Physical Properties Mathematics and its Application(English Version) By: Chen Shuxuan Chen Shuxuan(陈舒旋) was born on March 30, 1936 in Fuzhou, Fujian Province. He graduated from the Department of Physics at Xiamen University. He has been engaged in teaching and scientific research for many years in colleges and universities. He has taught courses such as

electrician principle, electronic circuit, pulse circuit, digital logic, computer composition principle, computer application, assembly language programming, and so on. Based on many years of teaching experience, he compiled the IBM Microcomputer System and Assembly Language Programming guide which was published by Xiamen University Press in March 1990. In addition to teaching, he has made great efforts to develop the application of scientific theory and technology, participated in the development of many electronic circuits and computer applications projects, and published many research papers and works. Among them, "MM-1000 Friction Testing Machine Microcomputer System" software and hardware development, passed provincial technical appraisal in December 1987. The system plays an important role in the research of wet friction and wear testing technology and it has won the third prize of the Ministry of Electricity. Before retirement, he was an associate professor in the Department of Computer Science, Xiamen University.

The complex linguistic situation of earlier multilingual Britain has led to numerous contact-induced changes in the history of English. However, bi- and multilingual texts, which are attested in a large variety of text types, are still an underresearched aspect of earlier linguistic contact. Such texts, which switch between Latin, English and French, have increasingly been recognized as instances of written code-switching and as highly relevant evidence for the linguistic strategies which medieval and early modern multilingual speakers used for different purposes. The contributions in this volume approach this phenomenon of mixed-language texts from the point of view of code-switching, an important mechanism of linguistic change. Based on a variety of text types and genres from the medieval and Early Modern English periods, the individual papers present detailed linguistic analyses of a large number of texts, addressing a variety of issues, including methodological questions as well as functional, pragmatic, syntactic and lexical aspects of language mixing. The very specific nature of language mixing in some text types also raises important theoretical questions such as the distinction between borrowing and switching, the existence of discrete linguistic codes in earlier multilingual Britain and, more generally, the possible limits of the code-switching paradigm for the analysis of these mixed texts from the early history of English. Thus the volume is of particular interest not only for historical linguists, medievalists and students of the history of English, but also for sociolinguists, psycholinguists, language theorists and typologists.

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

*John Heywood's complete series of home lesson books. Code 1875* Routledge

This book presents an empirically grounded argument for a new approach of teaching writing to diverse students in the English language arts classroom. Responding to advocates of the "code-switching" approach, four uniquely qualified authors make the case for "code-meshing"--allowing students to use standard English, African American English, and other Englishes in formal academic writing and classroom discussions. This practical resource translates theory into a concrete roadmap for pre-and in-service teachers who wish to use code-meshing in the classroom to extend students' abilities as writers and thinkers and to foster inclusiveness and creativity. The text provides activities and examples from middle and high schools as well as college and addresses the question of how to advocate for code-meshing with skeptical administrators, parents, and students.

*Publisher and Bookseller* Dorrance Publishing

UBLI has conducted field surveys since 2002 and built spoken language corpora for French, Spanish, Italian (Salentino dialect), Russian, Malaysian, Turkish, Japanese, and Canadian multilinguals. This volume features new research presented at the UBLI second workshop on Corpus Linguistics □ Research Domain, which was held on September 14, 2006. The first part consisting of eleven presentations to this workshop shows a wide range of subjects within the area of corpus-based research, such as dictionary, linguistic atlas, dialect, translation, ancient texts, non-standard texts, sociolinguistics, second language acquisition, and natural language processing. The second part of this volume comprises ten additional contributions to both written and spoken corpora by the members and research assistants of UBLI.

The Lexicon brings together lexical material from a wide range of published and non-published sources to create an extensive compilation of the vocabulary of Fulfulde as it is spoken in that part of central Mali known as Masina (in Fulfulde, Maasina). The Lexicon is intended primarily for non-Fulfulde speakers who are learning the language at the intermediate or advanced levels and who need access to a comprehensive reference source on Fulfulde vocabulary. Scholars, development workers, and others whose research or fieldwork involves use of the Fulfulde of Masina may find it helpful as well in clarifying nuances of meaning and standardized spelling for the less familiar terms they might encounter. It is also intended that the present work, beyond the matter of organizing vocabulary, will contribute significantly to the expanding lexicographical and linguistic investigations of Fulfulde.

*GB/T 32960.3-2016 Translated English of Chinese Standard (GBT 32960.3-2016, GB/T32960.3-2016, GBT32960.3-2016)*

This book provides new insights into the nature of hybrid place-

names in England. It uncovers the different patterns of hybrid place-name formation, investigating the Celtic, the Anglo-Saxon, the Scandinavian and the Norman French layers and elements of English toponymy. The book analyses research conducted on a corpus of toponyms drawn from a place-name dictionary, and is embedded within the framework of sociolinguistics. It will appeal historians, historical linguists, and sociolinguists, as well as place-name scholars and local history enthusiasts.

*Designing and Developing Robust Instructional Apps* advances the state of instructional app development using three learning paradigms for building knowledge foundations, problem-solving, and experimentation. Drawing on research and development lessons gleaned from noted educational technologists, time-tested systematic instructional design processes, and results from user experience design, the book considers the planning

and specification of instructional apps that blend media (text, images, sound, and moving pictures) and instructional method. Further, for readers with little to no programming experience, introductory treatments of JavaScript and Python, along with data fundamentals and machine learning techniques, offer a guided journey that produces robust instructional apps and concludes with next steps for advancing the state of instructional app development.
