlastitom definicijom prostorne interpretacije čiji je cilj prenošenje ključnih povijesnih značajki u izričaj razumljiv suvremenicima te postizanje njihova poistovjećivanja s interpretiranim nasljeđem. Naglasak je na dostizanju poistovjećivanja s prinčevom osobnosti sukladno onodobnim navikama, običajima, povijesnim događajima, legendama i predmetima. Projekt obnove dvorca projicira širi i uži plan pri čemu je širi plan oslonjen na interpretiranje uloge dvorca u Atraktoru – prinčevu sustavu gradova utvrda, dok je uži plan usmjeren na poistovjećivanje s princem i prostornim prenošenjem iskustva „umijeća bivanja Eugenom Savojskim“. Širi projektni plan obnove dvorca Ars Eugenium obnavlja ideju atraktorske jezgre koju su činili dvorac Ars Eugenium, osječka Tvrđa, Petrovaradin i Segedin. Atraktor je naziv kojim se imenuje prinčev projekt sustava od 12 gradova utvrda izgrađenih u prvim desetljećima 18. stoljeća u današnje četiri europske države (Hrvatska, Mađarska, Rumunjska i Srbija). Zbog svoje dvojake uloge

Atraktor se promatra kao a) atraktivna mirnodopska ogrlica (niska) gradova povezanih rijekama, ali i kao b) vojna linija razdvajanja. Uži projektni plan sažet je u imenu dvorca Ars Eugenium kojim se interpretiraju obnovljeni prostori dvorca s ciljem dostizanja „umijeća bivanja Eugenom Savojskim“. Prostori dvorca razdijeljeni su u pet cjelina od kojih je svaka funkcionalno povezana sa životopisom Eugena Savojskog, suvremenicima i povijesnim okolnostima. Poveznicu šireg i užeg projektnog plana čine ustanovljeni postupci brendiranja dvorca i komunikacijske strategije koja proizlazi iz poslovnih potencijala.

Current Economic Questions in Forestry and Wood Industry

Andizet - Institute for Scientific and Art Research in Creative Industry

This title was first published in 2003. Among the major challenges transition economies are facing is how to cope with globalization. Foreign direct investment (FDI) has proved the most dynamic (defensive and offensive) response, as an integration and network tool, yet outward FDI has

so far been overlooked in research. The vitality of outward FDI as an entry mode to the global economy is discussed in this authoritative volume from various angles, beginning with the context of the development strategy and the transition process. The experiences of the Slovene way of internationalization are compared with those of other transition economies. Readers will learn about the size, geographical distribution, trends and sectoral allocation of such outward FDI (OFDI) as well as the major motives, barriers and problems. The book also responds to questions about the extent to which outward FDI is instrumental in development/transition, EU accession and competitiveness strengthening. Based on extensive empirical research and focused case studies, the volume provides valuable lessons for other EU candidate countries and transition economies, while managerial experiences in entering Central and Eastern European markets offer universal internationalization lessons.

Spoljnotrgovinsko i

devizno poslovanje

Založba ZRC

This book provides different perspectives on the concept of children's rights, including policy, educational, and children's perspectives. It examines how the crucial ideas of the Convention on the Rights of the Child are respected and implemented in 14 countries in five regions of the world. It looks at early childhood education, children's participatory rights, and at how these rights are promoted and guaranteed in different countries. It explores the professional practice of education and its complexities, challenges and dilemmas, as well as the role of play, and of listening and participation. The book advocates children's rights today, arguing for its vital importance, in the best interests of the children. In doing so, it furthers the understanding of children's rights and spreads knowledge about the Convention, as a means of celebrating its 30th anniversary. The UN Convention on the Rights of the Child (UNCRC) comprises the potential to change the lives of children to the very best. It may exalt children from

the position of marginalized citizens to the centre of policies all over the world. Even though the concept of children's rights is omnipresent, the respect for children's rights must be discussed. While the Convention brings the new perspective of children as citizens to the world, there are still challenges in its application. The book interrogates challenges in understanding and applying children rights and offers possible answers to these challenges. The ratification process itself, does not guarantee that children's rights are respected. While all adults should take responsibility for implementing the UNCRC in everyday life, Early Childhood Education should give opportunities for children to learn and live their rights.

Regional Diversity and Local Development in the New Member States

Springer

Na področju demografskega razvoja deli Slovenija usodo razvitejših evropskih držav: prebivalstvo je doseglo svoj zenit in se hitro stara, njegovo obnavljanje je odvisno od migracij, projekcije napovedujejo hitro

zaostrovanje razmer s perečimi posledicami na številnih področjih. Demografske analize kažejo na nadaljevanje zgoščanja prebivalcev v osrednjeslovenski statistični regiji in ob večjem delu avtocestnega križa ter na upad števila prebivalcev v posameznih mestih in obsežnih obmejnih območjih. S tem se v prostorskem in strukturnem smislu uresničujejo napovedi izpred desetletij, ko so avtorji začeli opozarjati na demografsko ogroženost Slovenije in pričakovane prostorske posledice demografskih sprememb. Žal opozorila stroke niso naletela na plodna tla in posledice vse bolj trkajo na vrata. V monografiji ponovno obravnavamo problematiko razvoja obmejnih območij, problem staranja prebivalstva v mestih in na podeželju, vplive demografskih sprememb na gospodarstvo in zaposlovanje, problematiko oskrbe in zagotavljanja storitev splošnega pomena, več poglavij pa naslavlja posamezna območja Slovenije in njihove razvojne izzive, vezanje na demografske spremembe.

