The Complete Concordance to Shakspeare
 Routledge

For almost two centuries, Americans have
 relied upon political conventions to
 provide the nation with new leadership.

The modern convention, a four-day,
 carefully choreographed, prime-time
 television event designed to portray the

party and its candidate in the most
 favorable light, continues many of the
 traditions and rules developed during the
 first conventions in the mid-19th century.
 This study analyzes the birth of the
 convention process in the 1830s and
 follows its development over 40 years,
 chronicling each of the presidential
 elections between 1832 and 1872, the
 leading candidates, and an analysis of the
 key issues, and memorable speeches and
 events on the convention floor. Other
 topics include back-room deal making,
 "dark horse" candidacies, meeting halls,
 parades, rallies, and other accompanying
 hoopla. This volume reveals the origins of
 a quintessentially American spectacle and
 sheds new light on an understudied aspect

of the nation's political past.

Representations of Political Power BRILL
 The Early Anglo-Saxon Period is
 characterized archaeologically by the
 regular deposition of artefacts in human
 graves in England. The scope for dating
 these objects and graves has long been
 studied, but it has typically proved easier
 to identify and enumerate the
 chronological problems of the material
 than to solve them. Prior to the work of the
 project reported on here, therefore, there
 was no comprehensive chronological
 framework for Early Anglo-Saxon
 Archaeology, and the level of detail and
 precision in dates that could be suggested
 was low. The evidence has now been
 studied afresh using a co-ordinated suite

of dating techniques, both traditional and new: a review and revision of artefact-typology; seriation of grave-assemblages using correspondence analysis; high-precision radiocarbon dating of selected bone samples; and Bayesian modelling using the results of all of these. These were focussed primarily on the later part of the Early Anglo-Saxon Period, starting in the 6th century. This research has produced a new chronological framework, consisting of sequences of phases that are separate for male and female burials but nevertheless mutually consistent and coordinated. These will allow archaeologists to assign grave-assemblages and a wide range of individual artefact-types to defined phases that are associated with calendrical date-ranges whose limits are expressed to a specific degree of probability. Important unresolved issues include a precise adjustment for dietary effects on radiocarbon dates from human skeletal material. Nonetheless the results of this project suggest the cessation of regular burial with grave goods in Anglo-Saxon England two decades or even more before the end of the seventh century. That creates a limited but important discrepancy with the current numismatic chronology of early English sceattas. The wider implications of the results for key topics in Anglo-Saxon archaeology and social, economic and religious history are discussed to conclude the report.

"Political economy is defined in this volume as collective state or corporate support for art and architecture in the public sphere intended to be accessible to the widest possible public, raising questions about the relationship of the state to cultural production and consumption. This collection of essays explores the political economy of art from the perspective of the artist or from analysis of art's production and consumption, emphasizing the art side of the relationship between art and state. This volume explores art as public good, a central issue in political economy. Essays examine specific cultural spaces as points of struggle between economic and cultural processes. Essays focus on three areas of conflict: theories of political economy put into practices of state cultural production, sculptural and architectural monuments commissioned by state and corporate entities, and conflicts and critiques of state investments in culture by artists and the public."--amazon.com edit. desc.

This field study of organized Chinese life in Cambodia, past and present, takes its place in the growing sociological literature on the overseas Chinese and, in a sense, transcends it. For it relates its conclusions on the evolution the structure of the Cambodian Chinese community to the evidence from other overseas Chinese communities, and moves on to a comparison between overseas Chinese social organization and the organization of cities in China. Cambodia, the overseas Chinese, and traditional China all stand illuminated.

Islam and Political Development in Turkey Routledge

This collection addresses how models from ancient Greece and Rome have permeated Irish political discourse in the century since 1916. The 1916 Easter Rising, when Irish nationalists rose up against British imperial forces, became almost instantly mythologized in Irish political memory as a turning point in the nation's history that paved the way for Irish independence. Its centenary has provided a natural point for reflection on Irish politics, and this volume highlights an unexplored element in Irish political discourse, namely its frequent reliance on, reference to, and tensions with classical Greek and Roman models. Topics covered include the reception and rejection of classical culture in Ireland; the politics of Irish language engagement with Greek and Roman models; the intersection of Irish literature with scholarship in Classics and Celtic Studies; the use of classical referents to articulate political inequalities across gender, sexual, and class hierarchies; meditations on the Northern Irish conflict through classical literature; and the political implications of neoclassical material culture in Irish society. As the only country colonized by

Britain with a pre-existing indigenous heritage of expertise in classical languages and literature, postcolonial Ireland represents a unique case in the field of classical reception. This book opens a window on a rich and varied dialogue between significant figures in Irish cultural history and the Greek and Roman sources that have inspired them, a dialogue that is firmly rooted in Ireland's historical past and continues to be ever-evolving.

"Representation of political power seems to have been necessary at all times in all complex urban societies. To secure order - to construct a certain social, ideological, religious, economic, and cultural stability - seems to be one of the main intentions of representation. When order breaks down or is threatened, political power comes under threat, and the cohesion of the community is also in jeopardy." "In times of impending change, crisis, or disorder, special effort is required to reassure the community of the rulers' ability to maintain stability. What those in power did to convince the affected communities of their qualities as rulers, that is, their representational strategies - especially in times of change - is the subject of this book, explored through examination of case studies drawn from the ancient Near East. The volume is divided into three thematic parts: "Reestablishment of Order after Major Disruption," "Changing Order from Within," and "Perceptions of New Order."--BOOK JACKET.
