This book examines the reception in Latin America of prints designed by the Flemish artist Peter Paul Rubens, showing how colonial artists used such designs to create all manner of artworks and, in the process, forged new frameworks for artistic creativity. Peter Paul Rubens (1577–1640)

never crossed the Atlantic himself, but his impact in colonial Latin America was profound. Prints made after the Flemish artist's designs were routinely sent from Europe to the Spanish Americas, where artists used them to make all manner of objects. Rubens in Repeat is the first comprehensive study of this transatlantic phenomenon, despite broad recognition that it was one of the most important forces to shape the artistic landscapes of the region. Copying, particularly in colonial contexts, has traditionally held negative implications that have discouraged its

serious exploration. Yet analyzing the interpretation of printed sources and recontextualizing the resulting works within period discourse and their original spaces of display allow a new critical reassessment of this broad category of art produced in colonial Latin America—art that has all too easily been dismissed as derivative and thus unworthy of sustained interest and investigation. This book takes a new approach to the paradigms of artistic authorship that emerged alongside these complex creative responses, focusing on the viceroyalties of New Spain

and Peru in the seventeenth and eighteenth centuries. It argues that the use of European prints was an essential component of the very framework in which colonial artists forged ideas about what it meant to be a creator.

Latin America and the Global Cold War

analyzes more than a dozen of Latin America's forgotten encounters with Africa, Asia, and the Communist world, and by placing the region in meaningful dialogue with the wider Global South, this volume produces the first truly global history of contemporary Latin America. It uncovers a multitude of overlapping and sometimes conflicting iterations of Third Worldist movements in Latin America, and offers insights for better understanding the region's past, as well as its possible futures, challenging us to consider how the Global Cold War continues to inform Latin America's ongoing political struggles. Contributors: Miguel Serra Coelho, Thomas C. Field Jr., Sarah Foss, Michelle Getchell, Eric Gettig, Alan McPherson, Stella Krepp, Eline van Ommen, Eugenia Palieraki, Vanni Pettina, Tobias Rupprecht, David M. K. Sheinin, Christy Thornton, Miriam Elizabeth Villanueva, and Odd Arne Westad.

Introduction to Latin, Second Edition is an introductory Latin textbook designed with a streamlined flow that allows it to be completed in one year. Its concise and

uncluttered approach gives students what they need to master the material. Grammar is integrated within the context of reading fluency. Innovative exercises provide translation practice as well as build “instinctive skills” that prepare students for reading authentic Latin works. Features: Concise, streamlined presentation focuses on what students need to know, allowing the material to be covered in a year, even for courses which meet only three days a week Innovative exercises that go beyond the usual translation practice, engaging students with the mechanisms of the language and developing “more instinctive” skills Succinct grammatical explanations that don't overwhelm the students with superfluous detail while also providing help for students with little or no understanding of English grammar Latin readings from ancient sources in the form of both sentences and short passages allow for students to connect with authentic Latin Practical instructions often overlooked by other textbooks, including reading a dictionary entry, reading strategies, sentence patterns, gapping, and expectations New to the Second

Edition Revised order of presentation that spreads material out more evenly between the first and second halves of the book Derivatives exercises added at the end of each chapter providing practice connecting English words with their Latin roots Bridge to next level: final three chapters provide review and include longer narrative readings with minimal editing to bridge students to the next level of Latin Revised selection of readings for more appropriate level of difficulty

This book is designed primarily for use in beginning and intermediate Latin classes at the undergraduate level (semesters 1-4 of college Latin). This Latin reader will present passages of 3-10 lines taken from Classical authors (including Caesar, Catullus, Cicero, Martial, Ovid, Vergil, etc. and inscriptions. The selections will consist of lively unadapted passages suitable for elementary and intermediate level Latin students. These passages will be

annotated in such a way that instructors can use them in a wide variety of classroom settings. The selections will be arranged to emphasize certain points of grammar and syntax (case use: Nominative, Genitive, Dative, Accusative, and Ablative; Pronouns; Ablative Absolutes; Relative Clauses; Indirect Statement; Subordinate Clauses; Subjunctive Verbs; and Conditionals). The arrangement of topics and the length of the passages is intended to provide the highest degree of flexibility in the classroom: a single selection could provide additional practice in syntax and translation during the first or last few minutes of a class session; a series of selections could provide the foundation of a class meeting; selections could be used for practice and/or testing in translating at sight; or the entire reader could be used as the foundation of a comprehensive review and transition into intermediate and advanced Latin. In essence, this reader will expose students of Latin to extended passages of unadapted Latin from a wide variety of important authors at the earliest stage in language instruction. This early exposure to

Classical authors will enable students to transition more easily from beginning and intermediate Latin textbooks to authentic Latin prose and poetry.

The first of three books in IFPRI's climate change in Africa series, *West African Agriculture and Climate Change: A Comprehensive Analysis* examines the food security threats facing 11 of the countries that make up West Africa -- Benin, Burkina Faso, Côte d'Ivoire, Ghana, Guinea, Liberia, Niger, Nigeria, Senegal, Sierra Leone, and Togo -- and explores how climate change will increase the efforts needed to achieve sustainable food security throughout the region. West Africa's population is expected to grow at least through mid-century. The region will also see income growth. Both will put increased pressure on the natural resources needed to produce food, and climate change makes the challenges greater. West Africa is already experiencing rising temperatures, shifting precipitation patterns, and increasing extreme events. Without attention to adaptation, the poor will suffer. Through

the use of hundreds of scenario maps, models, figures, and detailed analysis, the editors and contributors of *West African Agriculture and Climate Change* present plausible future scenarios that combine economic and biophysical characteristics to explore the possible consequences for agriculture, food security, and resources management to 2050. They also offer recommendations to national governments and regional economic agencies already dealing with the vulnerabilities of climate change and deviations in environment.