Socijalna politika Hrvatske
Springer Nature

This second edition of the book Sustainable Development of Mountain Regions: Southeastern Europe integrates the scientific results and expertise of the researchers from the countries in Southeastern Europe. The book consists of updated information for the topics observed in first edition and several new chapters with analysis of some problems in the mountain regions of four new for the edition countries in Southeastern European space. The general themes in the book are related to Global problems and mountain regions; Nature resources and land use in mountain regions; Social, economic and regional problems of mountain regions; Nature protection, conservation and monitoring and Networks and strategies for mountain regions. The key topics for discussion are: Natural resources and land use in mountain regions. Sustainable social and economic development of the mountain regions. Natural disasters and risk prevention. Spatial modeling and planning. Nature protection, monitoring and conservation. Politics and sustainable practices for

development of mountain regions. Transborder and regional cooperation. Mountain regions in Southeastern Europe are characterized by unique landscape and biological diversity and great economic potential. They have function as a living space and provide different groups of ecosystem and landscape services. In social and economic aspects these regions are one of the poorest in Southeastern European countries with unused potential. Human, ecological and economic problems arising in various mountain regions have the same basic characteristics irrespective of the country. Some mountain regions are subject to specific for the conditions of the mountain and country policy for planning, development and mountain population promotion. The general goal is development of whole economy and the efficient management of natural resources and prevention of natural and technological disasters. The mountain regions are one of the most threatened landscape systems in Southeastern Europe. Understanding the importance of the mountain regions and

conservation of the natural heritage require scientific and institutional cooperation at all levels. INOVATIVNA REŠENJA OPERACIONOG MENADŽMENTA ZA REVITALIZACIJU PRIVREDE SRBIJE John Wiley & Sons In addition to the content prescribed by the official curriculum of any given educational establishment, students learn other information and skills outside of the intended and taught information (such as sharing, communication, and conflict-resolution). These learned skills, otherwise unaccounted for in the education process, can be considered as a part of a hidden or unwritten curriculum. Implicit Pedagogy for Optimized Learning in Contemporary Education is a pivotal reference source that provides vital research on the application of assessment methods for the evaluation of indirect and direct educational methods. While highlighting topics such as language development, teacher agency, and learning process, this publication explores hidden curricula as well as the methods of learning outside of the prescribed school curriculum. It is

ideally designed for educators, administrators, students, and researchers seeking current research on the effect of hidden curricula on the education process. *Comparative Entrepreneurship Education* OECD Publishing Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Serbia. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation, and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise, and radiation. Then, a section on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil, and minerals. Further

treatment includes the application of zoning and land-use planning, rules on liability, and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Serbia. Academics and researchers, as well as business investors and the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative environmental law and policy.

Održivi razvoj i životna sredina ka Evropi u 95+ koraka Založba ZRC

This book discusses national school policy reforms in a number of key European countries and shows how these are framed in transnational collaborations that meet with national particularities and contestations. It gives an overview of school policy developments that

represents the diversity of Europe within a comparative framework. It takes point of departure in the fact that European countries in their school and education policies have been increasingly aligning with each other, mostly via transnational collaborations, the OECD, EU, and the Bologna Process. Even the IEA has been instrumental to motivate alignments by means of influential surveys, knowledge production and methodological development. This alignment in terms of common standards, social technologies, qualification frameworks and so forth have aimed at facilitating mobility of students, workers, business and so forth as well as fostering a European identity among citizens from Europe's patchwork of small and medium-size countries, representing a patchwork of different languages, cultures and societal contexts. In national recontextualizations, however, alignments have been continuously contested according to the particularities of what has been possible educationally and politically in the different national contexts. Furthermore, the return of

national(isms) as well as the rise of edubusiness and digitalization have been increasingly influential. This book thus concludes that increasing transnational alignments have to be observed with meticulous attention to different national contexts that matter greatly.

School Policy Reform in Europe Alfa University

This is the first of two volumes that together provide an integrated picture of the Montenegrin Adriatic coast, presenting the natural components of the system as well as the chemical composition and chemical processes in the extended area. This book describes the biology and ecology of the high seas of the Montenegrin coast, with a special focus on their biodiversity, flora and fauna, fisheries, mariculture, marine reptiles and mammals. The data has been collected through national and international projects over the last few decades and provides the reader with models and recommendations for the protection of this vital region of the Adriatic coast, as well as scientific recommendations for the sustainable use of its biological resources. Given the breadth and

depth of its coverage, the book offers an invaluable source of information for researchers, students and environmental managers alike.