Decisionmakers and researchers will find *West African Agriculture and Climate Change* a vital tool for shaping policy and studying the various and likely consequences of climate change.

Medieval Europe was a world of kings, but what did this mean to those who did not themselves wear a crown? How could they prevent corrupt and evil men from seizing the throne? How could they ensure that rulers would not turn into tyrants? Drawing on a rich array of remarkable sources, this engaging study explores how the fears

and hopes of a ruler's subjects shaped both the idea and the practice of power. It traces the inherent uncertainty of royal rule from the creation of kingship and the recurring crises of royal successions, through the education of heirs and the intrigue of medieval elections, to the splendour of a king's coronation, and the pivotal early years of his reign. Monks, crusaders, knights, kings (and those who wanted to be kings) are among a rich cast of characters who sought to make sense of and benefit from an institution that was an object of both desire and fear.

The *Almagesti minor* is one of the most important works of medieval astronomy. The *Almagesti minor*, probably written in northern France circa 1200, is a Latin summary of the first six books of Ptolemy's astronomical masterpiece, the *Almagest*. Also known to modern scholars as the

"*Almagestum parvum*", the *Almagesti minor* provides a clear example of how a medieval scholar understood Ptolemy's authoritative writing on cosmology, spherical astronomy, solar theory, lunar theory, and eclipses. The author incorporated the findings of astronomers of the Islamic world, such as al-Battānī, into the framework of Ptolemaic astronomy, and he altered the format and style of Ptolemy's astronomy in order to make it accord with the author's ideals of a mathematical science, which were primarily derived from Euclid's *Elements*. The *Almagesti minor* had a profound effect upon astronomical writing throughout the 13th-15th centuries, including the work of Georg Peurbach and Johannes Regiomontanus. In this first volume of the *Ptolemaeus Arabus et Latinus* series, Henry Zepeda offers not only a critical edition of this little-studied text, but also a translation of it into English, analysis of both the text and its geometrical figures, and a thorough study of the work's origins, sources, and long-lasting influence.

Why should people - and economies - save? This book on the savings problem in Latin America and the Caribbean suggests that, while saving to survive the bad times is important, saving to thrive in the good times is what really counts. People must save to invest in health and education, live productive and fulfilling lives, and make the most of their retirement years. Firms must save to grow their enterprises, employ more workers in better jobs, and produce quality goods. Governments must save to build the infrastructure required by a productive economy, provide quality services to their citizens, and assure their senior citizens a dignified, worry-free retirement. In short, countries must save not for the proverbial rainy day, but for a sunny day - a time when everyone can bask in the benefits of growth, prosperity, and well-being. Why do governments tolerate the violation  
 of their own laws and regulations?

Conventional wisdom is that governments  
 cannot enforce their laws. Forbearance as  
 Redistribution challenges the standard  
 interpretation by showing that politicians  
 choose not to enforce laws to distribute  
 resources and win elections. Alisha  
 Holland demonstrates that this  
 forbearance towards activities such as  
 squatting and street vending is a powerful  
 strategy for attracting the electoral  
 support of poor voters. In many  
 developing countries, state social  
 programs are small or poorly targeted and  
 thus do not offer politicians an effective  
 means to mobilize the poor. In contrast,  
 forbearance constitutes an informal  
 welfare policy around which Holland  
 argues much of urban politics turns. While  
 forbearance offers social support to those  
 failed by their governments, it also

perpetuates the same exclusionary  
 welfare policies from which it grows.  
*For C Instruments* Courier Corporation  
 Latin American countries have for a long  
 time been importers of public policies and  
 institutions from the Global North. The  
 colonial legacy and resulting patterns of  
 international relations during the 20th  
 century favoured a course of adoption and  
 hybridization of political institutions. In  
 recent decades, a new conjuncture has  
 emerged in which Latin American policies  
 have started to diffuse South-South and  
 even South-North. Led by Brazil with  
 Participatory Budgeting and the Bolsa  
 Familia program, other countries in the  
 region soon followed. The Bus Rapid  
 Transit (BRT) system and bicycle policies  
 in Curitiba and Bogotá have also reached  
 wide international recognition and  
 circulation. And yet, despite Latin  
 America's new role as a policy "exporter",  
 little is known about its dynamics, causes,  
 and effects. Why have Latin American  
 policies been diffused inside and outside  
 the region? Which actors are involved?  
 What driving forces affect these  
 processes? This innovative collection  
 offers a new perspective on the policy

diffusion phenomena. Drawing on different  
 examples from Latin American  
 experiences in urban local policies and  
 national social policies, experts present a  
 new framework to study this phenomenon  
 centered on the mobilization of ideas,  
 interests and discourses for policy  
 diffusion. Latin America and Policy  
 Diffusion will be of great interest to  
 researchers, educators, advanced  
 students and practitioners working in the  
 fields of political science, public policy,  
 international relations and Latin American  
 Studies.
